You'll be editing like a pro in a minute! Premiere Pro Keyboard shortcut Infographic Cheat Sheet Feel for free downloads and prints premiere pro keyboard shortcuts for this handy quick reference guide. &lt;p&gt;&lt;strong&gt;&lt;include naming here.&lt;/strong&gt;&lt;br &gt;&lt;br&gt;&lt;a href= " &gt;&lt;img src= " alt="Premiere pro= keyboard= shortcuts"= width="710" border="0"&gt;&lt;/a&gt;&lt;/p&gt;Most useful Premiere Pro keyboard shortcuts Before we learn about all the default and customizable keyboard shortcut options, we'll go through the most useful ones first. Think of this as a quick cheat sheet for your most common tasks. ResultsWindowsMac OSNew Project Ctrl+Alt+NOpt+Cmd+NNew SequenceCtrl+NCmd+NImport MediaCtrl+ICmd+IExport MediaCtrl+MCmd+MSaveCtrl+N SCmd+SSave AsCtrl+Shift+SCmd+Shift+SPlay/StopSpaceSpaceShuttle LeftJJShuttle RightKKRender Effects in Work AreaEnterReturnSelection ToolVV Razor ToolCCpleRip Edit Tool ToolBBRipple Trim PreviousQQRipple Trim NextWWRipple DeleteShift+DelShift+DelExtend Selected Edit PlayheadEESpeed/DurationCtrl+RCmd+RZoom In=Zoom Out—UndoCtrl +ZCmd+ZRedoCtrl+Shift+ZShift+Cmd+ZCopyCtrl+CCmd+CCutCtrl+XCmd+XPasteCtrl+VCmd+VInsert, Replace.... When the most commonly used Premiere Pro keyboard shortcuts are under your belt, you dive a little deeper into the default settings overview. Default keyboard shortcuts: Overview Adobe Premiere has two types of keyboard shortcuts: App keyboard shortcuts: App keyboard shortcuts work throughout the app, even if a specific panel isn't refined. Panel shortcuts: Panel shortcuts only work if you use a specific panel. In some cases, the same keys can be used in different commands in each of these categories (although this depends on the shortcut settings). For example, the C key throughout the application is dedicated to the Razor Tool. But when it focuses on a specific Titler panel, it switches to a vertical type tool instead – sophisticated, right? In addition, Adobe Premiere shortcuts can still be segmented into different segments. Understanding these types makes it easier to learn. We will look at these in more detail. next part. Shortcuts to commands: Perform tasks such as starting, closing, and saving projects. Clipboard shortcuts: Basic and additional commands. Tool shortcuts: Feature tasks related to Premiere Pro tools. Navigation shortcuts: Useful for reviewing video projects. Pro Tip: Tools and navigation shortcuts are the same for both Windows and Mac users. Shortcuts to commands The easiest way to think about shortcuts to commands is this: they are associated with file menu items. The list below the title bar of the window. Instead of clicking and browsing the File drop-down menu, you can quickly hit a couple of keys, and you'll go away! When using these existing shortcuts, think about how much easier it is to start a new project, save, import, and more! These shortcuts are your best friend. Clipboard shortcuts make editing a little easier and are very similar to the functions of a Word document. Fortunately, most of these are pretty straightforward, so let's go for it. ResultsWindowsMac OSUndoCtrl+ZCmd+ZRedoCtrl+Shift+ZShift+Cmd+ZCutCtrl+XCmd+XCopyCtrl+CCmd+CPasteCtrl+VCmd+VPaste InsertCtrl+Shift+VShift+Cmd+VPaste AttributesCtrl+Alt+VOpt+Cmd+VForarDeletete DeletewardClear In &amp; OutCtrl+Shift+XOpt+XRipple DeleteShift+DeleteShift+Forward DeleteDuplicateCtrl+Shift+/Shift+Cmd+/Select AllCtrl+ACmd+ADeselect AllCtrl +Shift+AShift+Cmd+AFindCtrl+FCmd+FEdit OriginalCtrl+ECmd+EOkay. So we said, That most of these were self-evident. If you've taken your double for Paste Insert, Paste Attributes, or Ripple Delete attributes, don't worry, we've covered you. You may not have heard of these before, but it's downhill. Paste Insert: Insert copied clips without overwriting other clips. Paste Attributes: Add effects from another clip to the selected item. Ripple Delete: Delete clips and keep the extra space and sequence intact. You can now also fill out the deleted clip with something else. Tool keyboard shortcutsEnd that we are in video editing icons that you definitely want to bind to memory. All the tools you need to make high-end videos are located below. And most likely for both Windows and To make sure this is down by 100%, we have explained the tool below. ResultsWindowsMac OSSelection ToolVVTrack Select Forward ToolAATrack Select Backward ToolShift+AShift+ARipple Edit ToolBBRolling Edit ToolNNRate Stretch ToolRRRazor ToolCCSlip ToolYYSlide ToolPPHand ToolHHZoom ToolZZSelection Tool (V): Select specific points to run basic clips. It's also great just for choosing a specific part of a video from the Timeline.Track Select Tool (A): Select clips that are available in one series, except for clips of locked songs. Ripple Edit Tool (B): This tool allows you not only to cut the clip, but also to vibrate the effect on all remaining play. It solves all the gaps between edited clips, such as magic. Rolling Edit Tool (N): Use this tool to edit clips by scrolling to their endpoint. You can move the endpoint forwards or backwards. The adjustment also makes the following clips move. Speed stretch tool (R): This is used to change the speed of a particular clip while staying within its duration. It is powerful in creating faster or slower clips in a series. Razor tool (C): You use the razor tool a lot. Staying true to its name, it shares a clip of where you choose it from. As a result, you can create as many clips as you want from one of the clips. Sliding tool (Y): Adjust the in and out points of the clip without affecting its duration. The in and out points are adjusted simultaneously for the same duration. However, the duration of the clip remains the same. Slide Tool (U): Move the clip left or right. It also adjusts other clips near it. Although the duration of the item clip is intact, other clips are adjusted. Pen tool (P): You can use the Pen tool to add clips over any freeform shape. For example, you can use it to blur a part of a video or as part of your color-corrected arsenal. Hand tool (H): The hand tool is a navigation tool that allows you to drag your position on the video timeline. Zoom Tool (Z): This is pretty obvious. It allows you to zoom in and out of the video. Navigation ShortcutsNavigation shortcuts allow you to check playback and go through video. You also use this a lot when reviewing your edits. Very convenient! Like the Tools shortcuts, they are the same for both Windows and Mac OS users. ResultsWindowsMac OSPlay/Stop ToggleSpaceSpaceStep BackLeft (–)Left (–)Step ForwardRight (–)Right (–)Go to the next edit PointDownDownGo to the previous editing pointUpMark PointIllMark in PointOOClear &amp;to OutCtrl+Shift+XOpt+XGo in PointShift+IShift+IGo to Out PointShift+OShift+OShuttle LeftJJStopKKShuttle RightLLSnap (Enable/Disable)SSAdd, Sync, and Remove Custom Keyboard Shortcuts in Premiere Pro is not just the default icon, but it also allows you to add your own. This could be If you're left-handed or just want to control the workflow you want even more. More. the option is for you, and adding custom shortcuts is so easy that it has its own shortcut. Windows: Ctrl+Alt+KMac: Cmd+Opt+KYou is then represented by the virtual keyboard interface. This allows you to add, change, synchronize, or delete shortcuts. The interface is easy to use and has a drag-and-drop feature that is quite intuitive. We recommend looking at this and seeing what is possible. You may find a few edits that will create more efficiency for you. And that's what shortcuts are all about! Keyword shortcuts let you dramatically improve your workflows in Adobe Premiere. Another advantage is that you may find that editing becomes a little more enjoyable. The more work you are able to do, the more money you can make and the more videos you can produce. Basically, everyone wins! We hope you enjoy this shortcut guide and are on your way to video editing!
