Net worth is a measure of wealth. Net worth is the sum of all assets held by an individual or company, minus bonds or liabilities. Deeper definitionThere are slightly different methods for calculating an individual's net worth and the net worth of a business. Both figures are the total of all assets minus all liabilities. For the calculation of individual net worth, the value of the assets is based on their present market value rather than on the original purchase prices. For the net worth of the business, the value of the assets is based on their original purchase price instead of their current market value. When a person dies, their net worth is equivalent to the value of their estate. In probate, all liabilities of the deceased are respected, and the rest belongs to the heirs. Any inheritance then becomes a part of the heir's net worth. For businesses, the value of an asset is called its book value or open market value. This is understood as the price an asset would have in a competitive auction. Other concepts used interchangeably with book value are market value, fair value and fair market value, although they may have different meanings depending on the context. Negative net worth occurs when the liabilities of a company or individual exceed the assets held. This happens in one of two ways: either the liability increases over time debt, i.e. the assets held decrease in value. Check out our loan repayment calculator to help you determine your net worth. An example ofkeep net worth in mind that net worth is just a snapshot of the wealth that a person or business holds at a single point in time. Perhaps more important is whether wealth is increasing or decreasing. Student loan debt and mortgage debt decrease as people age, repay loans and get more equity in their homes. Businesses are required to their net worth on a regular basis, according to accounting standards, and this amount can vary considerably depending on seasonality, market cycles and a host of other factors. This may be the case for some people with James Marsden, an accomplished film and television star who has acted for nearly 25 years, gaining a lot of recognition over the past 10 years. Here's what you need to know about Marsden, its best roles and its current net worth. Marsden's early work Like many young actors, Marsden began appearing on various television series such as The Nanny, Saved By the Bell: The New Class, and Party of Five, as well as several TV movies. His role on television in small bursts was on the last season of the hit legal drama Ally McBeal. Soon after, he landed his biggest role to date as Scott Summers (Cyclope) in the X-Men franchise. The roles in The Notebook, Hairspray and 27 Dresses propelled him to fame with a hint of variety, showing his ability to play a moron, romantic lead, and vocal styles. More Recent Roles The 2010s brought much more success to Marsden. He had a recurring role on the hit NBC comedy 30 Rock opposite Tina Fey, while continuing to appear in the X-Men films, comedies like Bachelorette, and even taking more dramatic roles such as the portrait of John F. Kennedy in The Butler. Although he continues to act in films like the upcoming comedy Quentin Tarantino Once Upon a Time in Hollywood, Marsden has also returned to his television roots. He had a starring role on the first two seasons of Westworld and recently starred in the first seasons of the Netflix series Dead to Me. Marsden future roles There is much to come for this actor. Right now, he's doing press for the much-discussed upcoming comedy Sonic the Hedgehog, which he plays opposite Jim Carrey and Ben Schwarz (expressing the character in the video game). Marsden plays a cop who assists Sonic. The actor is also set to appear in the upcoming fx drama America alongside Sarah Paulson and Cate Blanchett. In addition, there have been rumours of an enchanted, thought to be titled Disenchanted, which would probably bring Back Marsden. Her personal life Marsden married just as her career was taking off. He married Lisa Linde, daughter of songwriter Dennis Linde. Together they had two children: Jack, who turned 18 year, and a daughter, Mary, who will turn 14 this summer, according to her Instagram. After his divorce in 2011, Marsden had another child, William Luca, with his then girlfriend Rose Costa. Currently, Marsden is dating British singer-songwriter Edei, as seen above. They've been together since at least 2016. What is Marsden's net worth? James Marsden John Lamparski/WireImage Marsden has remained busy over the years — however, he has generally shared the spotlight on big-budget movies with much higher revenues than he does. That may be why the net worth is less than \$10 million. Celebrity Net Worth puts Marsden's value at about \$8 million, while other sites like The Richest believe it may be closer to \$4 million. In any case, his career is clearly flourishing, so we doubt that this will only increase in the years to come. Check out the cheat sheet on Facebook!
