Regional supplement to the corps of engineers wetland delineation manual western mountains

Javascript is required to experience full interactivity, enable JavaScript in your browser. Javascript is required to experience full interactivity, enable JavaScript in your browser. Field Guides and Tools @site-logo/siteLogo.png The following is a partial list of the appropriate wetland mode and classification measures. CDOT does not approve of any private companies. Wetland data procedures - CDOT instructions on how to use GPS to collect wetland boundaries. Regional supplements of the Head of Wetlands Regulation of the Corps of Engineers: National Wetland Plant List (2018 Update) The U.S. Army Corps of Engineers (Corps), as part of an interagency effort with the U.S. Environmental Protection Agency (EPA), the U.S. Fish and Wildlife Service (FWS) and the U.S. Department of Agriculture's Natural Resources Defense Service (NRCS), has created the National Wetland Plant List (NWPL) (updated in 2018). The NWPL is used to determine whether the hydrophyte vegetation parameter is observed in the determination of wetlands under the Clean Water Act and the Food Safety Act. The list must be used in any wetland restriction. Plant lists in the state and three regions of Colorado can be found below. These are dynamic documents that are frequently updated.
