The latest expansion of Bungie/Activision Destiny 2, Season of Opulence, is here, which means a few new – or sort of new – exoticisms have been added to the game. According to Dataminers, it looks like there are already about four new Exotics at stake, and a few more are potentially getting in the way. At the moment, there is officially only one new exotic weapon at stake: Tarrabah. This new weapon is SMG, which stores power that can be released whenever you want. As for the weapons on the way, Truth, the locator rocket launcher, is coming later. Bad Juju, the popular Exotic original Destiny, has also been made into a data mine that suggests the weapon may reach Destiny 2 in the near future. So far, the only armor found for Season of Opulence are updates to the original Destiny Exotics. Khepri's Sting has been upgraded to throw a smoke bomb if the enemy is melee with full energy. Astrocyte Verse still affects Warlock's Blink jumps, but it allows them to blink more often than get recovery, as it did in the first Destiny. Finally, Peregrine Greaves, which are basically exactly the same as before. If Titan uses charging capability in the air, you will deal with additional damage. At the moment, it is unclear how these can be obtained. While some (such as Truth) are earned by performing certain tasks, at least a few of these songs and weapons are likely to be dropped randomly. We'll probably know a lot more as the day progresses. Tarrabah — Submachine Gun Ravenous Beast: This weapon stores power when handling or receiving damage. When you are full, you should download to free the beast. Truth — Rocket Launcher Prototype Trueseeker: The rockets on this weapon have tracking. Lock on to targets as you aim for sightseeing. Khepri's Sting — Hunter Arms Touch of Venom: Hitting someone with full melee energy immediately throws a smoke bomb. Get Truesight in your smoke bomb effect. Astrocyte Verse — Warlock Helmet Move to Survive: Blink more and more often. The gun reads out of Blink quickly and radar stays upright. Peregrine Greaves — Titan Legs Peregrine Strike: All shoulder loading abilities (Seismic Strike, Hammer Strike or Shield Bash) deal with bonus damage when activated in the air. Op rocket launcher Truth from the original Destiny finally returns to Destiny 2 with the new Exotic Quest. Here's how to complete the mission and get truth in destiny 2's new season of Opulence. Destiny 2 Truth Exotic Quest Truth, a rocket launcher, as some fans would tell you, is a unique weapon that sends positioning rockets that turn corners and follow the target until they make contact. This is especially useful in PvP, where real players are smart enough to dodge bullets and take cover. To start acquiring a weapon, you must first direct Leviathan and beat Arunak boss there. This gives you a resurrected manuscript that Petra Venj can interpret in The Dreaming City. Go there to start the week's ascendant challenge in the lost sector of the Drowned Hopes Bay of Hopes at Diluvian Mists. Using Queensfoil tincture and some exotic armor, you need to perform several long jumps, avoiding a huge drop to get to the resurrected chest. Open it to collect a map that needs to be demolished before you can use it to find the Weapon of Truth. Thanks to the error you are making, you can collect all four pieces needed to extract the map from Petra. However, this will soon be fixed, so we will tell you the right way below. Each of the four parts of the map can be found first and then the corresponding challenges are to be completed. The locations of the four works are listed below. Make sure you use Queensfoil's Tincture to expose ascendant platforms so you can climb them. Vex milk lake in Cistern. Next to the entrance to Blind Well in Dreaming City. It's like a drop of prey from an orc on a nest ship on tangled shore. Play and completely any Nightfall punch to collect the last piece of the map. All objectives or requirements to be met for each of the above map pieces are listed below. The order of the list is the same as the list of the four map pieces above. Eliminate 100 nests on a tangled beach. Consume Queensfoil's tincture and eliminate 50 enemies on Nessus with a rocket launcher. Perfect Nightfall strike below handicap power 100. Kill 60 enemies in this state with any rocket launcher. Collect a Corsair Down badge from one of the Scorn enemies in Dreaming City to start the Corsair Down reward. Get the mini-boss and collect the artifact from Corsair's body. After collecting all these four pieces and removing them, perform the usual Manager nothing hits the boss's room by doing two things to show the Ascendant platforms and chest. Consume Queensfoil's tincture as usual, and this time also look for four bright relics and interact with them. Kill the warden's Servitor boss and jump on the newly established Ascendant platforms on the way to the chest. Open it to collect your well-deserved reward for the classic rocket launcher, Truth.
