However, there are several online sites where you can download that amazing movie music that you heard about that movie the other day. All you have to do is identify the movie, the composer, and see one of these pages. An extensive database that goes beyond the opening theme song, the song below the credits, or the melody of all the character dance-it features the less remarkable tracks of a movie that only real fans recognize. With more than 45,000 titles to choose from, SoundtrackCollector.com is a serious musician and soundtrack enthusiast who is truly a fan of composers and the often brilliant and underrated work they do in every film. With what may be the largest database of soundtracks online, ArtistDirect.com provides most of these downloads for free (a fee that you have to pay for access to others). However, for most soundtracks, it's easiest to find the mainstream pop songs that you've bought for the soundtrack, not necessarily the composers who have made movie scores. Keep this in mind if you're looking for something rather vague. Last fm seem to have the most tracks in the database - the challenge comes with finding those tracks. If you're going to use Last fm to track these free soundtracks, all keyword information is available to locate them. Some titles are just listed titles. But what if the mood is something longer and better image quality? We bought six services offering just to get out of a spin: CinemaNow, Apple's iTunes Movie Store, MovieFlix, Movielink, Amazon Unbox, and Starz's Vongo. Each has a slightly different take on what the online movie download experience should be. They vary in what they offer, how to pay, and whether you sign up for a movie library, publisher, or purchase the content. Although the video demand has had a twinkle in the tech execs' eyes since the turn of the millennium, the enabling technologies are finally matured, and three services we review have only been released in 2006 by Apple's iTunes movies, Amazon's Unbox and Starz's Vongo.
