Audio to Earth Down provides a revealing look at the R& amp; amp; B contemporary modern ever around early 2001. The list of featured artists won't surprise you, although a few artists like Monica, Ginoin, Jagged Edge, and Lauren Hill are obviously emerging as well-established artists. In addition to these artists, who all turn into impressive songs, some of the most surprising efforts actually come from less established artists such as Jill Scott and Kelly Rowland (from Destiny's Child) - two artists deservedly on the brink of pop crossover success at the time of the release of this album. When you break these songs and listen to them individually, this album is an incredible collection of R& amp; amp; B contemporary; Scott Storch's opening album produced a contribution from The Roots and Emile Larriueux, Glitches, is welcome to add to the album and fits rather well with successive songs by Monica and Ginoin. Unfortunately, other rap songs will destroy the continuity of the album. Sticky Vinjazz and Eminem what if you're white comes across as incredibly repugnant and ill-conceived in its attempt to be a comedian and without any memorable hooks to push it beyond these flaws. Similarly, bone thugs playing thugmusic are no better, even as he tries to absorb bullying themes into the album's underlying sense of affectionate motif with its employability of vocal harmony. Finally, Snoop Dogg gin and juice are at least a classic song, but it's still clearly misplaced. As mentioned earlier, for the most part, this sound is a really great sample of R& amp; amp; Contemporary B is well written, experiencing only the moments of county rap.
