Forums &gt; Ultima - FFXIV Public Discussion Area &gt; FFXIV Feed Test Area &gt; 08-13-2020 11:16 PM #1 This is our fusion guide for FF14 Patch 5.31 for the i490 Aesthete meeting set. This is a penta-fusion set designed to take you from level 80 to 90 when the time comes. If you're using the current Dragonsung tool, the stats will be lower than the guide. This will change as we make updates. The statistics with the main hand fused are 2671/2682/858. Be sure to check the small box that says Show only marked items. Patch 5.31 updated merge guide for diadem and i490 Aesthete's Gathering Gears: The statistics we need for meeting breakpoints for node bonuses: Meeting - 2740, Perception - 2642, GP - 858. Equipped with handmade MH tool and enhanced with HQ Mushroom Saute statistics are 2747/2720/858. Unfortunately you can't hit all the required stats f the dragonsung main hand tool is equipped. Since this is a fusion guide for all purposes - for Headband, collectibles, headquarters materials and ephemeral nodes - I'm clinging to as much perception as possible. The only difference between this guide and the previous one is the hat. In the notes and video description in the previous guide I suggested leaving several of the final merges open so you can make the necessary adjustments for the Diadem. If you did, you'll only need to add 12 meeting points and 8 GPs for final mergers and you'll be on track for the entire Diadem meeting, as well as all other meeting types in other areas. You can use the Ariyala template as is or modify the merges to meet your personal needs. If you make a modified copy, be sure to save it using the Share button at the bottom of the Ariyala website and mark it. Pro tip: If you miss 5 - 10 fusions in a row while doing advanced fusion, stop. Change classes and do something else for a while, go to another area and enjoy the game. I usually make a piece and then merge it to avoid the marathon matter explosions that can happen - much nicer that way. But what about Fisher, since they don't have a good second-hand tool. I'm currently using this merger for mining. So I'm using every part of this equipment for fishing and I've added the perception to my rod and the total for the fisherman is now 2182 Gath / 1919 1919 / 858 GP as my miner which is on 2641/2798/823.
