Or, if you need round-the-range support, you can choose our comprehensive HP LaserJet Pro M1212nf MFP annual maintenance contract. Common HP LaserJet Pro M1212nf MFP (CE841A) Error Codes - HP Error Code Problems:11 - Paper Out Explanation: If your printer is not made of paper, this probably means that there is a problem with a paper tray or paper sensor. What to do: Make sure the printer is on a completely flat surface. Check the paper trays for any damage and clean off any toner create. If the problem is not resolved, check the paper sensor or clean the opto sensor. HP Error Code:13 - Paper Jam Explanation: Your printer has hushed paper. Paper jam can occur in four stages: pickup, printing, merging and exit. Today's HP printers will tell you where the jam happened. If you use thick paper, check the HP guide to printer paper. What to do: Either follow the instructions on the screen, if any, or methodically check the paper jams in the areas available to the client printer. Do not try to use hard tools to remove paper with the risk of damage to the printer and yourself. If the problem persists, you may experience a hardware glitch. HP Error Code:16 - Toner Low Explanation: This usually means that your toner cartridge is either low on the toner or empty. However, this may mean that the remaining printer toner is unevenly distributed. What to do: Try removing the toner cartridge and gently shaking it evenly to distribute the remaining toner. After exhaustion, replace the cartridge. View additional error codes It did not make any fee for this service . Kenneth Spencer KA Spencer Software Other companies could not repair my printer and can only offer a lot of spare parts. Mahon and Co Ltd View more reviews Andrew asked: Our CP2035 printer periodically prints black and colored horizontal bars on the page. I did basic checks and tests and from searching the web it looks as if it could be caused by a faulty drive engine. Could you quote how much it will be repaired, is it confirmed that the cause? As for Andrew Matthew asked: My printer prints black lines vertically down the page. Z6_M0I02JG0K0MJS0ACJ03DO830I4 Some features the tool may not be available at this time. LaserJet Pro M1212nf uses a Cartridge Save 85A toner cartridges. The Save 85A Toner cartridge comes in black; The black cartridge prints 1,600 pages. The HP LaserJet Pro M1212nf is a multifunction printer that will fit directly into the home office or small business settings. This multi-functional laser monochrome printer can be used for faxing, printing, scanning and copying. Printing is done at a rate of up to 19 pages per minute with a monthly rate of 8,000 impressions. Copies can be increased to 400 percent with a resolution of up to 600 x dpi and up to 99 copies can be created at a time. Printing and scanning are even clearer at 1200 x 1200 dpi resolution. The FAx on the HP LaserJet Pro M1212nf is advanced and can send a fax at a speed of 33.6 Kbps when any transmission errors are corrected. The HP LaserJet Pro M1212nf is a lightweight and lightweight portable printer that measures 43.43 cm wide, 26.41 cm deep and 30.48 cm high. It is finished in a black exterior and weighs 8.3 kg without paper. The HP M1212nf MFP toner is designed to produce up to 1,600 pages per cartridge. In addition, the M1212nf also uses 64MB of memory and a Marvell 400 MHz processor to handle multiple incoming prints. In addition, Hit is easily installed on Linux, Windows XP, Windows 7, Windows Server 2008, Windows Vista, Windows Server 2003 and Apple Mac OS X 10.4 or later. Installing the new HP M1212nf cartridge is simple and won't require special technical capabilities. AdvantagesPrinting is remarkably clear and clear thanks to the use of HP FastRes 1200 technology to improve images. Printing can also be created within 8.5 seconds of standby. Duplex print available and is a big advantage for those who use this printer. HP LaserJet Pro M1212nf is energy efficient and uses minimum minimum consumption for exploitation. The flawed HP LaserJet Pro M1212nf does not offer color printing and may be the only major drawback of this multifunction printer. Another drawback of this printer is that the USB cable must be purchased separately and is the only way to connect the printer. test test HP laserjet m1212nf mfp printer: HP laserjet m1212nf mfp printing issue Hi world I have a strange problem with my HP laserjet m1212nf mfp printer after upgrading to Windows 10 on PC1 Updates made, tried to reinstall ect. Now that I've tried to print it says requires attantion But if there's something in that on PC1 and I've decided to print with another computer and any operating system, then quebec on PC1 prints. Any idea what could be the problem? I also ran problem solving and diagnostics for Windows 10 and HP (doctors 'something tool') can't remember the name Help please! Thanks for helping everyone, I managed to solve this problem. Soluction (Windows 10) Uninstalled printer once, Then, when you're looking for printers I chose that the printer wasn't on the list (although it has) installed using the printer's IP address, after that, it will ask if you want to save the driver or replace the network (that) printer and the success of the problem of printing a free driver In the future do not update the new printer LaserJet M1212nf MFP prints on the labels My Laserjet M1212nf MFP will not be printed on the labels. Choose tags as a paper type, I get a big pop-up telling me to download support. I use Avery 5160 labels I can print the same labels on plain paper without problems. Hello Michelle. When the printer is configured to current settings and receives a request for a written press that is not currently installed and configured in the printer, it will tell you that you can download the media requested for printing. According to the description, it seems that the printer did not say the type of media that are loaded into the tray. When he thinks that the driver you choose the label, the printer itself, he instructed out of the plain and asks that you download the labels. Below is the User Guide section. Page 57 has instructions to change the setting from the default document type. If this setting is changed to 'Labels' and 'Labels' from the driver, you should not receive a request for the control panel again. Please try this and see if the request disappears. HP Laserjet m1212nf mfp printer: can not install RINGS TO ANSWER Hi I have a printer HP Laserjet 1212nf. It has worked very well in the past. The fax has not been connected for the past year. Now I'm reunited and I can't send or receive faxes. I also see that I can't set the number of rings to answer - is that what I see on the fax machine? I press OK (0-0) Can I fix it? you all Hello @AmirTA, you tried to reset I sent you a personal message? If you can't change the settings of the printer, I would Update the firmware of the printer: LJM1130_M1210_FW_Upgrade_Security_signed - 20150405.exe This can be a hardware problem if the options are in the menu, you can not change them. You have to use the cable 2 son. Voicemail can interfere with the faxes that cross. One suggestion would be to get the installation of distinctive rings on the line or disable voicemail. You can set a fax to the manual, but you have to press the printer button every time to get a fax. Keep me informed. Thank you. M1212nf MFP prints but does not analyze in OS 10.9 OS 10.9, this printer drivers should be updated by a software update. However, no updates are available and the system does not recognize the device as an image capture device. Thus, it is not possible to scan with the help of previewing, capturing an image or printing and scanning the window. There is a note in the Help box that refers to HP scanning software. But I can't find anywhere. Will this hardware work properly in OS 10.9? Turns out I had the same problem as this guy: I reinstalled OS 10.9 and that solved the problem. LaserJet M1212nf MFP: Spring/roll popped out of scanner flat. I had paper jam when I scanned a few sheets in the feeder. I opened the scanner cover and the spring/roll came out. I'm still able to print and scan from the tray, but I'm not able to use the charger. I attached a picture of a piece that jumped. Does anyone know where he's going? Thank you in advance. Hello @deejaygreg, welcome to HP forums! I see that roll spring /jump our HP Laserjet M1212nf MFP printer. I'm happy to help you! The only suggestion I have for you is please contact HPtelephone Support for further assistance. To repair the printer / or replace. (After you fill in the information, you'll get a phone number.) If you don't live in the United States/Canada region, please click on the link below to get help from your region number. Selector of language countries. I hope it helps! If this, one of the posts on this topic, helped you solve this problem, please click Accept as a decision said post. To show you like it, or that they are grateful for my post, please tap the thumbs up below. If there is anything else I can do to help, please be sure to let me know! change the display of Chinese in English on LaserJet M1212nf MFP Hello, how to change the display of Chinese in English on the Printer LaserJet M1212nf MFP? its screen has been English before, but someone has changed the Chinese and we do not know how to change the display in English Hello, try the following steps: Click power to Product. On the control panel, click The Settings button to open the main menu. Click on the left arrow three times to select the system setting and press OK. Language Language Opens. Click OK to open the language menu. Press the right arrow key to select the language you want to show and then press OK. Click Back to return to the main menu. Best wishes. Wrong page number, print on LaserJet M1212nf MFP I recently bought a LaserJet M1212nf MFP. My computer is running Windows 7. I'm trying to print a document in Word that displays the page number and the number of pages at the bottom of the page (Page 1 of 3, Page 2/3, Page 3/3), that the document on the screen has the correct page numbers and the number of pages on each page. But on the printed document, page numbers read Page 1 of 1, Page 2, Page 3/3 2. How can I fix it so that it prints correctly? Thank you for your help! I hear what you're saying now. So I entered the Word document, and the field code displays page numbers as Page (NBPAGES). I noticed the shading of the field was defined when choosing, so I changed that to always. I printed the document and the page numbers are now correct to read! Thanks dansdaduk to direct me to the fix. AirPrint from PC to LaserJet M1212nf? Hello! I have an HP LaserJet M1212nf MFP and connected to the network via Ethernet and was glad when I saw that I could Airprint (wirelessly) in all 3 iPhones and iPads in the family! I wasn't very happy when my 3 window printers only ePrint using documents attached to the email and then only certain formats. I expect this lack of functionality of a specific Apple printer, but not an HP printer! Through Googleing I saw what I thought was the answer: trick my computer into thinking it could print (wirelessly) on an airprinter (LaserJet M1212nf) through the network, but nothing panned as... HP is really disappointed this time. Any suggestions? Thanks in advanceJoe Recommendation as I set up ... I think I solved it though. I installed the original with USB cable drivers, and when I disabled, I was looking for a change in configurations to print a wireless driver, I once reinstalled the drive locally doing nothing. When I used the server URL of the web printer and install the driver through the web server it installed the software again, but much less this time 50MB vs. 200MB, this newly installed printer will be printed as a network of all my Windows printer applications. It is presented by another icon, which suggests that there are not all features installed BYELIL USB as analysis. Every thing about this setup, tweaking ePrint to solve this problem with PC printing was a nightmare. HP really felt the job on the documentation understandably as far as I can tell. Thank you for your help. :-) How do I go back to an earlier version of El Capitan (from 10.11.3 to 10.11.1) with Time Machine? My HP LaserJet M475dw MFP printer worked with previous versions, but failed miserably recognize the device on the same Wi-Fi network now? How do I go back to an earlier version of El Capitan (from 10.11.3 to 10.11.1) with Time Machine? My HP LaserJet M475dw MFP printer worked with previous versions, but with a bang recognizes the device on the same Wi-Fi network now with 10.11.3. I would like to restore the previous version of the operating system without losing the data generated in various applications from 10.11.1. Fortunately, I've only had to use Time Machine rarely over the years, I don't know if you have to return the entire drive to your chosen date or it might somehow just go back to the previous OS state. Any suggestions are highly valued. OS X El Capitan: Go back to the previous version of OS X HP LaserJet 1536dnf Mfp: HP Laserjet 1536dnf MFP - Printing Printer My Office has a printer HP LaserJet 1536dnf MFP printer and copy machine, and it is only the last month of the year. This morning the computer was printing and copying fine, then in the middle of the printing work 21 page starts to show 4 marks of blackhadow - both on the right side of the page (starting from the top and up to about 4 inches before printing the next black shadow). Sometimes copying and printing. I tried to reset the printer by disabling the power for 10 minutes. I tried to clean it up with a cleaning setting. So far, nothing has worked. Cheers; If you could post a small picture of the issue I might better be able to determine the cause. Are the marks on the dash page in the media? Brands repeat down the page in a blurry identical scheme? The problem may have to do with the toner drum, but maybe a sheet of paper is stuck on the fuse unit. Unlike the intervention Anonymous_Fan is not an injket model and has no head printing or calibration alignment. I have followed this topic and am waiting for your answer. Kind of touches Jaclyn, where I can find drivers for my HP laserjet cm2320 mfp printer I couldn't find a driver for the hp color laserjet cm2320 mfp printer. My system is to win 7. I couldn't find a driver for the hp color laserjet cm2320 mfp printer. My system is to win 7. -You know what you have for the equipment: HP Color LaserJet CM2320 MFP So... What does HP tell you? Hardware support - including drivers and other software that allows the device to interact with other software and hardware - is the manufacturer of the hardware device. This printer has been essentially abandoned in the new HP operating systems all the time, it seems... Although it should work... You can get drivers and software you can HP. Choose a specific printer if... LaserJet M1212nf MFP: How can I download a driver for LaserJet. The site seems to be the endless cycle I try my Laserjet M1212nf MFP as a scanner. I'm trying to download the download So what can I do. Currently I can only print and copy. When I use hp website, it asks for my product and then when I choose it I am sent to picture it and it is said below to download the drivers, which takes me back to find my product. As a driver? How can I use my Laserjet as a scanner? I found an HP folder and was able to scan. It didn't put an icon on my desktop like my previous setup. When I spoke to support HP told me that they had technical difficulties with the website. They site immerses you in an endless loop. If you need support, you can call them directly at 1-800-474-6836. HP Laserjet M1212nf MFP professional I have HP Professional Laser M1212nf MFP. My computer is connected to the network and my printer eprint as well. I'm trying to open my eprint printer Hp web services, but it doesn't open, but it's re---lead me www.hpeprintcenter.com. Please how to activate the HP web services e-printer? Thank you, I'm waiting for your answer. Hello philip24, welcome to HP support forums. I understand that you get redirected to HP ePrintCenter trying to turn on web services for your laserjet M1212nf printer. Once the firmware printer is up to date, you should be able to get operational web services. If this is not the case, please let me know at what point things are ugly and the content of any error message. Also, could you let me know what operating system you're using on your computer (whatsmyos.com)? Thank you. The ink cartridge is the LaserJet M1212nf MFP and I get an error message to install the black cartridge. I installed and reinstalled the black ink cartridge for my LaserJet M1212nf MFP, and I get an error message to install a black print cartridge. I pointed out pretty in the reboot including the manual online, the fact to disable the printer, etc. help please. This bug-set black cartridge is usually caused by a piece of packaging material that remains on the cartridge. The document below should help you solve this problem. If that doesn't work, try making a hard reset. If it works, let me know. Toner flashes or install black cartridge print Message displayed on the control panel: To make a hard reset:1. Make sure the printer is on. Pull on the power cord from printer.3. Pull the power cord out of the wall. wait 30 seconds.5. Connect the printer and turn it on. On.
