Over the decades, Russell Hobbs has been at the forefront of our national thirst for hot Breastfeed with fast, easy-to-use, stylish electric kettles. During this time, Russell Hobbs can take advantage of many clever innovations – the first battery-running kettle, the first base with 360-degree rotation, the first fast-boiling Kettle, the first that automatically shuts down after the water boils, and so on. 62 Migliori recensioni Le piú recenti Migliori recensioni Visualizza tutte le recensioni Visualizza tutte le immagini immagini clienti Migliori recensioni Le piú recenti Migliori recensioni Over the years, the kettles have evolved from the traditional kettle that boiled water over the stove to electric versions with water filtration for the purest brew. We have a variety of kettles for you to choose from; Jug boilers, triangle designs, even retro designs that look like traditional kettles along with a variety of colors and styles to suit your space. Our kettles are fast, easy to use, energy efficient and precise. Whether you're looking for a stylish cream kettle to complement your kitchen or a beautiful filter boiler that's both stunning and practical as it helps to remove water impurities in your water, whatever you're looking for, our fantastic kettle range will certainly have it. Choosing the best kettle it might seem like there isn't much to buy the right kettle, but there are a number of things you should consider before deciding which kettle suits you best. First, speed is a key factor - for most people, the speed at which your kettle boils water is important. Temperature options for tea connoisseurs can make the difference, for example, while your black tea might taste best with boiled water, your green tea will need a lower temperature to bring out the flavors. Cost is also important, prices vary greatly depending on your preferences and size - do you usually make just one cup of tea for one or a cup of tea for 4 and maybe coffee for 2? Your daily habits will also help you choose the size of the kettle you need. Stylish kettle for any homelf you go for a more traditional style kettle to complement your décor, then you will love our nostalgic Stove Top kettle. You can use your cooking pot in your home for a truly authentic retro look or take it with you for camping or barbecue. Metal boilers offer a quick clean option that is more durable than plastic and invents without taste or odour. Glass boilers look super stylish in your kitchen and because they keep transparent they clean is super simple. You can clearly see the water level from any angle and they are hygienically perfect. It's also fun to watch and cook the water bubble! We also have illuminated kettles to add a touch of excitement and unique outstanding function to your kitchen. And if you're not a morning person, the kettle can seem quite noisy, so our special assortment of quiet boilers is here to give you a brew without whistling and fussing. Kettle, the lastDe'Longhi kettleare! are distinctive kettles designed in Italy to add a special touch of style to your kitchen with distinctive shapes and patterns. Dualit kettles produce classic kettles as well as the Domus kettle with easy grip silicone handle is heat resistant and the folding lid has a large handle with wide mouth for easy opening and filling. Kettles like the Kettles are a must for fans of contemporary design and those who regularly like the flexibility of updating the look. And the lite Jug Kettle, a great all-rounder in a range of styles, colors and sizes - you'll find a Lite Kettle that fits most kitchen designs. Morphy Richards kettles are a mix of jug boiler, traditional kettle and water filter boiler. Finally, Breville kettles are modern stylish jug designs made of plastic, metal or glass. And if you're planning a weekend camping or caravanning and you can't imagine it without your morning cuppa, take a look at our range of travel boilers to make sure you're all ready for everything your outdoor adventures have in stock. The Russell Hobbs Kettle 21600-57 Kettle is an electric kettle characterized by very interesting elegance and functionality, which make it a very special kettle and differ from the others that can be found on the market. In particular, this kettle has a jug made entirely of glass, so transparent, from which you can put the water in. The glass boiler is manufactured in such a way that it is particularly hygienic and resistant. In addition, the transparency of the jug adds an extra touch to this boiler, which turns out to be aesthetically beautiful. But let's find out what the best features of this kettle are. Water tankThe Russell Hobbs kettle 21600-57 kettle has a water volume of about 1.7 liters. It is an excellent amount of water to bring to the boil, in fact it corresponds to about 7 full cups. The water capacity of this kettle makes it really perfect not only to prepare tea and herbal teas, but also to heat large amounts of water and thus halve the preparation time in the kitchen. With a water volume that is more than one and a half liters is really a big plus of this kettle. In addition, the transparent jug allows to keep under control, both the amount of water inserted into the kettle and the moment when you almost cook. The 21600-57 kettle from Russell Hobbs Kettle has a very elegant and modern design with the best of the art. It is indeed a very special kettle and certainly with a refined aesthetic and very nice to see. The kettle jug is completely transparent and is enriched on the floor by LEDs, which give the kettle a special nuance. The glass used for the jug is durable and practical to use as well as absolutely safe and non-toxic. The other materials of the manufacture of the kettle are also of excellent quality, in fact they are and stainless steel, two materials that guarantee safety and excellent yield. Finally, the kettle is kettle from a convenient removable base to which a practical rewindable cable is attached. ResistanceThe strength of this Russell Hobbs Kettle kettle is a normal boiler resistor, but it is in a hidden position. With a hidden resistance and therefore no contact with water, will guarantee you a better yield of resistance, but also of the kettle itself, which will have a significantly better durability. Even with hidden resistance and not in contact with water will be an additional protection for you; in fact, the two elements will never come into contact, in this way you will not risk contaminating water with other substances. Features and accessoriesThis special kettle model from the brand Russell Hobbs Kettle is characterized by many interesting features that make it practical and functional. First of all, this kettle is characterized by a very interesting function, in fact you can use this kettle to prepare even a cup of hot water; By activating this feature, you save time and, above all, energy. In addition, this kettle has a device that immediately indicates the amount of water you will put into the jug. In addition, the lid is made to open at the touch of a button, so that it is also convenient to use. Finally, the kettle is equipped with a 360-degree rotary base on which the jug should be rested. At the base is connected the cable to which the kettle is connected to the current, it is a durable and removable cable very practical. Power and Power ConsumptionThe Russell Hobbs Kettle 21600-57 Kettle has a maximum power of 2200 W. It is an excellent energy capacity that allows you to get hot water in a really short time and also to save electricity. In fact, the kettle manages to heat both small and large amounts of water in no time, usually in about 2 or 3 minutes. This kettle, although it has a large water capacity, still manages to reduce energy consumption; in fact, the energy consumption is really forgotten compared to other kettles. Thanks to the power with which it is equipped, you will be able to use this kettle very effectively to prepare even up to 7 cups of hot water. Value for moneyThe Russell Hobbs Kettle 21600-57 Kettle is an electric kettle characterized by an extremely modern and elegant design and some very interesting features that make it easy to use but at the same time very practical. The water capacity of 1.7 liters and the possibility to use even small amounts of water-saving make it a really versatile kettle. Although it is not compatible with Thermostat that allows you to adjust the temperature of the water, this kettle is still an excellent choice for those looking for a product that combines quality and elegance. The excellent properties and quality of this kettle make it a good value for money. Price.
