After simply downloading a Wi-Fi network, choose a spoof to use and press start. Please note that there is no intention for Network Spoofer to include malicious features. This application is a nice demonstration of how vulnerable home networks are to simple attacks, with the permission of the network owner - try not to use a Network Spoofer on a business or other non-residential networks (for example, at school, university). It becomes very clear when Network Spoofer is used on a network, and the use of Network Spoofer will be considered malicious hacking by network administrators. Available on the Android Market. GNU General Public License version 3.0 (GPLv3) BambooHR is all-in-one HR software made for small and medium-sized businesses and the people who work there, like you. Our software makes it easy to collect, maintain and analyze your people's data, improve the way you hire talent, get new employees on board, manage compensation, and develop your corporate culture. It's designed to set you free to focus on what matters most: your people.
