The OA REACTION WEB is intended for those who participate in mild activity, obese patients and active patients who run, hike or play tennis or golf. Features and benefits Low profile braces made of lightweight silicone make it easy to wear under clothing Patented silicone web design provides shock absorption and mild off-load four-way, Adjustable sheath for easy adjustment and on/off application Soft silicone condensate pad helps maintain dentures in place Designed to support and protect arthritis and OA knee (osteoarthritis) Best for everyday activities, golf, running, tennis, walking Monday, 20 August 2018 ] Paul If you were recently diagnosed with knee osteoarthritis, you probably came across the Donjoy OA Reaction Knee Brace, which is designed to help you get used to wearing knee support during the early stages of the condition. However, with two different models and a multitude of sizes available, knowing which version to order can be difficult - and confusion only continues when it comes to installing support. Find out all this and more by reading our blog, which provides instructions for Donjoy Reaction Web Knee Brace.Choosing Your Donjoy Reaction Web Knee Brace Two options for Donjoy Reaction Web Knee Brace are as follows:Lateral vs. Medial Support While the medial refers to the parts of your body closest to its center, the lateral refers to the areas closest to its sides (and therefore furthest from the middle). The model you choose will depend on the section where your osteoarthritis is located. Please refer to the list below to find out which version you need:Finding the right size to support your web knee reactions Support for the OA reaction of the web knee is available in seven different sizes to give you a custom fit, which in turn improves the level of support provided to you. It's easy to find out what size you need; simply measure the circumference of the thigh 15 cm above the center of the knee and tables below. Thigh Circumference Size (cm) Extra Small 33 - 39cm Small 39 - 47cm Medium 47 - 53cm Large 53 - 60cm Extra Big 60 - 67cm XX-Large 67 - 75cm XXX-Large 75 - 81cm Fitting Donjoy OA Knee Reaction BraceA Reaction Web Knees Brace is designed to be as easy as possible to fit Follow the instructions below to apply support or follow the video below. Pull the knee sleeve over your knees, with the bottom of the hourglass over your knees. This improves compression and knee support comfort. Apply the prosthesis over the sleeves, with the circular part of the patella directly over the knee. Bring the straps to the calf and thigh, applying gently at first before tightening for improved and supportive fit. Why should you choose support for Osteoarthritis Reaction Web Knee? Now you know how to choose and fit your OA Reaction Web Knee Brace, but you may still be wondering why you should invest in Donjoy OA Reaction Web Brace. If you suffer from early or mild osteoarthritis, this support is an excellent and discreet solution for your needs that allows you to return to an active lifestyle. Gone are the days when you have to feel like a patient or suffering from osteoarthritis! Maintain and regain your mobilityRegain your active lifestyle with the OA Reaction WebIt allows you to continue with common activities without fear of discomfort. Reaction Web Braces is even suitable for those who enjoy participating in mild activities, allowing you to walk, run or play tennis or golf! The support uses silicon web technology that is scientifically designed to absorb shock and relieve pain in the front knee while at the same time confirming osteoarthritis of the knee and patella joints. This helps prevent further deterioration of the knee joints, allowing you to stay active for an extended period of time. Discreet DesignLow in profile and easy to wear without the need for minor adjustments throughout use, Donjoy Reaction Web Knee Brace is a great way to maintain support without drawing attention to your condition. Unlike most osteoarthritis knee braces that are rigid in design, this knee support can easily be worn under trousers, skirts or workout clothes as a discreet solution to your discomfort. Ideal as the first OA knee braceAs result of silicone construction and lightweight design, Web Reaction Knee Brace is perfect as a knee brace when you are first diagnosed with osteoarthritis. Support allows you to get used to wearing knee support before your condition worsens to the point where rigid knee support is required. Alternatively, comfortable support can be used when you simply want a break from a stiff knee brace or are in an environment where you don't want to draw attention to your condition.
