Today's Best Acer Aspire 5 DealsCyber Monday Sale Ends at WAcer Aspire 5 Slim Laptop,... Acer Aspire 5 (2020): SpecPrice: \$549 CPU: Intel Core i5-1035G1 GPU: Intel UHD RAM: 8GB Storage: 256GB PCIe NVMe SSD Display: 15-inch, 1080p Battery: 6:55 Size: 14.3 x 9.9 x 0.7 inches Weight: 3.7 lb Acer Aspire 5 is not a laptop that will win all the accolades, but this notebook will do the job (within reason). Acer Aspire 5 ticks off many fields for students participating in remote or personal learning this year. The \$549 (\$399 starting) laptop offers inimissive looks with lots of ports and surprisingly good audio. However, average performance and subpar battery life keep this laptop from making any of our best lists. But if you're looking for an affordable option that can go from work to play with relative ease, aspire 5 will do the job. Acer Aspire 5 prices and configurationsCyber Monday deals: see all the best deals right now! The basic configuration of the Acer Aspire 5 starts at \$399 and has an Intel Core i3-1005G1 processor, 4GB RAM, 128GB SSD, Intel UHD graphics card and 15.6-inch 1080p display Our test unit costs \$549 and features an Intel Core i5-1035G1 processor with 8GB of RAM, 256GB OF PCIe NVMe SSDs and Intel UHD graphics. Maxed out, the Acer Aspire 5 comes in at \$779 with an Intel Core i7-8565U processor, 8GB of RAM, a 512GB SSD, an NVIDIA GeForce MX250 GPU with 2GB of vRAM and a 15.6-inch, 1080p display. A very cool thing about the Aspire 5 is that it can be easily upgraded thanks to its design, which allows you to access the motherboard by removing the bottom of the case. The notebook also comes with a hard drive installation kit so customers can easily install the hard drive to complement the 256GB PCIe NVMe SSD. Acer Aspire 5 looks like a long lost cousin of the MacBook - it's not your first choice, per se, but you won't throw it out of bed. It is thin and elegant with subtle understated styling, making it pleasing to the eye without being too flashy. (image credit: Future) When closed, the cover of the device is firmly in the housing, and thanks to the very smooth surfaces it is a little difficult to open. Once you open it, your eyes will be introduced to a pleasant project. The first thing you'll notice is the minimal black frame surrounding the display. Then you'll drink in a full backlit Chiclet-style keyboard that sits above the touchpad, all tedled to a silver case with curved rounded corners, adding to the elegant feel of the Aspire 5. The large palm rest gives you the feeling that you are using a much larger laptop. There's a Windows Hello-compatible fingerprint scanner that lets you lock and unlock with your finger. I was disappointed that Acer didn't add a camera shutter to give the user some privacy. Dimensions 14.3 x 9.9 x 0.7 inches The Aspire 5 is slightly heavier and larger than the Lenovo Yoga C740 (3 pounds and 12.7.1 x 8.5 x 0.6 inches). However, it is lighter than the Asus VivoBook S15 (S533F), which is available at 4 pounds, 14.1 x 9.2 x 0.6 inches. Acer Aspire 5 portsThe Aspire 5 comes with a healthy number of ports. (image credit: Future) The system has a USB 3.1 Type-C Gen 1 port with two USB 3.1 Type-A Gen 1 ports, a USB 2.0 port, an HDMI 2.0 port, a microSD card reader, an Ethernet port, a Kensington lock and sockets for the headset and power supply. (image credit: Future) The Acer Aspire 5 Aspire 5 display with 15.6 inch, 1920 x 1080 pixels is bright and good color saturation. Watching the Magic Camp trailer, the colors and tones were rendered nicely, especially when one group of kids went out for walks in a dramatic slow mo dressed in red tracksuits. The colors were well saturated, warm and rich, and the contrast was excellent throughout. In general, it was a solid visual experience. You can totally veg and binge-watch videos with this display. (image credit: Future) When our team of skilled crazy scientists measured panel color reproduction, Aspire 5 captured 63% of the sRGB color gamut that was associated with asus VivoBook. The Lenovo Yoga C740 blew them both far, gaining 111%, which is well above 89% of the mainstream laptop average. The Aspire 5 display averages 258 nits of brightness, lighter than the 248 VivoBook (248 nits) and Yoga C740 (250 nits). Acer Aspire 5 audioThe Aspire 5 scores a few points here thanks to good sound quality. The sound is clear and even offers a little Rump Shaker bass and depth. The speakers are loud enough to be heard clearly in a medium-sized room. Two speakers mounted on the front pushed enough sound to get grooves to the new Cardi B and Megan thee Stallion songs that shan't name here as we're just an innocent group of technicians. During Bach's Prelude game in B minor, the averages and highs were excellent and bright. Acer's True Harmony Gen 2 feature, which Acer says offers a wider frequency range, lower distortion, and handset-like sound quality, provides three different surround modes: music, video, and play. I tried them all, and they were perfect; You are able to pick up a slight difference with the bass being stronger in music mode and the volume is loudest in movie mode while maintaining excellent brightness. I think the game mode was a combination of the first two modes, as well as a great experience. When it's time to talk, the Aspire 5 uses a dual microphone and patented Acer Purified Voice technology. It combines long-distance reception, voice tracking, keystroke damping, adaptive beam forming, and predefined personal and conference call modes. During a recent zoom conversation with my she remarked: You sound really good daddy, can I borrow \$50? I can to quality because when I said no, she heard that loud and clear. Acer Aspire 5 keyboard and touchpadShow a very responsive and sporty big support that gives you excellent support, I found the Aspire 5 full size, Chiclet keyboard to be a little mushy and not as clicky as I'd like. During the 10fastfingers test, I scored 55 words per minute with 80% accuracy, which is very solid when you consider that I have thick chorizo fingers that sometimes lack agility. (image credit: Acer) The 4.1 x 3.1-inch touchpad responds when navigating web pages or documents. The smooth surface is proficiency in making Windows 10 gestures, such as two-finger swipe and three-finger tap. The lower corners give strong feedback and are very clicky when using right or left clicks. Performance Acer Aspire 5Z Intel Core i5-1035G1 1-GHz processor, 8GB RAM, 256GB PCIe NVMe SSD and Intel UHD Graphics, Aspire 5 is a workhorse that can easily handle all your daily emails, YouTube breaks, documents and school work. Unfortunately, aspire 5 does not fare as well during our laboratory tests, starting with Geekbench 5.0, the overall performance benchmark. The laptop got 2744, or 3,452 of the average mainstream laptop. Asus VivoBook with Core i5-10210U processor, hit 3,560 while Lenovo Yoga C740 and its Core i5-10210U processor reached 3,878.Our review unit managed to overtake the average mainstream laptop (22:21) during the Manual Brake video editing test, However, VivoBook (17:22) and Yoga C740 (20:42) performed better. During the file transfer test, Aspire 5 needed 14 seconds to duplicate 5 GB of mixed media files to achieve a transfer rate of 369.4 megabytes per second. VivoBook (512GB SSD) hit 408 MBps, Lenovo Yoga C740 (512GB SSD) was a group speed demon with transfer rate of 848.2 Mbps. Aspire 5 uses intel's integrated GPU, which I do not recommend for intense gaming. Our test unit achieved 8 frames per second during the Sid Meier's Civilization VI: Gathering Storm (1080p) test, matching the C740 yoga. Vivobook led the group, reaching 11 fps, but still did not meet the mainstream average 14-fps laptop. The Acer Aspire 5 Aspire 5 battery life is equipped with a 48Wh 3-cell lithium-ion battery, which Acer evaluates after eight hours of battery life. When we launched the Laptop Mag battery test, which consists of continuous internet surfing over Wi-Fi at 150 nits brightness, the laptop lasted 6 hours and 55 minutes, which is below the mainstream average of 9:22. Both VivoBook and Yoga C740 lasted 8:23 and 10:18, respectively. Acer Aspire 5 heatThe Aspire perfectly heat dissipation. I opened 30 tabs in Google Chrome, all playing different Full HD YouTube videos while working on the document and i there was no real increase in temperature. Our team ran a full-screen HD video for 15 minutes and measured specific locations on the laptop after that time. The touchpad measured 71 degrees Celsius, which is well below our comfort threshold of 95 degrees. Between the G&H keys and the bottom we got a pleasant temperature of 86 degrees. Acer Aspire 5 WebcamName 5 720p is quite standard and works fine. Like most webcams, the color can be a little off in tone, and the details will be grainy if the lighting is not right. If you need better quality, I suggest you buy an external webcam. However, the Aspire 5 camera will be more than sufficient when you call Zoom and Google Meets.Acer Aspire 5 software and warrantyThe Acer Aspire 5 comes with Windows 10 Home, which means that there are quite a few bloatware, including Skype, Netflix, Microsoft Solitaire collection and Spades.The Acer Aspire 5 comes with a one-year limited warranty. See how Acer has fared in our annual Tech Support Showdown special reports and Best and Worst Brands special reports. Acer Aspire 5 does not change the game. Its design is so subdued that it is barely noticeable, and its Core i5 processor and integrated graphics won't blow you out of their performance. But for a seriously affordable \$549, aspire 5 is used for a robust audio system and has enough power to do the job, whether the job is to write a report, video call with family or watch a movie. However, if you're looking for more power, longer battery life, and a better screen, we recommend the Lenovo Yoga for \$686. It's a bit more expensive than Acer, but you can also get the added benefit of transforming versatillity through a 360-degree hinge system. That said, if you're looking for a laptop that can handle remote or personal learning on a budget, the Acer Aspire 5 is a solid choice. Choice.
