If there were no mountain lions in this food net, which first-order consumers would likely shrink the size of the population? Place the expressions in the appropriate section of the table below. Use this for all biomes you run into. How much snow/rain does Biome receive each year? Draw an ecosystem that includes at least 5 groups of animals, 3 groups of plant species. Around the population. Name five types of plant populations that live in the biom. The food chain shows how energy is transferred from one organism to another. Food usually starts with the primary natural energy source like the sun. Energy arrows are used in food webs to show the flow of energy from the body that is consumed by the consumer that eats it. Draw energy arrows to show the flow of energy in this environment. Name the animals that exist at the top of the food chain. List the classification of each organisation in the table on the basis of the following food net. A super fun ecosystem project for you and your students. You're going to have to cut everything out. You might need a sharp pair of scissors for this job. Yup more to cut out. Finally, the big dogs (in this case bears) make their way here. The last material in the project. Place the appropriate label next to each image. Word Bank: Population, ecosystem, organization, community place the right letter next to each vocabulary clue.
