07-07-2012, 03:28 #1 This book is divided into 100 lessons, and each lesson has three units: Dialogue, Vocabulary, and Grammar and sentence patterns. The content of the Dialog is distilled from everyday life and is practice oriented. Materials range from self-introduction, communication, travel, and Chinese festivals. Important and commonly used words and phrases are fully elaborated in Vocabulary. Students can not only understand the order of the blows of the listed words, but also the expressions derived from these words. In Grammar and Sentence Models, we hope that students can apply the agile glossary that they have learned and use Chinese fluently and naturally in everyday life. To maximize the effect of this book, many efforts have been put into this publication. A texto intermedio adicional para despastar al enemigo. We hope that teachers who choose this book can arrange a natural and lively environment so that students learn Chinese in a pleasant atmosphere. Finally, students can lay solid foundations for Chinese learning in preparation for further Chinese language studies. OCAC would also like to take this opportunity to invite comments and suggestions for this book, and make this book in perfection.
