Silver angry birds 2 plush

To see photos of Silver, please go to her gallery. Looping legend Silver is a character in the Angry Birds series of games created by Rovio Entertainment. She was introduced in 2015 as a new character for the first official sequel to Angry Birds, Angry Birds 2. After her first appearance in Angry Birds 2, she has since appeared in only one other Angry Birds installment, Angry Birds Transformers and several others. Silver's description of personality from the Angry Birds 2 website: A dazzling young bird with a goofy sense of humor and amazing flying skills. Silver and a description from Angry Birds magazine: Strangely, Silver was raised by pigs and doesn't even care about eggs! But although there are still some pork ways, she is happier with the herd and is a great fable who is very funny! Initially, the silver was a stolen egg from the pigs, who were about to cook until it opened. That's how Silver was born, and the pigs took her as their own. Because of this, Silver has mostly numerous physical and mental traits of pigs, has a very goofy sense of humor and even has the same teeth as pigs. Not much is known about Silver, personally. Silver's involvement in Angry Birds Angry Birds 2 Silver was first introduced in Angry Birds 2, in Level 24 of New Pork City. After his debut, Silver will appear in all the memes after playing. In the new version, it can be unlocked at any time with a key. Silver gameplay is an extremely difficult character to work with. Its ability is very flexible, but it comes at a price. Not only will multiple obstacles prevent it from hitting down (if the player decides to do so), Silver will usually never hit the structure the player wants. It is often for her to miss, hit another block or completely unable to knock the structure down. Moreover, unless the player has a high structure to knock, silver will not do much damage to the level. Silver is also extremely weak. The game points several times as advice that Silver is extremely good at breaking the stone, but this fact falls extremely far from the truth. Silver is able to destroy 1, maybe 2 stone blocks with ease, but then it will simply immediately stop in its tracks. This effect is the same for wood and glass. It is also not preferable to use to take the last pig or get additional points by destroying the structure. She is extremely unreliable in these situations. If there is a little further away from a pig or pig that needs to be hit at a certain angle, Matilda is much easier and more reliable to use. However, Silver is extremely good at causing harm to bosses. If you hit a boss (Chef, Foreman or King Pig) with her using her ability, she will take out quite a lot of the pig's health. Angry Birds Transformers Silver Appears in Angry Birds and is given to his first fellow character along with his first appearance outside of his debut. (Angry Birds 2) At the moment it is the only appearance and character. (along with his first 3D model) Unlike all the other characters, even Bombs and Blues who didn't appear in the game initially, Silver doesn't make any appearances in official comics or animations. This becomes very complicated as the comics start with the birds and pigs that turn into the robots and solve the problem, with all the characters returning to themselves. Silver was not seen anywhere, as it was not even part of Red's flock, so it is not known if it can actually be considered a canon. As described in the game, Windblade and Silver have a lot in common - Windblade was bred on Caminus, not Cybertron and Silver was raised by pigs! Being born in a barn! It certainly beats, turning into a cyber-omelette after all! Although she may be an outsider, she knows which side to fight for and feel free to get stuck in the battle for Piggy Island! I don't want to be at the receiving end of these skills! They say every cloud has a silver lining, and on Piggy Island, that's pretty true! You'll often see Windblade flying through the clouds at supersonic speeds, straight loop-on-cycles and swirls. When he sees some blue sky, sometimes the skyscrapers of the Egbots! Windblade's weapon unleashed a trio of super-unstable energy balls. The unstable nature of the projectiles causes them to push upwards! Windblade has an expert perception of depth and knows exactly how to scroll through these projectiles, so don't worry about hitting what you're aiming for. Gameplay Silver is part of the Valkyris team. When shooting towers, make sure you aim higher than usual. If you aim too low, the projectiles can be thrown to the floor before they reach the target. Add a photo to this angry birds bang gallery! She makes a small appearance with Bubbles at the Royal Marriage Sale a work of art, she wears a bridal veil and has black hair that covers her head, she is seen marrying the orange bird. Angry Birds POP! Silver was first introduced to Angry Birds POP, as a guest character, unlike other games, her ability is not to sway. Gameplay Silver appears in the game as a guest star in events that start on random dates, her ability in the game is to start Star Pop, which makes the star shape explosion. Gallery Add a photo in this gallery Angry Birds POP blast silver was first introduced in Angry Birds POP blast, unlike other games, its ability is to getaded. Add a photo to the angry birds 2 waiting gallery, who is this? And why does she have all these achievement awards? – Silver, Angry Birds film 2 Silver appears in the film Angry Birds 2, where she is Chuck's sister. Appearance Silver there is almost no resemblance to the original Silver, as she sports lighter plumage and hot pink eyebrows. Unusual for any bird, its comb is designed in such a way that it can be tied in two long braids. It is also very tall, with thin, yellow, scaly legs, the length of which is rival only that of Stella. He's got a little beak. The Silver personality is really smart and has won many awards, she is also not so serious about the adventure and loves her brother Chuck. Silver was initially disappointed that no one recognized her achievements, but finally got the opportunity to change that when Red chose to allow her to lead the mission to destroy the Zetas on a super weapon and successfully complete it. Red continues to insist to others that she will be honored for this victory. Unlike the Angry Birds 2 game, Silver has never possessed personal discontent against pigs and has not participated in the Great Egg War despite the initial hunger of pigs for stealing eggs and hostility against birds. So she has no problem welcoming Leonard, the first pig she's ever met in her life. Silver's skills and abilities are very intelligent and he has crafted various inventions, one of which is a supertrux that she can easily use as a grab. She also has some acrobatic skills, and can also use one of her comb-braids as the grab itself. It can also make a huge number of calculations on the go to predict what is happening in very tense, action-packed situations then use them immediately to come up with and take the best possible action. Behind the scenes, Silver is broadcast by crazy ex-girlfriend actress Rachel Bloom. The filmmakers got silver's original look and decided to make drastic, significant changes to their design so that it looked almost completely different because they were aiming for a sweeter look. Initially, she will be a vulnerable character with a more limited role, but has been made very important in the last incision. After finalizing Silver's design, the hero artist Francesca Natal, after deciding to fly with his helmet and tail like helicopter blades, which are eventually scrapped. [2] Its Trivia species is similar to Monday, a bird from the evolution of Angry Birds. In Sambil (Shopping in Caracas, Venezuela), Silver has a poster at Cines Unidos. A sculpture of silver and face can be seen against the backdrop of some levels of Angry Birds POP 2, as part of the monument to a bird pig union formed from the remains of the mighty eagle cave. This and the birds continue their partnership with the pigs in the plot of the game confirms that it is determined after the events of Angry Birds Movie 2. Silver has nothing to do with his original colleague, only the color, does not even use his ability in the film, only makes a back dick that has nothing to do. 360 degrees. Maybe it's another bird, since this Silver has never met a pig. Gallery Add photo in this gallery appearances Silver appeared in the following media: Mobile Trivia Despite being an autobird, Windblade Bird uses Scam Materials for upgrade. Windblade Bird also uses several astromovtan animations in minion-pig-as-jet-jet-jet animations, especially her impatience with anticipation as she waits inside the astrologer for the height of the result. This and the fact that she uses Deceptihog materials for an upgrade may be about the fact that she was raised by the pigs in normal Angry Birds history. Silver is the only character in Red's flock not to have appeared in the original Angry Birds game. She is the only character who is freely used at any time by player selection. Silver has a similar ability for Poppy and Tony. However, Silver makes a 360-degree line before weakening, allowing players more freedom to hit certain structures. There is indeed an official Silver Plush, but it has only been offered in Angry Birds 2 Birdday races and is not for sale in official Angry Birds Merchandise sources. Thus, few actually own the plush. It's nice to maintain them so you can win. Silver along with Matilda, Stella, hal are the only four birds without a space colleague and she, along with Bubbles and Hal, are three birds without oncoming stars, also featured in magazines such as Handout.
