How to use an enchanted book in minecraft xbox one

The Enchanted Book is a subject that allows players to add enchantment to certain items using an annulment. Retrieved 2014-05-27. The book has the equivalent of a 30th level of enchantment from the magic table, but the available enchantment of treasures and the chance of multiple enchantments does not diminish. Trading[edit] in bedrock edition, librarians have a 50% chance of selling enchanted books as part of their trades at the level of newcomers, apprentices and travelers, and have a 1 3 chance of selling enchanted books at an expert level as part of their bidding, meaning each librarian farmer can sell up to four books. They are bought for 1 book and 5-64 emeralds, based only on the level of enchantment (for example, Infinity and Protection I both cost 5-19 emeralds), although treasures (eg Mending) double the cost. In the Java Edition, librarians of peasants have a 2♥3 chance to sell enchanted books as part of their trades at the level of beginner, pupil and traveler, and have a 50% chance of selling the enchanted book at an expert level, meaning each librarian can sell up to four books. They are bought for 1 book and 5-64 emeralds, based only on the level of enchantment (for example, Infinity and Protection I both cost 5-19 emeralds), although treasures (eg Mending) double the cost. They can contain any available charm (other than Soul Speed) at any available level. See trade for more information on enchantment and prices. The drops[edit] Vindicators and pills that spawn from raids have a slight chance of dropping the enchanted book with a 30th level of fascination, which may be enchanting treasures. [Bedrock's only edition] is a charming enchanted book with a few enchanting high levels. An enchanted book with a few enchantments that can be applied to a single paragraph. Players can create an enchanted book by enchanting a book on a magic table. Books have a

reduced chance of getting a few enchantments (in particular, if a few enchantments are added, then one is removed at random), and have a lower level of charm than most other items. Treasures such as Mending cannot be retrieved from a magic table. Bartering players can barter with piglets using or throwing gold bars, and this has a **1▼417** chance for piglets to give the player an enchanted book with any level of Soul Speed. Soul Speed's enchanted books can only be obtained by bartering looted inside the remnant of bastion, fishing and raid looted. [Bedrock edition only] They cannot be obtained through enchanting or trading. Use[edit] get some enchantment on certain tools, such as Unbreaking on shields. Enchanted books have a brilliant effect on their sprite. To use the enchanted book, the player must place the element in the first slot in the an anadil and book in the next one. In order to complete the enchantment, the player must have the necessary amount of experience. Please note that using the Enchanted Book receives significant discounts on anvil. The enchanted books themselves can be combined to create a single book with enlarged or multiple enchantments similar to a combination of tools or weapons. When combining items compatible enchantments from the book in the second slot are transferred to the cutout from the first slot, maintaining the highest level of any type. If the two enchantments have the same level and a higher level is available, they are combined into the next level. If a workbook is applied to an item that cannot accept all of its spells, the corresponding spells are passed, while unusable. Enchanted books are disposable. Enchanted books do not show their fascination. For example, a book with Sharpness IV as a fascination does no more harm than not an enchanted book, or any non-weapon subject when used as a weapon. The exception is the book Fire Aspect, which can ignite TNT and light bonfires. [Bedrock edition only] Available items can fascinate the usual items which can be charmed at the magic table, but unlike the magic table, they are able to enhance enchantments such as Sharpness or Thorns to maximum power, and can apply the following enchantments to subjects (the table displays only intolerant instruments and armor, but any type can be fascinated): Creative mode[edit] The player can charm any subject with any fascination in creative mode. that allows any applied effects to demonstrate themselves. [Java Edition only] For example, a stick can be fascinated by Silk Touch to allow the player to successfully dig grass blocks. The enchanted object can still be used in survival mode without losing charms. Enchantments that are usually incompatible are still incompatible; for example, Piercing and Multishoot cannot be applied to a single element, even in creative mode. If the block is fascinated, it loses fascination after being placed in peace.
