NOTES Ch10 Photosynthesis.pptx here's the Ch. 8 reading guide due on Friday. AP Bio Ch. 8 Reading Guide.docx Here are the ch. 6 commentsHere is a little guide to Ch 7. Chapter 7 Review Describe the structural characteristics of the phospholipid bilayer and explain how they are associated with membrane function. What are the different functions of membrane proteins? What can we say about the structure of these (organic) proteins (based on the fact that they are embedded in the cell membrane)? What is the difference between simplified distribution and active shipping? What osmosis type and how does water determine its potential, the way in which water moves, and how much? What is the importance of active transport? Discuss the operation of the sodium potassium pump and the operation of the cotransport. Do you know how to: Determine the direction of diffusion and osmosis Calculation of water potential Calculates the dissolved potential AP Bio Ch. 7 Study Guide.docx Here are the notes in Chapter 6. If I can go to school on Monday, you'll have a test on Thursday. I received a number of emails asking for clarification on the winter assignment. Due Monday January 11 - Chapter 6 & Chapter 7 reading guides (attached) FYI - I know many people have found these answers online. I'm not forgetful. I know they exist, but be warned: copying is a quick and dirty way to get CIA about not being able to handle your time correctly. Am I against looking at the answers if you get stuck? No. I AM AGAINST simply copying the answer without even trying. It doesn't help the AP exam in May! New rules: you have to write everything by hand. No copy and paste.
