Portal systems ag

ECM specialist edoc solutions ag (edoc), which has been successfully operating in the market since 1998, takes over the d.3ecm business division of Portal Systems AG (Portal Systems). With the expansion, edoc confirms its market position as the largest and most successful partner of the well-known manufacturer ECM d.velop AG, Gescher.Im scope of the agreement, edoc in the future will serve the entire customer base of the d.3ecm business unit of Portal Systems and take over existing contracts relating to the use and support of d.velop Systems software instead of Portal Systems. Thus, the services offered by Portal Systems in relation to d.3ecm are offered by edoc from the date of purchase. With this step, edoc sets its location in Hamburg at the same time, so that the business address Fischertwiete 1 / Chilehaus B known to its customers remains. This also explicitly includes an offer for the entire d.3ecm portal Systems team, closed to edoc. For customers, the acquisition will result in significant added value: on the one hand, they will be able to use a significantly expanded range of services and services in the future. In addition, customers can benefit from the deep and long-standing experience of EDM, as well as structures that have been established over the years. In the future, Portal Systems will focus entirely on the development and marketing of ITS own ECM Shareflex platform for SharePoint and Office 365, in which edoc is also closely associated with Portal Systems as a sales, collaboration and technology partner in this sector. Andre Grunebourn, CEO of edoc Solutions ag: We are very pleased that with the acquisition of d.3ecm Portal Systems AG, one of d.velop's leading partners, we have been able not only to expand our customer base, but also to strengthen our experienced employees with ECM. The new colleagues will be working on our new location at Portal Systems AG in Hamburg, and we will continue to expand the Gateway to the world as an edoc location. We are proud to be one of the leading ECM solutions, 5 locations in Germany and the deep and unique experience of ECM/ERP, we are currently one of the leading ECM solution providers in the German-speaking region. We look forward to new customers, new colleagues and new locations! ----- Andre Joses, CEO of Portal Systems AG: We have for many years valued edoc ag's solutions as a reliable and strong partner. Therefore, we are confident that this transition will benefit our customers who will have access to an even wider solution and portfolio of services in the future. On the other hand our employees as they find an environment in edoc that offers you a long-term perspective with a wide range of opportunities for professional development. And with the newly founded edoc Hamburg location in our premises, the familiar work environment is also maintained. Our motivation for this move is ultimately also due to disproportionately strong growth in our shareflex ecM business segment, which has been rebuilt in recent years and based on SharePoint and Office 365, and ultimately critical to our decision to fully focus on this area in the future. We would like to thank all colleagues and our clients for their loyalty and long-standing, trusting cooperation! -----Sload press release (PDF No. 680 KB) Durr Systems AG est situada en Bietigheim-Bissingen, en la sede del Grupo-Durr.
