What kind of dinosaur is littlefoot from land before time

Share Littlefoot is a character in the Land Before Time film series. He is an Apatosaurus, but is referred to in the movies as A Longneck. Littlefoot is the central character of The Land Before Time and its sequels. The serious, honest and enthusiastic Littlefoot leads his friends into new adventures, overcomes obstacles and learns important lessons about friendship and teamwork. He is close friends with six other young prehistoric animals (Cera the Triceratops, Ducky the Parasaurolophus, Petrie the Pteranodon, Spike the Stegosaurus, Chomper, the friendly Tyrannosaurus and Ruby the Oviraptor), all of which are a different kind of prehistoric creature. He also makes other friends during his adventures. Littlefoot's friends outside his species are taboo, as many of the dinosaurs practice racial or species-based segregation based on the days of racism in America, with the concept of the Threehorns never playing with longnecks (based on a now-defunct proverb in the US and now considered racist and offensive in today's decade: Coloreds never played with white people). His grandparents accept his friendships, other dinosaurs like Topsy (Cera's father) do not. His father is a longneck named Bron and has a rowing stepbrother named Shorty. He is the greatest of all the main characters of Land Before Time. Characterization Personality Littlefoot is a humble, intelligent, playful longneck who, despite his traumatic upbringing, believes that friendship goes beyond species boundaries. He's good at making friends, but his clique is with his six best friends, Cera, Ducky, Petrie, Spike, Chomper and Ruby, who are collectively calling the prehistoric pals by fans. Although these are his closest friends, all living together in the Great Valley, he has friends in many other places, including Ali, Mo, Doc and many others. Together with his friends, he undertakes many adventures together. Littlefoot tends to be ethical, mature, caring and protective for all his friends, believing that there is in every good. He cares a lot for his friends and acts both as their leader and as the voice of leadership among them. He has a particularly strong relationship with Chomper, supports him in everything he does, and forms an almost fraternal relationship between the two. In the TV series, Littlefoot is most often seen singing Adventuring, which shows his love of going on adventures with his friends. Family In the original film, viewers are introduced to Littlefoot, his mother and his grandparents. His father has not yet been seen. His mother dedicated himself to her only son and defended him at all costs. She even gives up her life to fight the sharp tooth to save Littlefoot and his then acquaintance; later e-friend, Cera. After her death, her spirit stays with him, and her voice is often heard above him and told him continue; she would always be with him. When he finally decides towards the end of the film that he cannot continue, she takes on cloud form and blows onto the other side of a rocky tunnel. When he reaches the opposite opening, he finds the Great Valley directly below him. Then he is reunited with his grandparents. Littlefoot finds tree stars, his favorite food, symbolically with his mother, because a tree star was the last gift she gave him before she died. Littlefoot's grandparents have appeared in all movies and TV series. Littlefoot's father Bron was finally seen in the tenth film, and from then on the main storyline focuses on Littlefoot adapting to the fact that he finally met his father. Bron comments in this film that he was nicknamed Littlefoot when he was young. Littlefoot says in the country Before Time IX: Journey to Big Water that he wants a brother. In fact, he might have had one or more siblings, as can be seen in the original film, that there were several eggs in the nest of the long neck. All but the one containing Littlefoot, however, were broken. Later in the ninth film, he and his new friend Mo, the Ophthalmosaurus, make a mud-brother pact. In the tenth film, a young Brachiosaurus named Shorty is introduced together with Bron. Although he harasses Littlefoot out of jealousy, since Littlefoot now has all bron's attention, Littlefoot tries to be his friend, even suggesting that they pretend to be brothers. At the end of the film, Littlefoot asks Bron to adopt Shorty, which he does. Notes Although Littlefoot and Cera are best friends, they are opposites in many ways, and the two are constantly fighting. In rare cases, this sometimes even leads to physical altercations, the most famous being when Littlefoot fought Cera in the first film for insulting his mother. He looks at Doc, a lonely longneck with infamous Sharptooth combat skills. When Littlefoot hears Docs Opinion talk about his friends with Chomper in the episode The Lone Dinosaur Returns, his admiration is greatly shaken. However, his respect in Doc is restored at the end of the episode, when Doc apologizes to Chomper. Despite the fact that Chomper is the same type of sharp tooth that killed his mother, he has no problem being his friend. His nickname from the series is Lovable Littlefoot. Littlefoot was mistakenly referred to as Brachiosaurus on the original video cover for the first film. He was also named as Brachiosaurus on Rotten Tomatoes Trivia in the original film (1988 version) Littlefoot was created by the animator Dan Kuenster together with the animators Colm Duggan, Ken Duncan, Jean Morel and Ralf Palmer Quotes Hey, Chomper, come back! Animated. (screaming) Take it back! (to Petrie) Well, you can't! Not! my tree star is torn! That's Chomper, remember? We saved him from egg eaters, we hatched him, we are like his family, he would never hurt us. (fearful to Bron) Where were you all the time? I wish my mother had given me a brother, then I would always have someone to have fun with. Where will I ever find friends like you? External links Littlefoot at LandBeforeTime Wiki Community content is available under CC-BY-SA unless otherwise stated. In: Fictional Dinosaurs, The Land Before Time characters Share Littlefoot (aka Loveable Littlefoot, as it is called on the official Land Before Time website and by fans), spoken by Gabriel Damon, Scott McAfee, Brandon LaCroix, Thomas Dekker, Alec Medlock, Aaron Spann, Nick Price and Cody Arens, is a character in the Land Before Time film and television series. He is an anthropomorphic apatosaurus,[1] (informally called Brontosaurus), who is one of many creatures called longnecks by the franchise's characters. He is the main protagonist of the series, though not always the biggest role, followed by Cera the Triceratops, Ducky the Saurolophus, Petrie the Pteranodon, Spike the Stegosaurus, Chomper the Tyrannosaurus and Ruby the Oviraptor. Because of his ability to befriend others, he is also friends with many other creatures, although his friendships with dinosaurs and other animals outside his species are often considered taboo, as many of the dinosaurs practice racial or species-based segregation based on the days of racism in America. The character was well received by critics and became a fan favorite and was widely featured in The Land Before Time-related merchandise articles, along with frequent media mentions. Personality Oh, you can't stop now. What if the Great Valley is just above the top of these rocks? — Littlefoot, pushes the other main characters (The Land Before Time) File:Image: Sequel Littlefoot.jpg screenshot of Littlefoot that reflects his penchant for adventure. Littlefoot is humble, intelligent, playful, adventurous and positive. As an expression of his love of adventure, he is most often seen singing the song Adventuring in the TV series. Towards his family and friends, he tends to be very ethical, mature, caring and protective. He acts as the leader of the other main characters; in difficult times (especially in the original The Land Before Time) and their voice of reason. He usually tries to break all fights or disputes between the others, although he tends to be caught in the heat himself sometimes. In general, when it is attacked by predators or of another dangerous time, even if the adults tell Littlefoot and the other children to run to safety, he prevents the others from leaving the country and asks them to how they can. Relationships Family Although Littlefoot is biologically an only child, his mother had laid three other eggs, but they were inexplicably broken when he hatched. Littlefoot explained in The Land Before Time IX: Journey to Big Water that he longed for a brother. Later in the film, he met a friendly and playful ophthalmosaurus named Mo, with whom he made a mud-brother pact. In the tenth film The Land Before Time X: The Great Longneck Migration, Littlefoot and his father met a young Brachiosaurus boy named Shorty, who was slightly older than him. Although Shorty initially harassed Littlefoot and later annoyed him that he attracted Bron's attention, Littlefoot tried to befriend him, even suggesting that they acted as brothers for each other. This Great Valley oncept mitigated Shorty's behavior toward Littlefoot, who later asked his father to formally adopt Shorty. File:Littlefoot hatched.jpg newborn Littlefoot, who is familiar with his mother. Littlefoot's mother dedicated herself to her only son and defended him at all costs. She taught him the ways of the different species, and that they generally avoid each other, although when he questioned the reasons for this, she could only say that things had always been so. She showed him his first tree star and told him about the Great Valley, which she described as a lush paradise with more green food than you could ever eat, and more fresh, cool water than you could ever drink. She told him the instructions to get into the valley in case he ever had to remember her. Eventually, she gave up her life and tried to protect her son from the Sharptooth, but her mind stayed behind to watch over his dangerous trek over Littlefoot. She intervened every now and then when he felt unmotivated to carry on, and at the end of the film she appeared in cloud form over her head and led him a few steps further, whereupon she distanced herself and revealed the Great Valley. File:250px Sleeping Baby Littlefoot.png Baby Littlefoot, rolled up and sleeping, cuddled in the folds of his mother's back. Littlefoot finds his favorite food, Treestars, symbolically with his mother, because his first tree star was the last gift she gave him in life. He tried to hold on to the tree star for as long as he could, and became angry with Petrie when he started playing around with it. When the Sharptooth snapped at the gang one morning, Littlefoot didn't have time to grab him before running. The tree star was then crushed under the foot of the Sharptooth. File:Land-before-time-disneyscreencaps.com-2406.jpg 280px He finally met his father Bron in the tenth film, and The main plot was that Littlefoot adapted to having a father in his life. Littlefoot was initially shocked, hurt and confused when he found out who Bron was and ran away. When Bron found him, he comforted him and explained his Absence; he wanted to find a safe place to educate Littlefoot, but when he returned, the earthquake had struck, and he was unable to find his family. He then randomly attracted a huge amount of longnecks, young and old, and became the leader of a huge herd. He never stopped, File:Littlefoot and Treestar.jpg Littlefoot, who wore the tree star from his mother on his back, to find out what became of his only son, apparently asked an old dinosaur if he had seen it, although the dinosaur could only say that Bron's wife had been killed by the Sharptooth. Littlefoot and his father began to approach, and Littlefoot was confronted with the tough decision to stay with his father in the scratched valley where his flock lived, or to return to the Great Valley with his grandparents. He eventually decided that he wanted to return to them because his grandparents needed him and he was already established there, but he wanted to stay in touch with Bron as much as possible, which Bron agreed. In the TV episode The Big Longneck Test, Littlefoot visits File:Apatasaurus Trio 2.jpg father. d of Bron and Shorty, during this time Bron Littlefoot puts on the Big Longneck Test; a test to see if a youthful longneck has the mentality to lead a herd. Bron mentions that he has visited Littlefoot before. Bron reveals in The Land Before Time X: The Great Longneck Migration that Littlefoot's name comes from a nickname he had as a child. Littlefoot's grandparents have appeared in all movies and TV series. Littlefoot has a strong bond with his grandfather and generally sees him as an idol. In The Land Before Time IV: Journey through the Mists, it is revealed that Littlefoot has cousins, a wandering herd of longnecks led by an older matriarch called the Old. It is suggested that they are related to Grandma Longneck's side. Until the herd of tribes came with an unrelated one, the only child in the longneck herd was a young female named Ali, with whom Littlefoot quickly befriendd. Family members: Friends Other main characters Although Littlefoot and Cera are best friends, they are in many ways opposites and argue very often. In rare cases, this even leads to physical confrontations between the two, as in Template:Film. When Cera insults Littlefoot's mother and calls her a stupid longneck, Littlefoot orders her to take her back, and when she refuses, he rushes into her and they start fighting. Another example is in Template:Film, after Chomper, instinctively, bites Cera, she automatically becomes angry with him, in which Littlefoot declares that he didn't mean it. This leads to Dispute between him and Cera over whether Chomper is her boyfriend or not. A third instance is in Template:Film after Topps and Grandpa Longneck begin to argue in which direction they move their migration to a Land exhorts Littlefoot Topps to speak authoritarianly to his grandfather, whereupon Cera hits him in the head. Each of them starts beating back and forth until Ducky, Petrie and Spike break them up. Later in the film, when the gang reunites with Chomper, Littlefoot and Cera again argue about whether Chomper is their friend or not, because Cera's resentment against him is a sharp tooth. This time, however, this does not lead to a physical confrontation between the two. Because Cera is very straightforward in her beliefs, she is often annoyed by Littlefoot's open-mindedness, and Littlefoot, in turn, is frustrated by the inability to convince Cera. One example is Template:Film, when Cera, along with most of the inhabitants of the Great Valley, openly expresses skepticism about Littlefoot's sighting of the stone of the cold fire, and Littlefoot longs for a way to convince her. In Template: Film, when Littlefoot tries to introduce the other Mo, who is submerged during this time, Cera Littlefoot taunts; that he probably invented the creature. Another example is the TV series episode Through the Eyes of a Spiketail: As the gang searches for the hard water sweets (frozen grapes), Cera begins to doubt whether there is such a thing, while Littlefoot remains confident that they are actually real. This leads them to argue again several times, to the disappointment of others. Littlefoot's friendship with Ducky is better than his friendship with Cera. In The Land Before Time, Ducky immediately gets along with Littlefoot and accepts his invitation to accompany him on his way to the Great Valley. As one night, the characters except Littlefoot go to sleep with Cera, they believe brave enough to treat the Sharptooth in case he attacks, Ducky is the first to realize that Littlefoot is lonely, and goes back to sleep with him; followed by the other three. In Template: Film, when Petrie and Ducky regret the harsh accusations they threw at Littlefoot when they learned that he had framed the Tinysaurus, they all mention that they consider themselves Littlefoot's best friends. File:Littlefoot&Chomper.jpg Littlefoot, befriends Baby Chomper after realizing he is not yet a threat. In Template:Film. Littlefoot's friendships with Spike and Ruby are also very smooth. He has no problem being Chomper's friend, although Chomper is the same Sharptooth type as the one who killed his mother. Littlefoot is the first to realize that Chomper isn't dangerous as a baby and needs to be looked after in Template:Film and is the only member of the gang, apart from Ruby, who has always trusted Chomper. The two have an almost fraternal bond, with Chomper supports in almost everything he does. Other Since Littlefoot is the leader of the main characters, he is usually the one who most with adults other than those in their family, often when they ask for help during their adventures. He befriends Archie the Archelon in Template:Film after asking him for help getting out of the cave because a rockfall caused by an earthquake has trapped him. Archie later protects Littlefoot when Ichy and Dil, a sharp-beaked and belly-puller, attack them with the intention of consuming them. In Template:Film, Littlefoot befriends the rainbow faces that help him see an object they call a stone of cold fire. At the end of the film, the male Rainbow Face tells Littlefoot that they find him very intelligent and astute for one of his species, after which the female addresses him and he recites his statement and calls Littlefoot intelligent for his age. Littlefoot is the only one who finds out that they are not normal rainbow faces, but possibly aliens studying the dinosaurs disguised. In Template:Film, Littlefoot idolizes Doc, the lonely dinosaur, for his bravery and skill in fighting Sharpteeth. But in The Lone Dinosaur Returns, when Doc speaks sharply about Chomper, despite Chomper's promises that he's good, Littlefoot's admiration is greatly shaken in him. At the end of the episode, when Doc apologizes to Chomper, Littlefoot apologizes. Littlefoot, although initially afraid of them, befriends the tiny longnecks in Template:Film after meeting and meeting them in their underground home. Especially close to Skitter, with whom he makes the most contact throughout the film. Character Development File:Littlefoot Evolution.png The franchise has gradually changed Littlefoot's appearance through movies and video games to TV series. File:Littlefoot Baby Character Leaf.jpg Character Sheet for Baby Littlefoot, A.K.A. Thunderfoot. Littlefoot was originally supposed to be called Thunderfoot until it turned out that there was a Triceratops in a children's book that already had that name. [2] His name was Thunderfoot throughout the production, but changed only after the film's release, which surprised the people who worked on it. [3] Littlefoot's voice was voiced by Gabriel Damon in the original 1988 The Land Before Time. From 1994 to 1996 he was spoken in the movies Template:Film, Film:Film, and Template:Film by Scott McAfee, the brother of Anndi McAfee, who spoke the main character Cera of Template:Film (1997) about the present. For the same film Littlefoot was spoken by Brandon LaCroix for his speaking voice and by Thomas Dekker as his vocal voice. Dekker then spoke to Littlefoot for singing and speaking for the Movies. After Template:Film, Dekwer's last appearance as Littlefoot, the character was sung by Alec Medlock in Template:Film (2003), Aaron Spann in Template:Film (2005) and Nick Price in Template:Film. Sung. Littlefoot's current voice actor is Cody Arens, who spoke to him in the TV series and in Template:Film (2007). In the Japanese-language dubbing of the first to the twelfth film, Littlefoot is spoken by Minami Takayama. In the Japanese version of the TV series he is spoken by Etsuko Kozakura. In the Swedish version of the original film he is spoken by Samuel Elers-Svensson. In the Italian dubs of the series he was sung by Rossella Acerbo, Sonia Mazzi and Patrizia Mottola. In video games, Littlefoot, along with the other characters (except Spike), is the voice of Lani Minella. Reception analysis Wendy Miller of the Mohave Daily Miner has called Littlefoot a lovely character. [4] Michael Scheinfeld called the character endearing on DisneyFamily.com, while Variety.com critic Joe Leydon called him a scrappy. [6] Washington Post critic Hal Hinson expressed confusion about his name, citing that his feet appeared normal. [7] Mark R. Leeper (rec.art.s.movies.reviews) considered the character to be underdeveloped; his abrupt capitulation to hardship at the end of the film, while he endured it throughout the story before, as a possible but unlikely behavior. [8] Roger Ebert looked at the plot in which the character - a baby animal separated from his family and undergoing a dangerous quest to be reunited with them - was recycled from many other films of the animated adventure genre, pointing in particular to the similarities of The Land Before Time and Don Bluth's earlier film An American Tail. [9] Ian Wojcik-Andrews, author of Children's Films: History, Idealogy, Pedagogy, Theory, compared the entire film to a depiction of Calvinist theology that explains that souls can only be saved if they resist temptation and follow Christ. He compared Littlefoot to the savior: That Littlefoot's position as the last of his flock and their only hope for future generations implied that he was meant to be the chosen one. [10] Bonnie Sayers on Epinion.com thought that one of the best parts of the fourth Land Before Time film, The Land Before Time IV: Journey through the Mists, was focused on Littlefoot's love for his grandfather. [11] Praise Hymns Template:See also File:Thomas Dekker.JPG Thomas Dekker, former spokesman for the Land Before Time character Littlefoot, has received several nominations for the role, including a successful Young Artist Award nomination in 2003. Thomas Dekker received a Video Premiere Award nomination for Best Animated Character Performance in 2001 for the role of Littlefoot in The Land Before Time VII: The Stone of Cold Fire. The nomination was shared with animator Zeon Davush and with Davush and the voice actor Michael York around the figure of Pterano. Both nominations went to actor Mark Hamill and and The designer Bruce W. Timm, for The Joker in Batman Beyond: Return of the Joker. In 2003, he won the Young Artist Award for Best Role in a Voice-Over Role, for the role in The Land Before Time IX: Journey to Big Water. In the same year he received a DVD exclusive award nomination for best original song, for his performances as Littlefoot during the song Imaginary Friend, along with Aria Noelle Curzon as Ducky, Anndi McAfee as Cera and Jeff Bennett as Petrie. The nomination was also shared with songwriters Michele Brouman and Amanda McBroom. In the end, the award went to Jennifer Love Hewitt and Chris Canute in Disney's The Hunchback of Notre Dame II for the song I'm Going to Love You. [14] Cultural Influence File:Lovable Littlefoot.jpg Littlefoots logo on the official website, with its nickname real. As a central figure in the franchise, Littlefoot has become an icon widely associated with The Land Before Time. On the official website, the character is nicknamed Lovable Littlefoot. It is also referred to by fans of the series as this.[15] Merchandise The character is presented in a large amount of merchandise based on the Land Before Time franchise. To promote the original 1988 film, Sullivan/Bluth Studios teamed up with Pizza Hut to release hand puppets of the characters. For nearly a year, Littlefoot and the other characters were joined by icons with the restaurant's children's menus and a theme for birthday parties in the restaurants until Teenage Mutant Ninja Turtles replaced them. [16] Universal Studios connected with the U.S. Postal Office and issued stamps with dinosaur types, as seen in the film. T-shirts with the stamps and the littlefoot figure were also on display. [16] Together with this, Amblin Entertainment spelled out a paperback in November 1988 entitled Littlefoot's Adventures: An Activity Book (ISBN 0-448-09354-5 /ISBN 978-0-448-09354-3), edited by Grosset and Dunlap. In July of the following year, another book, written by Jim Razzi and published by fantail, was published; With the title Littlefoot's Adventures: Land Before Time Activity Book 1 (ISBN 0-14-090105-1 /ISBN 978-0-14-090105-4). [17] Stu Krieger, an author of the original film, wrote a 1998 children's education book called Counting with Littlefoot. [18] Many toys were released with the character, including plush dolls.[19][20][21][22] hats, statuettes[23]

and action figures. [25] [25] In addition, a game called The Land Before Time Littlefoot Make a Match Game was released, in which players select any two cards from a collection of cards with LBT characters and keep them if they match. The main goal of the game is to with Littlefoot on them, after which the player who did this gets a figure in the form of Littlefoot. Since there several with the character, the character moves from player to player during the game. [27] Fanfiction In many fanwork, characters fall in love with each other, and when the story focuses on their adult years, they often get married. [28] [29] [30] [31] [32] [33] Some fans argue that this issue promotes incest.[34] because they are cousins, though apparently not first cousins. Some fans have written fan fictions in which Littlefoot and Cera get into a relationship that often develops into a conflict with his relationship with Ali. [35] [36] References in the media Littlefoot and Cera are mentioned in Robert Keith Sawyer's Pretend Play as Improvisation: Conversation in the Preschool Classroom. [37] Another book on the social behavior of toddlers, Early Years Education: Major Themes in Education (by Rod Parker-Rees and Jenny Willan), refers to the Country Before Time character Littlefoot, along with his mother Cera and the original Sharptooth. [38] Littlefoot, Cera and Ducky are mentioned in the 1993 book Children's Voices: Children Talk about Literacy by Sally Hudson-Ross and Mara Casey. [39] Littlefoot and the other characters appeared in the Easter Egg Roll at the White House in 1997. [40] The original main characters (Littlefoot, Cera, Ducky, Petrie and Spike) are fully referenced in question 43 of Test 6: Animation in Test-Prep Your IQ with the Essentials of Film, which concerns which character is not a dinosaur. [41] They are mentioned again in the Throwback Trivia in The Good Book for Great Times by Connor Pritchard and Dominic Russo. [42] Littlefoot is referenced on page 150 by Category Neutrality: A Type-Logical Investigation by Neal Whitman. [43] In pages 194-195 of Aiken Brown's novel In a Brother's Eyes, the characters Brant and Tommy discuss getting a video from The Land Before Time for Brant's son Brandon. Brant cites Littlefoot as a good role model for the child. [44] Littlefoot and his mother are mentioned in Ray Pons' Finding My Way: And How You Can Find Yours on page 36. In April 1995, costume actors dressed as The Land Before Time characters Littlefoot and Cera, along with members of the Atlanta Knights' ice hockey team, visited Eggleston Children's Hospital in Atlanta and handed out gifts to patients, including video tapes. [46] Trivia As Littlefoot is shown to slip straight to Cera, he is five years old at the time of the first film. [47] Littlefoot is referred to as Brontosaurus on the original video cover for the first film, and then it is called Brachiosaurus on the Clamshell case. He was also known as Brachiosaurus on Rotten Tomatoes.com[48] and in Movies.com. [49] In the media, alternatively referred to as Apatosaurus[8] and Brontosaurus. [4] [9] [50] [51] [52] Although both terms are technically correct, Brontosaurus is now synonymous with Apatosaurus, Apatosaurus, is not a scientifically correct term. Littlefoot's personality may have been a reference to The Brave Little Toaster and his character Toaster (which was released before The Land Before Time, and also one of the film's acclaimed animators, Skip Jones, also worked on the film), as both are the main characters. Littlefoot and Toaster are very similar, including taking their mates out of danger and having a sense of adventure.
