Note This information only refers to the official release on Flash Portal. Doom Triple Pack is a flash game programmed by newgrounds admin mike. This game is a direct port of the classic PC games DOOM, Heretic, and Hexen demo. As mentioned, this is an absolute direct port of the original games. The graphics, the game, the cards and everything else are the same. Even cheat codes for the original game work in this port. This game contains nine medals, a total of 320 points. The game uses the same graphics Charity [edit | edit source] The game was created for donation and raised over a hundred dollars and probably counting for some kind of donation to flash artists or newgrounds store it wasn't quite clear what he was raising money for, but it had worked and even Tom Fulp praised it as a success. Similarities to Doom [edit | edit source] The first was a complete copy of the first Doom, which really rolled in doom fans, while the 2nd and 3rd chapter consists of his own story by Mike. It was would be a high score game or some kind of points system for it as in the actual Doom series. Mike says he hopes to make a game including Doom 4 related stuff in the game. Reception [edit | edit source] The game is very popular at Newgrounds. It has over 1.5 million views, over 24,000 votes, and over 1700 reviews. The game won the Daily Feature and Weekly Users' Choice awards. Play this Flash game Shooters Action Games Community content is available under CC-BY-SA unless otherwise stated.
