In fact, it may be fun to explore certain biomes such as the Everglades, then as a class, using that exploration to create that biome definition. Do more research on that biome to see how the definition of your class holds under scrutiny. We have also included the International Space Station! Challenge your students to find out why. The Everglades Long Island Beach Research and Education Association, Inc. Animal Slideshow Explorer of the Great Coral Reef International Space Station MOTHER'S SITE Many of the sites used in this article come from these mother sites. You may want to click through it carefully, since most offer more information than we have shared with you here. MBGnet Student Biome Project OTHER INTERESTING SITES As we examined this article, we came across many websites that might be useful in your classroom review in the world.
