Lost coast plant therapy near me

KILL SOFT BODY INSECTS, THEIR LARVAE AND EGGS, DUSTY MUSHROOMS, MOLD AND FUNGI IN CONTACT WITHOUT USING POISON! After saturation of the entire plant, our spray adheres to the target insect, egg box or larvae. Its active ingredients then cause interruption of breathing and digestion. It also penetrates to dehydrate your entire body. Insects can never become immune to this product because they cannot become immune to suffocation or dehydration. The Lost Coast Plant Therapy was designed to suffocate and dehydrate in contact. That's why it's important to thoroughly saturate your infested plants. If the product does not contact the insect, it cannot suffocate or dehydrate it. Many insects and diseases die in contact with a single application. Others, take the repeated application to eliminate the problem. Our unique formula does not emphasize the plant and will not harm flowers, fruits or vegetables, as long as it is applied under proper lighting and low heat conditions. Lost layer plant therapy has been laboratory tested by CW Analytical (among others) and has been found to leave no residue; this means that it is safe for your soil, food and ornamental plants, pets and people. With the correct application our product can be used on the day of harvest. eBay Item Number:253526429108 Seller assumes full responsibility for this listing. Last updated November 28, 2020 14:53:01 PST View all revisions Condition: New: A new, unused, un opened item with no damage to its original packaging (where packaging is applicable). The packaging must be the same as that found in a retail store, unless the item is handmade or packaged by the manufacturer in non-retail packaging, such as an unprinted box or plastic bag. Mehr LOST COAST PLANT THERAPY KILLS SOFT BODY INSECTS, ITS LARVAE AND EGGS, POWDERY MILDEW, MOLD AND FUNGUS IN CONTACT WITHOUT USING POISON! saturation of the entire plant, our spray adheres to the target insect, egg box or larvae. Its active ingredients then cause interruption of breathing and digestion. It also penetrates to dehydrate your entire body. Insects can never become immune to this product because they cannot dehydration. The Lost Coast Plant Therapy was designed to suffocate and dehydrate in contact. That's why it's important to thoroughly saturate your infested plants. If the product does not contact the insect, it cannot suffocate or dehydrate it. Many insects and diseases die in contact with a single application. Others, take the repeated application to eliminate the problem. Our unique formula does not emphasize the plant and will not harm flowers, fruits or vegetables, as long as it is applied under adequate lighting conditions. Lost coating plant therapy has been laboratory tested by CW Analytical and has been found to leave no residue; this means that it is safe for your water, soil, food and ornamental plants, pets and people. With the correct application our product can be used on the day of harvest. Dry without residue. Safe to apply daily and will not interfere with the development of the plant. Sure to apply the day of harvest and as often as necessary throughout the growth. Safe for food and medicinal plants. Biodegradable. PBA Free or HDPE grade bottles. 1 ounce of concentrate safety DATA added to the water. This is the dilution that customers will apply to their plants. R.E.I. (RE-ENTRY INTERVAL) AT 0 HOURS. KILLED INSECTS IN CONTACT INCLUDE SOFT BODY INSECTS, THEIR EGGS AND LARVAE: The smaller the insect, the faster it works. Larger soft-bodied insects may take longer to die or require repeated application. Contact with our product begins the process of death. Spider Mites: Works on all kinds of mites, including red spider mites, two spotted spider mites and their eggs. Spray every other day for a week and repeat as needed. Broad Mites Russet Mites - Spray every other day for two weeks or as needed. Don't forget to spray the stems down and where the petioles of the leaves meet the underside of the leaves. Mushroom Gnats White Flies Thrips Aphids Root Knot Nematodes and more... For most insects, spray every other day for a week, or as needed. MOLD, MOLD AND FUNGAL SPORES DIE IN CONTACT. LOST COAST PLANT THERAPY CAN ALSO BE USED AS A PREVENTATIVE. Powdery Mildew: Our product kills the spores on contact and changes the pH of the plant surface and washes the dusty mold already present. Better to use once a week until harvest day if you have seen PM shape on leaf surfaces. Mold: kills molds in contact, stops their growth and washes it. Blight Leaf Rust SAFE TO HANDLE AND APPLY: No more concerns about accidentally receiving poisonous or fungicide insecticide on the skin or inhaling it. The of lost shore plants is completely safe and non-toxic to put on your hands and skin. As the product dries, its active ingredients evaporate without leaving residue on you or plants. Although the ingredients in our concentrate are also not irritating to the skin, be careful when handling. Waste-free: This product product cause any test failure and will pass strict parts per billion laboratory tests. For more products like this, check out the Test Cleaning category. Common sense caution: Keep out of the eyes and mouth. Keep out of reach of children. MIX DIRECTIONS: SHARE WELL before measuring concentrate. You're looking for a milky consistency. Add purified water to your sprayer or application tank. Clean the sprayer lines from the previous use and purge the lines back into the tank or sprayer. Add 2 tablespoons (1 oz) of concentrate per 1 gallon of water. Shake the sprayer again before use. Make sure the plants are watered before spraying. Shake as needed during use, approximately every 5 minutes. Close the concentrate lid securely when not in use. DO NOT STORE THE PRODUCT IN DIRECT SUNLIGHT*** Always keep the lid tightly closed when not in use. Do not use in extreme heat. Use when the temperature is 80 degrees or less. Always apply in low light (early morning or evening) ON OUR INGREDIENTS: Seven simple ingredients of the highest quality make up the Plant Therapy of the Lost Coast. We only use biodegradable, food-quality ingredients and cosmetics. LABEL ACTIVE INGREDIENTS: Soybean oil is organic, food grade and non-GMO. ACTION: Coat insects and suffocate in contact. Mistakes cannot build immunity to suffocation. Mint essential oil is organic and food-quality. ACTION: Natural insect repellent. Citric acid is organic, food grade. ACTION: Adjusts the pH of the plant surface. Preservative. This ingredient makes the pH of the plant inhospited for dusty mold and kills the spores in contact due to its antifungal properties. LABEL INACTIVE INGREDIENTS: Ecocert Soap is a proprietary blend, certified for use in organic products and from a sustainable plant source. ACTION: Reduces the surface tension of water/liquid, which helps it spread across the surface of anything to which it is applied. An emulsifier (helps all other ingredients stay mixed.) It also penetrates the body cover of the insect and alters the cell membrane. Cellular content is filtered causing target pests to melt and die. Isopropyl alcohol is cosmetic grade (skin safe). ACTION: Isopropyl alcohol dehydrates insects quickly and helps evaporate the diluted plant product safely without leaving residue or burning. Sodium citrate is food-quality. ACTION: Preservative, this ingredient also dampens the pH to keep it stable; which makes it impossible for dusty mold and spores live in the plant. Water is purified, reverse mosis. ACTION: Emulsifying and slimming agent. Lost Coast Plant Therapy is not registered in the E.P.A. as it qualifies for the exemption under section 25(b) of FIFRA as a minimum risk pesticide. Disclaimer: You assume full responsibility for the proper use of this product. The warranty is limited to the purchase price of this product. Un guaranteed results. The softest and most welcoming T-shirts and beyond comfortable hoodies; you're going to be so happy to have one. Sizes: S, M, L, XL, 2XL SHOP NOW CREATED FOR PEOPLE WHO LOVE THIS PLANET! COST PLANT THERAPY LOST OUR HISTORY For over 45 years we have been enthusiastic organic gardeners. Our love of plants and the environment inspired the creation of The Lost Coast Plant Therapy. We have all seen the devastating effects of poisonous pesticides, insecticides and fungicides that contaminate the water, soil, food and crops in which they are used. Not to mention the health effects of those who work on farms around the world. We knew that there had to be a workaround that would do nothing more harm than the intended objective; soft bodily insects, dusty fungi, fungi and mold. READ MORE CONTACT What can we do for you today? Don't be shy, just call us or email us and we will do our best to respond to any questions you may have. We'll put ourselves in place as soon as possible! CONTACT US Wash dusty mold, rust and mold on tomatoes and all vegetables!
