7 spiritual laws of success audiobook

From the introductory success of life can be defined as the continued expansion of happiness and progressive realization of worthy goals. Success is the ability to fulfill your desires with effortless ease. And yet success, including the creation of wealth, has always been considered to be a process that requires hard work, and it is often considered to be at the expense of others. We need a more spiritual approach to success and prosperity, which is the rich flow of all good things for you. With the knowledge and practice of spiritual law, we sit in harmony with nature and create with carefreeness, joy, and love. There are many aspects of success; material wealth is only one component. Moreover, success is a journey, not a destination. Material abundance, in all its expressions, happens to be one of the things that make travel more enjoyable. But success also includes good health, energy and enthusiasm for life, fulfilling relationships, creative freedom, emotional and psychological stability, a sense of well-being, and peace of mind. Even with experience of all these things, we will remain unfulfilled unless we nourish the divinity within us. In reality, we are divinity in disguise, and the goddesses and goddesses of the embryo within us seek to be fully materialized. True success is therefore the experience of the miraculous. It is the unfolding of divinity within us. It is the perception of divinity wherever we go, in what we perceive in a child's eyes, in the beauty of a flower, in the flight of a bird. As we begin to experience our lives as the miraculous expression of divinity, not occasionally, but all the time, we will know the true meaning of success. . All creation, all that exists in the physical world, is the result of the unmanifested transforming into the manifest. Everything we see comes from the unknown. Our physical body, the physical universe, all we can perceive through our senses is the transformation of the unmanifested, unknown and invisible into the manifest, familiar and visible. The physical universe is nothing but the self that curves back in itself to experience itself as spirit, mind and physical matter. In other words, all processes of creation are processes in which self- or divinity expresses itself. Consciousness in motion expresses itself as objects of the universe in the eternal dance of life. From chapter 1 THE LAW OF PURE POTENTIAL The first spiritual law of success is the law of sheer potential. This law is based on the fact that we are, in our essential state, pure consciousness. Pure awareness is pure potential; it is the field of all possibilities and infinite creativity. Pure consciousness is our spiritual essence. Being infinite and unlimited, there is also pure joy. Other consciousness is pure knowledge, infinite silence, perfect balance, invincibility, simplicity and happiness. This is our essential nature. Our essential nature is one of sheer potential. When you discover your essential nature and know who you really are, knowing yourself is the ability to fulfill every dream you have, because you are the eternal possibility, the immeasurable potential of all that was, is and will be. The law of pure potential can also be called Unity Law, because underlying the infinite diversity of life is the unity of a pervasive spirit. There is no separation between you and this energy field. The field of pure potential is your own self. And the more you experience your true nature, the closer you are to the field of pure potential. The experience of the self, or self-reference, means that our internal reference point is our own spirit, and not the objects of our experience. The opposite of self-reference is object reference. In object reference, we are always influenced by objects outside the self, which include situations, circumstances, people and things. In object reference, we constantly seek the approval of others. Our thinking and our behavior are always in anticipation of an answer. That's why it's fear-based. In object reference, we also feel an intense need to control things. We feel an intense need for external power. The need for approval, the need to control things and the need for external power are needs that are based on fear. This kind of power is not the power of pure potential, or the power of self, or real power. When we experience the power of self, there is no compulsion to control, and no struggle for approval or external power. Overview: The 7 Spiritual Laws of Success is one of the classics of modern self-help writing ... It's simple and straight to the point. It is arguably one of the best self-help books ever written because of how easy it is to understand and apply the principles outlined by Chopra. The main idea behind the book is to develop a symbiotic relationship between spiritual success + economic success ... the idea that the two jive well with each other is often the cause of either moral or financial distress for many people. Hopefully, this summary can help shed light on the importance of marrying these two types of success - spiritual as well as financial get unlimited book summaries for just one dollar.
