Certainly this developer is no stranger to us, if you are a supporter of Java games, you will definitely Gameloft is a huge developer and release in France.Gameloft now consists of 21 huge game development studios around the world and they focus mainly on mobile games. Founded by Ubisoft co-creator Michel Guillemot, the game quickly became best known for its Java games. The games they make you won't be criticized anywhere, but now they focus only on Android and iOS,... Operating system. have made them a trademark of first-person shooter and racing games. But today, I would like to introduce you to a brand new game is Gangstar Vegas, this game is a combination of top-notch racing games and grand theft auto. Becoming the infamous Mafia tycoon Gangstar Vegas takes place in Las Vegas, where you will be Experience intense car racing, mutual purge of notorious gangsters or try your luck at the casino. Become the infamous Mafia tycoonIn the game, you will portray a Mafia tycoon and around there are many guys planning to take you down, you are forced to engage in gun battles, suffocating hunts. Not only that, you are also wanted everywhere in this city of Las Vegas. But beneath your subordinates there are still those who are loyal to you, your mission is to rebuild your infamous Mafia gang and dominate this city. Get rid of those who stab you in the back and those who disobey you to regain your place in the gangster world. The game has the same controls as Grand Thief Auto, extremely simple, when they enter the world of gangsters, you will be guided by the system from the most basic ones in the game. The world is expanding greatly, there is now a hugely popular open world game called Grand Thief Auto V Roleplay, which allows multiple players in one server and can interact with each other. And Gangstar Vegas also owns a world like that, you can take missions, interact with other players, see your rank in the constantly updated rankings. In addition to taking on missions to understand the plot, you can also participate in racing challenges, shooting,... Great, fascinating worldIn the game you can also rob banks, casinos to make money and assert your superiority in this city. With the money you steal, you can launder money by using it to build your gang or add supercars to your collection and use them in choking car races in the middle of the big city. The special thing that makes this attraction is AR Mode, like Watch Dog, hackers use over-the-top cameras to probe building structures and try to break into the system for their own purposes. In this game you can also use them to see the city of Las Vegas at night from above, the lights in the buildings will make the city more beautiful than ever Virtual reality, over-the-top camera Graphics, Gangstar Vegas uses 3D graphics technology to design roads, surroundings as well as characters in the game. It will make the game more realistic than ever. The movement of characters and of cars is optimized for players to have the best experience, through which the developer also wants to confirm that mobile games can also be as beautiful as pc games.3D graphics are extremely realistic and sharp, in addition, the game also integrates both first and third perspectives to increase the player's experience, they want players to be felt through many perspectives.
