The company offers more than 1 million books for sale. Generally speaking, it is cheaper to buy an eBook than to buy a physical book because it is much cheaper for a publisher to produce. Furthermore, you can take your e-books on the go on your computer, tablet, or favorite mobile device. Our recommendation: We recommend buying e-books from Amazon. because it has a better reputation and better online reviews. If you are still nervous about buying from e-books, you can always buy from the largest bookstore in the world, this site, ebooks2pdf.com, has some of the books I need next semester for quite cheap. But I've never used them or heard of them. They have a pretty large selection of books. Has anyone here used them before/ know if it is legitimate? Every insight is appreciated.
