Lewis county jail

The Lewis County Jail project was a two-step addition and renovation of the existing and fully operational structure of the county jail. The first phase included the addition of 192 detention beds in cell housing, dormitories and WERC (Work Ethic and Restitution Center) housing modules. The second phase of the project was compromised by the selective demolition of the existing prison facility, the construction of a new open booking facility, a bail office, a housing module for female inmates and the conversion of a dormitory for men's housing into a male housing module. You can watch the current inmates by clicking [HERE](#).
