The lid is unlocked after load detection and spin. If you press the lid (if locked at that time), pause the cycle and the pause indicator light flashes. Press restart to continue the cycle. If the remain in the machine, select the Drain and Spin cycle to clear the basket and spin water out of the washing machine basket. NOTE: The machine is automatically interrupted and drained when there is water and the lid is open for 15 minutes or the unit is paused for 24 hours with the lid closed. Select cycle and press Start to start the new cycle. B Cycle status lightShow whether the washer is in the Fill, Soak, Wash, Rinse, or Spin section. If a off-balance state is detected by the disc, the Spin lamp flashes during the remaining part of the cycle and will remain illuminated for a short time after cycle completion. When this happens, the disc performs measures to straighten the out-of-balance state and complete the cycle normally. In some cases, the disc may not be able to balance the load and spin up to full speed. If you notice that the load is more wet than normal at the end of the cycle, distribute the load evenly in the washbasin and run a Drain & Spin cycle. C Load size (on some models)Add detergent to the bottom of the basket and fabric softener to the dispenser (on some models) before loading clothes. Loosely place items in the washing machine basket. Overload can adversely affect washing performance. Adjust the load size accordingly.
