Grand Hyatt WashingtonGeneral informationLocation1000 H Street NW, Washington, D.C., United States coordinates38°53′58″N 77°01′36″W﻿ / ﻿38.899467°N 77.026532°W﻿ / 38.899467; -77.026532 Coordinates: 38°53′58″N 77°01′36″W﻿ / ﻿38.899467°N 77.026532°W﻿ / 38.899467; -77.026532Open 9.C.com. Ever since the hotel opened in 2003, it was directly over the Washington Convention Center and was a convention center for many conventions. The conference centre was closed and demolished in 2004. CityCenterDC, a large office, residential and retail complex, now takes the site. About the Hotel Quadrangle Development broke ground at the Grand Hyatt Hotel on February 21, 1985. [1] The site was right across the street from the Washington Convention Center. [2] The structure was designed by RTKL Associates, an architectural firm based in Annapolis, Maryland. The hotel had a large atrium over the lobby, which ran onto the roof. The atrium was inspired by a similar structure, designed by John C. Portman Jr. and built in 1960. [4] During the groundbreaking, planners expected the hotel to have 950 rooms and \$130 million for construction. By June, the hotel's room count had fallen to 910, and by July the cost had risen to \$150 million. By December 1986, the number of rooms had fallen to 907 and the atrium had added 7,000 square feet (650 m2) of water function (lagoon and waterfall). [7] As built, the hotel had 907 rooms and was the third largest hotel in the city. The hotel paid \$140 million, which included a million dollars.[2] a 13-story skylit atrium above the lobby. In the lobby, the water function was a waterfall[2] which started at 35 feet (11 meters) from the lobby and ended with 75 feet under it. [4] The waterfall helped fill and distribute water in the 27,000 U.S. gallons (100,000 L) lagoon. [2] The hotel was five floors below[2] where the lagoon was on the ground floor. Banquets, ballrooms and meeting rooms were available on the second to fifth below the ground. [3] The lobby occupied the ground floor. Slightly raised platforms and bridges connected different parts of the lobby to each other, with stairs and escalators placed on the diagonals of H Street subterranea level. [3] The building was double-loaded in the corridors, which meant that the guest rooms were either in the atrium or outside the city. All inland rooms have a balcony overlooking the atrium. The northern walls of the atrium were decorated with Mediterranean-style pilasters, with Mediterranean-style arcades on the first and second floors, made up of segmental arches. A similar design motif existed on the eastern and western sides of the atrium, which resigned from the first ground. Campanile-like towers, which had structural support for lobby elevators, were set against the southern wall. Two gift shops adorned the lobby. The exterior of the hotel had rhythmic metal-framed windows with spandrels. The bottom of the building is in the earthy stone panels. The corners of the building have entrances to the hotel's lobby bar and delicate restaurant, which helped alleviate the large wall stock. Mansard's roof crossed the building. The roof line was permed by dormers, each topped by a pediment that helped hide utility systems and mechanical equipment on the roof. [3] In addition to the usual rooms, the hotel had two special rooms. The hotel's top floor was called Regency Club, and all these rooms (aimed at business travellers) came with special amenities. There were also three presidential suites at the hotel. Each president had a hot tub, sauna, wet bar and other amenities. Hirsh-Bedner's company ran an interior design scheme. [3] In public places there were marble floors[2] while the meeting and banquet level had white maple walls. A large number of original works were placed in the hotel's public spaces, including two sculptural pieces of Guy Dill's dome. Critical assessment Benjamin Forgey, the Washington Post's architecture critic, called hyatt architectural design grand, but not excellent. Although aesthetically pleasing, he called it cold, passionately designed. The elements of the structure were clichéd, but also effective, he concluded. [T]he building is better than a brutal case; we see architects dutifully struck many of the right keys to urban design without creating a perfectly pleasant, let alone memorable melody. [3] The 2012 sale of Quadrangle Development put the now 888-room Grand Hyatt Hotel up for sale, and 2011 Host Hotels & Resorts agreed to put a \$15 million deposit on the building to avoid another supply of entertainment. The host, however, withdrew in 2012, however, the Host turned itself in, and 22. [9] The sale was the largest hotel sale to date in the history of the District of Columbia. We can't all get a miracle when I can no longer make a reservation. Washington. [10] Rating In March 2017, Cvent, an event management company, ranked the Grand Hyatt Washington 51st on its annual list of top U.S. hotels for meetings.
