Watch out: You can successfully find parts, manuals, wiring diagrams from Sears (left), Singer or other HVAC device brands by searching to do with the original company, name or brand. It is worth calling to make sure that part of the number or manual ordering is really the devices you repair or maintain. And as we just noted above, usually you get the information you need from the manufacturer for free. If your HVAC devices are older and are one of the brands whose name has a complex history, and if you can set the year of manufacture of your device it will help you track which company is most likely to currently stock parts or manuals for this product. To determine the age of the heater, boilers, furnaces.
