## Stryker neptune service manual

TruRize® Chair2 Pages Click below to be directed to our service form request to begin the process of repairing Neptune! With the release of Stryker's Neptune 3 waste management system, Stryker is gradually abandoning its Neptune 2 waste management options in an attempt to force Neptune 3 to sell the rover. This news may make you wonder, What are my options for repairing or maintaining the Stryker Neptune 2 rover and docking station?. That's a big question! Here at Didage, we provide preventive maintenance contracts and repair services for Neptune 2 and 3 Waste Management Systems. In this article, we will discuss the recommended Neptune 2 PM (preventive maintenance) cycles, your repair options, and the details of our preventive maintenance contracts. Our PM and Repair services will allow you to upgrade to Neptune 3 in due course and maximize your Neptune 2 investment. First, let's discuss Stryker's recommended preventive maintenance cycles for the Neptune 2 Rover and Docking Station. Proper maintenance of the rover requires PM every six (6) months; But why does it matter? The maintenance of your rover is vital for continued use, patient safety, and as an added bonus can reduce overall operating costs. Just like a car or your home, proper maintenance can keep your rover running smoothly. It can also catch any small problems before they become overwhelmingly costly or irreparable. We are here to ensure that your rover continues to operate in OEM specifications. The maintenance of the rovers is not only responsible, but also improves the quality of service and safety of your patients. Choosing to bypass preventive care can void your warranty on the Neptune 2 Rover and dock. So, it's always a good idea to stay up to date with your service. To read Stryker's manual of operations and maintenance, click below. The PM contract gives you the right to repair.

Once signed, we will help your facility if there are any problems with the repair. Signing up for repairs and PM contract is easy to do, just fill out a request for a service form and specify the Neptune PM and repair combo in the comments section. Please include as many details as possible in the comments section when filling out a service form request. Detailed information allows us to service your facility in a timely manner. Repair exchanges are available for Rovers, which are considered irreparable. One of our technicians will be scheduled to visit your facility to assess the repair. During the evaluation, if our technologists detect that repairs are necessary, they will do everything possible to rover in place during the same trip. All repairs are subject to time, travel and materials. If your other units are to be submitted for the PM cycle, we will group the repairs and PM as part of the same meeting. Filling in the repairs and PM PM We will be able to withdraw travel costs from this trip for your facility. At this point you may be wondering what our Prime Minister is going to include. Your Neptune rovers will be serviced and serviced every six months, which can help mitigate problems before they occur. We offer contracts for both Neptune 2 and Neptune 3 rover. Leading TimesThere is a 30-60 day lead time for all PM due to high demand. This time time allows us proper planning for your facility and all travel arrangements for our technician. Assigning Times For your convenience, we travel to the place of equipment to perform PM. Each block will be serviced during one trip to the facility. Our team will remain until each rover and docking station is completed. Weekend intervals are ideal for maintenance as this reduces the likelihood of using the rover; But, our technician will work with you and your schedule if weekends are unavailable. Parts are checked and replaced during your destination During maintenance appointment, our technology will pass through your rover and check seals, O-rings, filters, and replace if necessary. An electrical safety check will be carried out, as well as an operational test to ensure that all components work in accordance with OEM standards. Other items that need to be checked and replaced if necessary are:-off-load impeller-end Caps-Exhaust filter Replacement-replacement filter HEPA and reset clock. Pricing:Rover preventive price maintenance includes all maintenance, replacement parts, and travel. If other services are required or travel time for a long time, we will work with you to avoid any additional costs. Preventive maintenance will reduce downtime and increase your revenue. It is important to note that all the repairs required for the rover or docking station are quoted and you are exhibited separately from the PM. Hopefully by this point you'll have a clearer understanding of what our PM contracts include. Our goal is to provide a cost-effective solution that allows you to either upgrade on your own time or keep your rovers running for years to come. If you have any further questions, send us an email or call us. One of our representatives can help you. To get a preventative service quote for your Neptune 2, click below or call us today. For more information on why we can help your business save money, read our previous Neptune 2 article about ending Stryker service. EGR quote Lee UHS continues to serve these units as supplier's side? Yes, there is. If your units are still under warranty, you will still have to contact Stryker to get repairs sent. If not, you can contact your local UHS area for help. As commented in my above post, Stryker will not sell kits and or parts of UHS or any other ISO, you will have to order them. UHS can come out, troubleshooting, let you know what you need to order and return to install the details. This is assuming that your local UHS office has trained Neptune technologies. Waste Management Trainingand Support We believe that education and learning are just as important as the products you use. That's why our Neptune waste management system provides intuitive instructions, support materials, and resources to successfully guide any user. Start with your training now. © 2001-2020 PartsSource, IncTerms and TermsThers Policy
