I don't mean rat testing or anything. I mean really cool experiments. For example right now I'm experimenting to see if carrots can charge batteries. I've had other experiments that have lasted longer. My experiment to see if raisins make the speakers on my radio louder has been going on for over a year now. There are so many more ideas that I want to experiment with - making fireproof doors, testing to see what a rainbow is made of, trying to see if I can teach rats to read. If my brain was made of trees, it would be a forest of ideas. Science is radical! My hero, my friend Randy, is my hero. He's won a lot of awards, ribbons and trophies. But he doesn't care about all this. He does what he does to help others. Here are some of the things he's done that make him such a nice guy. First of all, he's married and is a fantastic father. He has been a teacher for 15 years and has won teacher a year three times! He volunteered to read to students for after-school programs and pick up garbage on the side of the road on weekends. Randy puts his heart and strength into everything he does. He is a true role model and I will try to follow the example he sets. Pirate Fanatic My sister is a friend who thinks she's a pirate. He wears a red bandana on his head, he has a pet parrot, which he holds on his shoulder, and walks around saying, Arrr matey. As if it weren't strange enough, she also has a really large collection of earrings. Not regular earrings, either, weird. She's got earrings that look like rocks, wrenches, raccoons, cameras, a walrus and even a pair that look like rakes. I understand that some pirates wear earrings, but I thought they were scarier like hooks, circles or daggers. I feel like I should tell my sister's friend to find out what type of earrings it wears. Without the right course of action, a person who tries out like a pirate just look strange. If he ever met a real pirate, the pirator would probably make fun of him about what he looked like.
