1600 amphitheatre parkway

Google and Alphabet corporate headquarters complex in California, United States This article is about r, the center of Google. The big number, see Googolplex. GoogleplexBuiltJuly 2004; 16 years ago (2004-07)LocationMountain View, California, United StatesCoordinates37°25′19″N 122°05′02″W﻿ / ﻿37.422° N 122.084° W﻿ / 37.422; -122.084Coordinates: 37°25′19″N 122°05′02″W﻿ / ﻿37.422° N 122.084° W﻿ / 37.422; -122.084Address1600 Amphitheatre ParkwayMountain View, CA 94043 Googleplex is the corporate headquarters of Google and its parent company Alphabet Inc. It is located at 1600 Amphitheatre Parkway in Mountain View, California, United States. The original complex, with 2 million square feet (190,000 square feet) of office space, is the company's second largest floor space compilation of Google buildings, following Google's 111 Eighth Avenue building in New York, which the company bought in 2010. Googleplex is a portmanteau of Google and complex (ie a complex of buildings), and a reference to googolplex, the name given to the large number 10(10100), or 10googol. Facilities and history On the south side of Googleplex The former entrance to the lobby of Building 40 The original campus SGI Campus The site was previously occupied by Silicon Graphics (SGI). The office space and corporate campus are located on a larger 11-acre site that includes Charleston Park, a 5-acre (2-hectare) public park; better access to the Permanente Stream; and roads linking the corporate site to Shoreline Park and the Bay Trail. Launched in 1994, the project was built on one of the few working farms in the area and was owned by the city at the time (identified in planning documents as Farmer's Field). [1] It was a creative collaboration between SGI, STUDIOS Architecture, SWA Group, and the City of Mountain View Design and Community Development Agency. [summons required] The aim was to develop the privately owned corporate centre and the adjacent state green space in a complementary way. Key design decisions have placed parking spaces underground for nearly 2,000 cars, allowing SWA to integrate the two open spaces with water features, shallow pools, fountains, roads and plazas. The project was completed in 1997. ASLA noted that the SGI project was a significant departure from typical corporate campuses, challenging traditional thinking about private and public space, and awarding the project the ASLA Centennial Medal in 1999. [3] STUDIOS Architecture was the architect of the original SGI campus and provided interior architecture and basic building design. Google campus The previous SGI facilities were leased by Google starting in 2003. [4] The interiors were redesigned by Clive Wilkinson Architects in 2005. In June 2006, Google bought some of the The artwork, including googleplex, is owned for \$319 million. [5] [6] Google's campus area off Charleston Road at Googleplex Since the buildings are relatively low in height, the complex expands into a large area of land. The inside of the center is furnished with shadow lamps and giant rubber balls. The lobby includes a piano and a projection of the current live Google search queries. Services include a free laundry room (Buildings 40, 42 & CL3), two small pools, several sand volleyball courts, and eighteen cafes with different menus. Google has also installed copies of SpaceShipOne and a dinosaur skeleton. [7] Since 2007, the site has had a series of solar panels covering the rooftops of eight buildings and two solar-powered shoo-ins and producing 1.6 megawatts of electricity. At the time of the installation, Google considered it to be the largest in the United States among companies. The panels provide the energy needed for 30% of peak electricity demand in solar-powered buildings. [9] In July 2008, four 100 kW Bloom Energy Servers were shipped to Google, making Google bloom energy's first customer. [10] [11] The Android lawn sculptures (formerly building outside 44 Charleston Road), are now located on google campus 1981 Landings Drive (at 37°25′06″N 122°05′17″W/37.4184135° N 122.0879531° W/37.4184135; -122.0879531) and includes a huge green statue with the Android logo and additional statues to represent all versions of the Android operating system. Bay View next to Google buildings near Shoreline Park in 2013 began construction of a new 1.1 million-square-foot (100,000-square-foot) campus dubbed Bay View, adjacent to the original campus of 42 acres (17 ha) leased to NASA's Ames Research Center and overlooking San Francisco Bay at Moffett Federal Airport. The project's estimated cost was \$120 million, with the 2015 opening date. [12] [13] [14] The IBBJ is the architect, and this is the first time Google has designed its own buildings instead of moving into buildings occupied by previous businesses. [15] The addition is located on the northeast corner of the complex, next to the Stevens Creek Nature Study Area/Shoreline Park. Before announcing the construction, Google, through its in-house real estate company, Planetary Ventures, applied for permission to build the city's Mountain View bridges in neighboring Stevens Creek. [16] Google's 2012 annual report found that it could only develop 7 hectares of the 42-hectare (17-hectare) site. [17] Google plans a 60-acre (24-acre) addition designed by Heatherwick Studio and Bjarke Ingels of North Bayshore. [18] Location The Google shuttle bus to the Sunnyvale campus. Googleplex Courtyard The Googleplex is located between Charleston Road, Amphitheatre Parkway, and Shoreline Boulevard north mountain California is close to shoreline park wetlands. Employees in San Francisco, East Bay, or South Bay can use free Wi-Fi-enabled Google transfers to and from work. The transfers are powered by a mixture of 95% petroleum diesel and 5% biodiesel, and the latest emission reduction technology. [19] In the north, the Shoreline Amphitheater and The Intuit are located, and in the south are the Microsoft Corporation's Silicon Valley research complex, the Computer History Museum, and century theatres. Moffett Field is nearby to the east. Other Google Mountain View locations A restaurant at Googleplex Google in its year-end 2012 annual report said it had 3.5 million square feet of office space in Mountain View. [17] Google has another large campus in Mountain View called The Quad at 399 N Whisman Road, about 3 miles from The Googleplex. [21] In 2013, Google leased the entire Mayfield Mall, a closed mall that was last operated in 1984 and rented by Hewlett-Packard from 1986 to 2002. [22] A bicycle used by Googleplex employees[23] is located about 800 metres from the googleplex, the secret Google X Lab, a development laboratory for products like Google Glass. It is a burbling fountain in front and ranks of company-issued bikes, which employees use to transfer to the main campus. [24] In popular culture, Googleplex appeared in the 2013 film The Internship, where the Georgia Tech campus was a dual. [25] This also inspired him to work at the Fictional Hooli Headquarters on HBO's Silicon Valley series.
