Global trade network swtor

Share Galactic Shopping Network (commonly abbreviated as GTN or GTM) is an auction house located in the Galactic Shopping Network area of both Carrick Station and Vaiken Spacedock. The console is also available for your starship through legacy and Coruscant and Dromund Kaas marketplaces/GTN How it works A player who is willing to sell the item will put it in the GTN terminal for a certain amount of credit. Another player who wants to buy that item will search for it and buy the item. Therefore, a player selling an item can make a profit. To sell an item, you must switch to the Sell tab and right-click the item that you want to post from your inventory. After you have set the duration and price, you can click Create Sales, which will insert that item into items sold in the server auction. To buy an item, add a name for the items and select the search options. The search options name is the name of the item. Category – The type of item you are looking for. Subcategory is a more specific item category. The socket is the type of thing you are trying to buy (Gloves, headgear). Rarity – Item type. (Custom, Standard, Prototype). Use by- What element can be used. Statistics – Item statistics type (Jockey, stamina, strength) Required level – required level range. Cost range – The player's budget range. Unit price - Price of 1 item. The Prekés options of the salesperson are the name and statistics of the item that you are selling. Savikaina - Sales price. Duration – The time for which the item will be on the GTN. Deposit - How much do you pay GTN for hosting your item on the server. FlagView HistoryIn its purest form, the Galactic Shopping Network is simply a place to trade items among players for a nominal amount. Think of it as the Auction House star wars: The Old Republic. If you are looking for a specific item, there is a good chance that you will find it live on GTN. Of course, depending on supply and demand, it can be two or fifty times the amount you can usually find from suppliers. This player-managed economy may vary depending on the server. GTN first opens the purchase screen. To switch between the sales screen, use the tab to Sell at the bottom of the window. You can sell all your items via GTN for a small fee. Tip: You can't sell for sale bound by your character or companions on the most successful auctions gtnSome apply your knowledge of the real life economy to manipulate the auction house and come out rich. Obviously, the less common element (blue elements and above), the more credit you can ask for. Since each server has a different economy, as some may experience more inflation than others, it is important to assess the state of the market, looking at the price of similar items sold. Use market value as a guideline, but don't jack up prices too much. Sometimes only a couple of skilled, wise sellers are needed to manipulate market values. If you plan to be a full cutthroat, you may need to use an alternative symbol to avoid harassment. Another advantage of having alt is to use it to reduce your ongoing auctions. View the official SWTORData + SWTORBot app for iPhone and Android Like SWTORData? Click here to learn how you can help this site grow It seems that you're using ad blocking software. Ads are an important part of what allows this and other sites on the SWTORTools network to continue to operate and grow. I also don't like ads. On sites, I use an ad blocker that shows full-screen ads or ads that can harm your computer. However, when there is a site that I want to support, I will either allow ads or donate them if they don't undermine that trust. I will never block you from the site or worsen your experience using ad blockers. But I urge you to either allow ads on my domains, or if you really don't want ads, consider supporting my work in another way. For example, you can make a one-time donation or subscribe to a patron. For more information here, Galactic Trade Network Monitoring SWTORData GTN Monitoring is now used by SWTORData to find GTN information by going to the Search Database at the top of this page, or click on the following link: Search database GTN data is integrated into an existing site instead of a separate part. So you will see gtn data as you go through the site. Now that you're on any item page, you can see gtn information at the bottom of the page. Broken down by server or global information. The search results and tips are also accompanied by the current global average, high and low price. So all sites currently using SWTORData tips will now also display GTN information. Now that the data is collected, there is much more that can be done in the future. Here are some things I plan to do in the near future special GTN UI (this page) to browse gtn Ability to filter based gtn price search full GTN API Historical graphs for each server Adding to SWTORData Mobile App in the near future I will be adding the full GTN developers (API is currentl for private testing and SWTORData uses this API when showing you information) Element object object API Data includes some limited GTN information. It will return the global current average, high and low. This will remain when the entire API for speed purposes is installed. Because of how gtn data was added, you'll find GTN data in several places except just the item page (but this will give you the most information) Here are some (but not all) other places where you'll find GTN data, and you just usually browse the Finishing Page Collection pages - tip lets you quickly understand how much it costs to buy a set This is an example if that's what you'll see when searching for an item. Both, when available, and there are no GTN data. Click any of them to see how the information looks on those pages, go to content Strength in numbers, contains different forms. In the supply chain it's all about your network. We understand how important your supply chain partners are to you. In order to compete in the global economy, it is necessary to establish a network of customers, suppliers, carriers and other partners. BluJay Global Trade Network (GTN) is a network of networks that help our customers connect and collaborate across their supply chains. With a steady growth of 50,000 participants worldwide, GTN is your advantage - easy access to a network of partners that helps optimize workflow and product movement to better serve customers. When you connect to the Global Trade Network, you strengthen your network. You become part of the ecosystem of thousands of the world's best shippers, carriers, service providers, suppliers, brokers and forwarders. Together, BluJay's customers transfer more than \$40 billion to trade on this powerful network, process 1.9 billion transportation transactions and clear more than 58 million electronic customs declarations each year. We are grateful to BluJay for being able to use this flexible, comprehensive software because it greatly facilitates our workload. With BluJay, we have a partner on our side who knows international customs regulations and logistics processes through and through. This allows us to help people who need faster and better around the world. Logistics Director @humedica e.V. As a logistics provider with high customs duties, we must rely on comprehensive, reliable customs software. With the ASP version from BluJay Customs Management, we can get this while saving valuable time and IT resources. A wide range of work is now in the hands of BluJay specialists. Project manager @Streck Transport We appreciate the history of our partnership with BluJay. Damco has appreciated the work of BluJay experts for so many years, and they will take us from today until tomorrow to support our business goals. Martin Ring Global Chief Operating Officer @Damco We chose BluJay because of the proven solution and flexibility of their entire offer. The solution is functionally rich configurable to meet our needs. Their ability to deliver both local and cloud is also attractive for us to build for the future. BluJay's presence in the world is a plus, including a strong continental European presence that helps us maximize our resources. BluJay is in line with our long-term vision and commitment to digitisation; they are invested in partnerships to help us gain value now and in the long term. Senger-Weiss CEO @Gebrüder Weiss GmbH BluJay's technology choice was a natural choice for Rangel, taking into account the planning and execution capabilities of solutions tailored to the management of transport and logistics operations. These are long-term solutions that can adapt and track business developments, fully aligned with our goals for the coming years. The strength of nuno Rangel CEO @Rangel Logistics Solutions This solution is that you can set many different configurations. He's so flexible. We constantly use exposed intelligence. It's rooted in who we are, and part of what we do. VP Supply Chain @ Hostess Brands Our customers are looking for a logistics provider that can offer solutions to all problems in their supply chain. Flexible, open systems that ensure transparency of activities are essential to support this need. The benefits that Rich Products has received from BluJay's solutions are not just prices. We can fill in tariff offers and then take this data so that we can make smarter network decisions, drive truck use and optimize multi-stop loads. That's more than just the norm; it is the ability to drive savings through several different transport areas. Director of Transportation @ Rich Products Rising fuel costs, customer needs, and increasing tightening of carrier capacity, making it necessary to implement strict transportation cost management. BluJay Transport Management gives us visibility at all customer, internal and carrier touch points. Logistics manager @ Republic Plastics BluJay Solutions has helped MTD increase efficiency in our supply chain, both internally and externally. This actually puts a seamless supply chain. BluJay Solutions gives us a foot in front of other service providers. We have the visibility of the entire supply chain, which allows you to cooperate with everyone involved in the transportation management process. Director of logistics services @ Keystone Foods Jel Sert Company is to achieve the project goals set by bluJay solutions, including increasing visibility, optimizing usage and using business intelligence to make better decisions. EVP of Operations @ Jel Sert We work in a fast-growing market that has unique requirements in the supply chain due to the shelf life of the product and our distributed operations. With BluJay's Transport Management we can manage transportation the transport procedure by means of delivery and therefore constitutes a competitive advantage. National Transportation Manager @Dannon Visibility in our supply chain is vital, both to facilitate delivery on time for our customers and planning backhails to increase the use of our containers. BluJay's Transport Management provides this information actively to our internal and external customers. VP Global Supply Chain Strategy @Chiquita Partnering with BluJay has allowed our call center to focus on a better order display experience for our customers. BluJay continues to be a valuable asset in managing complex route models, rating systems, fuel premium programs and carrier communications, freeing up our team to manage our business. Transportation Solutions @ CHEP Barilla and BluJay Solutions Head are working together. BluJay's Managed Transport Service took us to the next level of qualification, paving the way for further growth. Director of Logistics & Customer Service @ Barilla We have full visibility p & L relates to every cargo transfer that we make. From an ROI perspective, this really helped us move the needle. Supply Chain Systems @ Ashley Furniture Vice President BluJay Solutions thanks to Air Canada Cargo has experienced a significant drop in vendor markups. Before BluJay there was a lot of controversy with the vendors, and now there is very clear visibility in the truck network. Global Surface Transport Manager @ Air Canada As a manufacturer, we need full visibility, collaboration and greater flexibility with supply chain partners to continually drive transportation improvements. BluJay provides sophisticated visibility and optimization to manage our continuous growth. BluJay's Transport Management is a gift that keeps giving. Their solution affects our transport network while opening our eyes to additional opportunities with the impact of a wide supply chain. We are constantly evolving with BluJay. Director of Transportation @ Ace Hardware BluJay's Commerce is critical to implementing our digital strategy. Easy ing and supplier management is essential to offer the range that our customers expect. BluJay gives us visibility through inventory and allows us to build our drop ship supplier base while keeping controls on order fulfillment. Guide logistics @ Shop Direct BluJay Solutions multimodal transport platform allowed us to see a 15% reduction in our costs per pound, excluding the price of fuel. Ceo @Sargento BluJay Transport Management's decision helps us improve our bottom line as it allows us to tender lower costs for carriers first. It also helps to improve customer service by simplifying the entire supply chain process. Corporate Logistics Manager @ Newark Our Ability to Quickly Integrate software with our system has resulted in a significant increase in efficiency and quality, which directly benefits our customers, our business users in the system and eventually the bottom line of national measures. IT Head @ National Measures BluJay Solution supports the entire marketing of our franchise network, but none of the third-party system is involved. For suppliers, the system is easy to use, and integration with our own systems runs smoothly, behind the scenes, exactly as it should be done. Company architect @ Mothercare We love BluJay. Their elite transportation management is a gift that keeps giving. Their solution affects our transport network while opening our eyes to additional opportunities with the impact of a wide supply chain.
