G string underwear wikipedia

Classic G-string Woman on the beach A g-string or thong is a narrow piece of cloth or leather, or plastic that goes between the buttocks. It's attached to a band around the hips. It can be worn as a swimwear or underwear by both men and women. The difference between a G-string and a thong is that a G-string has less material between the legs. It makes it look like a rope. Variants of the thong or G-string include the V string and the T-string. Origin of the G-string The G-string or thong is arguably the earliest form of clothing known to humanity. It originated in the warmer climates of sub-Saharan Africa where clothing was first worn nearly 75,000 years ago. Many tribal people, like some of the Khoisan people of Southern Africa, have worn thongs for many centuries. These early pieces of clothing were made to suit the male genitalia. The G-string was first developed for men by primitive peoples. However, in today's days, Western thongs are usually carried by women. They first became popular in South America in the 1970s. In Brazil, it was originally a style of swimsuit that had a rear area that had become so narrow, it would disappear between the buttocks. The origin of the term G string is not fully known. The term was first written by the Americans in the late 1800s. They described the loin garment of Philippine natives. Others say the term comes from the G-string on a tool. The origins of the word thong are from the Old English thwong, which is a flexible learning chord. In other languages in Lithuania, the G-string is often stringai or siaurikės. In Portugal and Brazil, the G-string is often referred to as fio dental. That means dental floss. In Italy, the G-string is called perizoma. In Turkey, the G-string ipli is called külot (ipli means string and külot means underpants). In French, German and Dutch, the G-string is usually called string, a loan word from English. In Puerto Rico, a Spanish snake term often used for G-string is gistro. It is mostly used by Reggaeton artists to refer to the lingerie style. In Argentina and Chile, G-string is widely known as colostracion. In those countries, cola means buttocks. Colaless means butt-less. In the Japanese language and in Cantonese, the G-string is widely known as T-back. It is because of its shape when seen from behind. The word is sometimes confused with tea bag. The term T-back is also commonly used in the Philippines. However, there are also several uses of the term T-back in English. They include Children's Literature Writer E.L. Konigsburg's T-backs, T-shirts, Coat and Suit. In other types of the Chinese language, the G-string is commonly called dingziku (丁字裤). That means t character pants. In Czech, Estonian, Finnish, German, and Spanish, the G-string is often called tanga. In Finnish, the plural string, strings, are as they are pants, not a pantsuit. In Polish, the G-string is usually called stringi, which is a ploughed loan word from English (literally: strings). In Australia, only the term G string is used. Thongs are a type of rubber shoes. In Hebrew, the G-string is called a hutini, a mixed word from the Hebrew word hut (meaning string) and bikini. References Wikimedia Commons has media related to G-string. Recommended from the blog: G-string lingerie is a very minimalist array of underwear. The underwear consists of a small triangle of fabric that provides strategic coverage, but little else. This small triangle of fabric is kept in place by a very narrow band, or rope, passing between the legs and connected to another that surrounds the waist. Such underwear is most often marketed towards and worn by women, but male versions, while less common, exist. This style of underwear is mostly worn under plain clothes, but neither is rarely encountered as part of swimwear. This variety of underwear has been worn in many cultures throughout human history. Such minimal clothing provides a modicum of support and provides a bare level of coverage that often meets decency requirements. The minimal nature of g-string lingerie and similar clothing has made them particularly popular in very warm climates. The importance of sleek lines in fashion has proven to be a driving force behind growing interest in g-string underwear in recent years. More substantial underwear tends to be visible through clothing that sticks to the body, either because it is tight or because it is made from very light materials. The visual effect this combination produces is considered undesirable. G-string underwear, or any other array of thong underwear, reduces this issue by greatly reducing the visible profile of the underwear, which makes for slimmer and cleaner lines in the overall ensemble. Male g-string underwear is more often intended to serve as a fashion statement than to provide any silhouette-slimming effect, however. This is mostly due to the fact that male fashions have gone away from the kind of very tight and thin clothes that would practically make underwear. Modified thongs, however, are often seen as swimwear for men. These varieties of underwear are best suited for situations that do not involve particularly rigorous activity. Such clothing is, due to their very modest size, not particularly durable. They can also be uncomfortable if worn for long periods of time or while performing any type of physical activity. In relatively permissive cultures, where the nudity taboo is either minimal or none existing, versions of g-string underwear are often encountered as swimwear. Such swimwear offers some practical advantages, including minimizing tan lines. It is also often worn to more effectively display the human form. Shopping for g-string underwear is relatively simple. In societies where such clothing is considered acceptable wear, they are widely available in ordinary retail outlets. A bigger clothing options are available for customers who choose to buy online. Buy. retail can be the best source of this variety of underwear for residents of countries where these clothing is not considered socially acceptable. Acceptable.
