Talstar professional insecticide amazon

© 1996-2014, Amazon.com, Inc. or its affiliates © 1996-2014, Amazon.com, Inc. or its affiliates © 1996-2014, Amazon.com, Inc. or its affiliates Active substance: Bifenthrin - 0.2% DESCRIPTION: Talstar PL Granular Insecticide are used to fight ants (including imported fire ants), spiders, fleas, ticks, worms, crickets, and almost all other insect pests on lawns, in landscaped areas and gardens, and perimeter of residential, institutional, public, commercial and industrial buildings, parks, recreational and athletic areas. Talstar PL releases chemicals over time when it rains. An application of Talstar PL can protect lawn areas for 2 to 3 months. It is safe from non-target animals such as birds, pets and other mammals. USE: Talstar PL Granular Insecticide is generally used in two ways: It can be applied as a perimeter barrier directed into a five to ten foot band around your home, or it can generally be broadcast all over your garden including landscaped areas. A normal application usually consists of three to five pounds of product. It is recommended to apply Talstar PL with an Earthway spreader. A bag of 25 pounds covers 5,000 to 10,000 square feet. Always read the label. NOT FOR SALE IN: AK FOR SCORPIONS CONTROL To ensure optimal control, you should treat the construction perimeter at dusk to prevent scorpions from entering the building in the open air. Scorpions are hidden in cracks and voids during the day and are active at night at temperatures above 77°F/25°C. Rest areas can be identified at night using a blacklight (UV lamp) because scorpions fluoresce. These areas also need to be dealt with. Prior to treatment, to increase the efficacy of treatment, remove trash, debris, or firewood that scorpions can use as resting places. Active Ingredient Rate per Acre 0.2 - 0.4 lbs.ai/A Talstar PL Rate per Acre - 100 - 200 lbs. Talstar PL rate per 1000 m² - 2.3 - 4.6 lbs. RESTRICTIONS: Bring no more than 0.2 lb. active substance (a.i.) per hectare per application to residential sites of use (i.e. around private dwellings, apartment buildings, apartment buildings, non-agricultural outbuildings, non-commercial greenhouses, pre- or day care facilities). Can be applied to up to 0.4 lb. a.i. per hectare per application to non-residential use sites (i.e. around institutional, public, commercial or industrial buildings; parks; recreation areas or sports fields). Do not emit more than 0.4 pounds. A.I. (200 lbs. Talstar PL Granular) per Acre per year. Not for use on golf courses, sod farms, in commercial greenhouses or on grass grown for seed. Page 2 Talstar P is a liquid concentrate insecticide containing bifenthrin, a synthetic pyrethroid. Pyrethroids work by disrupting an insect's nervous system and causing a weakened state, followed by death. Talstar P offers no immediate knockdown of pests, rather, pests pick up the remaining active active per contact. Talstar P is a repellent insecticide because it works fast enough that social insects like ants cannot make a pheromone trail. This means that Talstar P will be most effective as a barrier with a thorough application. Talstar P remainder can last up to 3 months. Talstar P Sizes Available Talstar P comes in different sizes to help you get exactly the amount you need. Talstar 3/4 Gallon (96 ounces) is one of our most popular sizes. Talstar also comes in Gallon (128 oz), Quart (32 oz), and Pint (16 oz) sizes. Target Insects Talstar P controls more than 75 different insects - everything from stinkbugs, bedbugs, spiders, mosquitoes, cockroaches, ticks and fleas to pillbugs, chinch bugs, earworms, centipedes, Dichondra Flea beetles, spitbugs and more. It is very effective on Japanese beetles, clover mites, ants, termites, spiders, scorpions, cockroaches, army worms, meals, mites, grasshoppers, pillbugs, cutworms, sod webworms, beetles, leaf miners, box elder bugs, bees, wasps, sows, crickets, and peat and ornamental pests. See below for the full list. INSECTS CONTROLLED: Adelgids, American Dog Tick, Annual Bluegrass Weevil, Ants, Aphids, ArmyWorms, Bagworms, Banks Grass Mite, Bedbugs, LadyBeetle, Bees, Bite Armyworm, Beetles, Billbugs (adult), Biting Flies, Black Turfgrass Ataenuis, (Adult), Black Vine Weevil, Boxelder Bugs, Brown Soft Scales, Broad Mites, Budworms, California Red Scale, Carpenter Ants, Centipedes, Chiggers, Chinch Bugs, Cicadas, Cigarette Beetles, Citrus Thrips, Clover Mites, Cockroaches, Crane Flies, Cricket, Cutworms, Dermestid Beetles, Diaprepes, Dichondra Flea Beetles, Earwigs, Elm Leaf Beetles, European Red Mites, Trap Webworms, Fire Ants, Fire Brats, Fleas, Flea Beetles, Flies, Meelkevers, Fungal Mosquitoes (Adults), Gnats, Grain Weevils, Grasshoppers, Gypsy Moth Caterpillars, Hornets, Imported Fire Ants, Indian Meal Moths, Japanese Beetles, Lace Bugs, Leaf Feeding Caterpillars, Leafhoppers, Leafrollers, Lesser Grain Borers, Mealybugs, Merchant Grain Beetles, Midges, Milliped Caterpillars, Leafhoppers, Leafrollers, Lesser Grain Borers, Mealyrs , Merchant Grain Beetles, Midges, Milliped Caterpillars, Leafhoppers, Leafrollers, Lesser Grainers, Mealyrs, Mealyrs, Merchant Grains, , Mole Cricket, Mosquitoes, Moths, Old House Borers, Orchid Weevil, Pecan Leaf Scorch Mite, Pillbugs, Pine Shoot Beetle, Plant Bugs, Powder Post Beetles, Psociden, Psyllids, Rice Moths, Sawfly Larvae, Sawtoothed Grain Beetles, Scale Crawlers, Scorpions, Silverfish, Sod Webworms, Sowbugs (Pillbugs), Spider Mites, Spiders (including Black Widow, Brown Recluse and Hobo Spiders), Spittlebugs, Springtails, Stored Product Pests, Caterpillar Tents, Termites, Thrips, Ticks (including Brown Dog Ticks), Tip Moths, Tobacco Moths, Treehoppers, Borers, Warehouse Beetles, Vinegar (Fruit) Flies, Weevils, Whiteflies, Wood-infested Beetles Target Uses Talstar P is an ideal broad spectrum insecticide for prevention, maintenance or active infections of more than 75 pests. Talstar P offers a long-standing barrier around the structures for creeping insects such as ants, beetles and cockroaches; protects ornamental plants from dangerous pests such as mealybugs; helps control annoying flying insects such as mosquitoes; protects lawns from peat pests such as kinch bugs; and even has an extensive label to include the treatment of stink bugs. See below for the full list of approved usage sites. Application instructions inside, outside and around the perimeter of structures, food treatment areas, lawns, grass and ornamental trees and shrubs. NOT for use on food and vegetable gardens. Talstar is best fitted with a nozzle. Always read the label in full before use. Yield 1 pint (16 oz.) concentrate delivers 16-32 liters of finished solution. 1 quarter (32 oz.) concentrate delivers 32-96 liters of finished solution. 3/4 gallon (96 oz.) concentrate delivers 96-192 gallons of finished solution. 1 gallon (128 oz.) concentrate delivers 128-256 gallons of finished solution or covers 128,000 to 256,000 square feet for broadcast application. Standard application dilution rates / mixing speeds: 0.33 oz./gallon of water – 0.02% - prevention, low level infections 0.5 oz./gallon of water - 0.031% - general indoor or outdoor use 1.0 oz./gallon of water - 0.06% - serious infections, less frequent treatments, longer remaining, faster knockdown 1 liter finished solution should cover 1,000 square feet when using a hand pump nozzle. * See the video above for general use mixing and application instruction using a sprinkler like the Chapin premier 1 liter nozzle. Use in the following areas: indoors and outdoors on residential, institutional, public, commercial and industrial buildings, greenhouses, animal confinement facilities/ livestock farms, kennels, food treatment facilities and lawns, ornamental plants, parks, recreation areas and sports fields; trees, shrubs, deciduous plants, non-bearing fruit and nut trees, and flowers in greenhouses, inland, including hotels, shopping centres, office buildings, etc., and outdoor plants, such as around houses, parks, institutional buildings, recreation areas, sports fields and lawns at home (non-carrying crops are multi-annual crops that will not produce a harvestable raw material for raw materials during the application season); feed and food treatment establishments, animal confinement facilities, kennels, animal feed activities, animal feed and indoor/round/under structures Within use 0.33 to 1 liquid oz. per litre of water for pest residue control in buildings and structures and in modes of transport. Apply as crack and crack, pinstream, spot, coarse, low pressure spray (25 psi or less) or with a brush. Apply as a coarse, low pressure, crack and crack or spot spray on areas where pests hides, such as skirting boards, corners, storage rooms, cabinets, around water pipes, doors and windows, windows, and eaves, behind and under refrigerators, cabinets, sinks, ovens, stoves, the underside of shelves, drawers and similar areas. Don't use it as a space spray. Pay special attention to cracks and crevices. Limit the application of repetition to a maximum of once every seven days. Talstar P can be converted into a foam for the residual treatment of voids or as a spot spray when visual marking is desired. Bedbug Control A thorough application should be applied to cracks and crevices where evidence of bedbugs occurs. This includes bed frames, box springs, inside empty dressers and wardrobes and carpet edges, high and low wall frames and wallpaper edges. Do not use this product on bedding, pillows, mattresses or clothing. Remove all clothing and other items from dressers or wardrobes for the application. Allow all treated areas to dry well before use. Not recommended for use as the only protection against bedbugs. If evidence of bedbugs is found in/on mattresses, use products approved for this use. Outside General application for creeping pests - Mix 0.5 or 1 oz. of Talstar P in one gallon of water and apply to the outside foundation of the house, about 3 feet up the side of the house and 2 feet out of the house. Also spray access points in the house, such as around windows, pipes, doorways, etc. For general preventive treatment, bring Talstar P once every 3 months. Repeat applications may be limited to no more than once every seven days when using 0.33 oz./bile. Water. For the high utilization rate of 1.0 oz. per gallon of water, apply no more than once every four weeks. Mosquitoes In addition to the treatment around the foundation of the house as mentioned above, talstar P sprays on the underside of leaves on the lower hanging branches of trees around the backyard or area where mosquitoes are a problem. You also spray the underside of leaves on to shrubs and ornamental plants. Does not apply when the wind speed exceeds 10 MPH. Higher application volumes can be used to obtain the desired coverage of dense vegetation or landscaping materials. Bagworms Use 0.125 to 0.25 oz. per 1,000 square meters (or 5.4 - 10.8 oz. per 100 gals.). Apply as a full cover sheet spray. Using a Chapin Slide Pump Sprayer will help to get higher in trees. Apply when larvae begin to hatch and spray larvae directly. Applications when larvae are young will be most effective. Chinch Bugs Use 0.5 to 1.0 oz. per 1,000 square meters. Chinch Bugs plague the base of grass plants and are often found in the reed layer. Irrigation of the grass area before treatment will optimise the penetration of the insecticide to the area where the are located. Use higher-volume applications if the cane layer is too high or if a relatively long cutting height is maintained. Chinch Bugs can be one of the most difficult pests to control in grasses and the higher application application (Up to 1 liquid oz. per 1000 square meters) may be needed to control populations that contain both nymphs and adults during the middle of summer. Lawn applications A hose end spray such as the Chapin hose end nozzle can be used to apply Talstar P for lawn pests. Use up to 1.0 oz. per 1,000 square meters. Higher volume applications may be more effective with some pests, so you can calibrate the nozzle to a lower rate (e.g. 0.25 oz/gal.) and use more water to cover an area of 1,000 square meters. Stink Bugs Talstar P has an extensive label for treating Stink Bugs indoors, outdoors, on lawns, and on ornamental plants. Use 0.33 to 1.0 oz./bile. of water and treat around door frames, window frames, vents, eaves, around the bottom of your foundation, and any other crack or crack where an insect might gain access, once a month of August-November. Termite applications Talstar P can be used for pre-construction or post-construction prevention of underground termites. Use 1.0 oz/gal. (0.06% solution) for most termite applications. For preconstruction horizontal barriers (such as under a concrete slab), use 1 liter solution per 10 square meters. For perimeter barrier treatments, use 4 liter solution per 10 linear feet. See our article How to Do a Termite Treatment, for further instructions on perimeter termite treatments. See product label for full instructions on how to use Talstar P to operate underground termites. Pet safe functions when dry Virtually no odor or stains Easy to remember mixing speed Handy squeeze and pour container makes measuring and mixing easy Talstar P Professional Insecticide can be tank-mixed with adjuvant and with other pesticides, including insect growth regulators. Talstar One is pests and easy for everything else: Talstar One multi-insecticide is water-based and does not contain an alpha cyano group. That means you can use it inside out. You apply it to a larger perimeter area. Non-irritating, non-staining and does not contain fragrant or plant-damaging solvents. Compatible with herbicides, fungicides, insecticides and liquid fertilizers. Once it dries, it is virtually impossible to tell where it is sprayed. So there are no ugly remains and phytotoxicity. Talstar One is ants and general household pests, but easy for the household. Talstar One is labeled for over 75 different pests and offers quick knockdown and long-lasting control of even the heaviest lawn and ornamental pests. Talstar multi-insecticide creates a long-standing barrier against insect pests. Keep cockroaches, ants and Insects from your home primarily by treating the perimeter foundation every 2-3 months. Talstar One is labelled for food processing areas such as kitchens, restaurants, supermarkets and food processing companies. Talstar P has one of the most complete labels of an insecticide that Talstar P has broad label you count on. A true miticide, Talstar P controls more than 75 different insects - everything from spiders, mosquitoes, cockroaches, ticks and fleas to pillbugs, chinch bugs, earwigs and centipedes. It provides quick knockdown and prolonged control of even the heaviest lawn and ornamental pests. Plus, it checks all types of ants knocking them out and keeping them out with long remaining. Talstar P multi-insecticide is the only insecticide needed Talstar P insecticide has all the features and benefits you have come to rely on from the Talstar brand of products. It has the proven performance and protection of its active ingredient, bifenthrin. It has long remaining control of termites and 75 other pests. The broad label covers everything from pre- and post-construction termite treatment, indoor and outdoor pest control, peat and ornamental applications and food treatment areas. Talstar P is formulated for long-term effectiveness Talstar P multi-insecticide has the active ingredient bifenthrin, which has a unique chemical structure like that of no other pyrethroid. For termite control, that means the longest average residual in the industry and a retreat rate well below industry averages. In fact, Talstar One has averaged more than 12 years at 100% control in all USDA test sites and 16 years and still counting at USDA sites in Florida and Arizona. Plus it provides a barrier that termites can't penetrate, for superior structural protection. Additional tips for use Allow at least 30 minutes after application before pets or children are included in a treatment area. For best results, leave 24 hours after outdoor application for expected rainfall or water. Some outdoor applications may need to be irrigated before or after the application. Use with an IGR such as NyGuard IGR to control all life stages of insects such as fleas. Save from direct sunlight and extreme temperatures. Concentrate should be viable for 3-5 years. If a separation occurs, shake well before use. Bring no more than 1 oz. Talstar P per 1,000 square meters. Compare with: Bifen I/T Page 2 Displaying 1 to 30 (from 2151 reviews) Works better than Diazinon By Jay on 09/18/2008 I bought a quarter of Talstar One two years ago. It works better than I thought it would. I spray around the perimeter of the house about 2-3 times a year and it keeps all the pests away. I used Diazinon before, but those results pale in comparison to Talstar One. I hope you have this product for a long time to come. Was this review helpful to you? YesNo 612 of the 636 people found this review useful Great Stuff By Linda on 04/30/2010 We live in the high desert of North AZ where there are scorpions, centipedes and plenty of other Insects. Within a few weeks of moving into our new home, the scorpions started to appear in the house. We have several dogs and cats and I was was for their safety and our own. A friend recommended a professional pest control company and things improved dramatically after the first treatment. We signed up for regular treatment which was every 3 months. Unfortunately, it was down to their schedule which seemed to change constantly and it became very awkward for us. They might even want to spray while it rained. The last time the pest control was here my husband asked what they were using and the guy was more than willing to tell him it was Talstar P. After my husband told me the name I googled and found DoMyOwnPestControl. We then decided to do our own pest control and not be at the mercy of someone else's schedule. It's very simple, effective and, needless to say, costs a lot less money - a quarter took us almost two years and cost about

the same as one of the visits from the pest control company. More importantly, we spray at the optimal time and under the best weather conditions. Was this review helpful to you? YesNo 594 of the 613 people found this review useful Not to break down quickly in the sunlight by William on 07/02/2008 Talstar P is an excellent product because it is so persistent and not breaking down. Most phosphorus-based products break down the moment they are exposed to sunlight. Not this one. We have an open ditch behind our property that used to be home to millions of mosquitoes - no more. I spray about 200ft of the ditch in both directions twice a year, using a total of maybe 30 oz talstar a year, and we have been mosquito free for three years. Was this review helpful to you? YesNo 443 of the 463 people found this review useful Read the directions, spray it yourself & save big! By Karen on 07/23/2009 It seems that our entire street lives on an anthill because we couldn't keep those varmints out for long. I paid \$75 a quarter for pest control in our house and outside as well. I read the directions, applied a tire around the outside perimeter, windows and doorways of our house and I haven't seen a bug, ant, or anything for the past 2 months. We've had rainy and exceptionally dry weather, too. I recommend Talstar One. Was this review helpful to you? YesNo 340 out of 357 people found this review useful Best I have ever used! By Umar on 10/30/2008 Talstar P (talstar one) is the best! I have ever used in pest control. I swear by it. Was this review helpful to you? YesNo 208 of the 223 people found this review useful Best things I have ever used by Garry on 05/11/2013 OK so here it goes. Mix it according to the directions or just make a TADD stronger. Then spray around the outside of the building with a 2 foot spray of the walls. Make sure that all pet food and water is not in the area of the spray pattern. I also sprayed along my fence/black wall line of my neighbors property in case they had more bugs than I had. I also in the house. When I did this I had all the contents removed from every closet and drawer. Then I pulled out the last drawers and scoffed there. Make sure you wash all the dishes in case I had the area contaminated. Make sure that you now have food in these areas and this includes pet food. Now I want you to understand that you are doing this because you have a BUG PROBLEM. Don't skimmed out on any of the steps. The next thing is to respray about every two weeks after tat for a month in total. The reason for this is because you kill the bugs running around, but you just kill all the bugs that are in the enclosure/eggs. Some bugs they explain very often and the spray may or may not penetrate them to contact until the bug is hatched from what they are once encased in. The reason you need to do this that often is because of the mating cycles of these little critters. I have to tell you, this is the best thing I've ever used. When I spray I usually vacuum and wipe outside all the dead varmints that lie around. It's really great. Good luck and have fun. By the way you're not supposed to do t, but the average exterminator costs have stopped being high so you save a lot of money to do this yourself and probably do a lot better work. If you post your friends it is illegal to charge them unless you have a license HINT HINT::: The bug man I had come to my house was \$80 a month and he came twice a month for only a short time. This can be expensive so you can do the math and see what you save and how much money you make. DID I SAY THAT OOPS? One more thing. I'm going to buy a gallon next time in case we have some government regulations that say you're no longer buying this on the net or even at all. At least this will keep me delivered for a very long time. Good luck Was this review helpful to you? YesNo 165 out of 182 people found this review useful Bug free garden -) By Wilfredo on 06/16/2010 Verified purchase We have lived in this house for 13+ years and it is virtually impossible to enjoy our backyard because of mosquitoes. Over the years we have tried several products that claim to be effective against these leeches. They were all a waste of time and \$\$\$.

After applying Talstar P we noticed immediate relief from mosquitoes with no aggressive chemical odors/smell. It's been three weeks (rain storms a day) since our first application and this product is as effective as day one. Was this review helpful to you? YesNo 163 out of 170 people found this review helpful bedbugs By Saber on August 3, 2012 Verified purchase I have lived in an apartment for ten years last month suddenly I had bugs in my bed, I went online looking for ran by talstar p, and I decide to use it from the first day, I used talstar, I notice that all the bedbugs are dead I saw it everywhere in the apartment dead, but at first I i throw my mattress off I was going to move to another place after I talstar I decide not to move,please note that you have to spray talstar everywhere in the house where you see bugs.I will never stop using talstar pro,thanks Was this review useful to you? YesNo 116 of the 122 people found this review useful is very successful by Bw on 03/15/2007 Talstar P works for mole crickets, chinch bugs, and termites. This product has been very successful. Was this review helpful to you? YesNo 108 of the 116 people found this review useful Don't Leave a Stain in By Chris on 02/14/2008 Talstar P leaves no stain on the floor when sprayed in my house. Does a good job at all pest inside and out. I use it for cockroaches and spiders in my house. I spray on fire ant hills with great results, a liter will treat about 6 to 10 medium mounds. Price is good too. Was this review helpful to you? YesNo 108 out of 115 people found this review useful Talstar Kills Stink Bugs! By Wally on 09/25/2010 In recent years my family and I have been bombarded by stick bugs. Our whole house was covered twice a year, spring and late summer until early autumn. They were in our house, in our garage, everywhere. A friend of mine who owns a lawn care company told me about Talstar P. I managed to buy 2 qts. at a local fodder factory. I mixed 3/4 of an oz. up to 1 bile. water in a hand-life. After mixing and using 5 gals, I had my entire house and garage and even my garden sprayed by 1 hour. By 5 p.m., I saw hundreds of stick bugs lying on our porch and front deck and only one hand full on the side of our house. I can't wait to see them all dead. Was this review helpful to you? YesNo 105 out of 113 people found this review useful a great product! By Brenda on 10/03/2006 I've been using Talstar One for years, and it works great. I use it for ants and fleas. It's a great product! Was this review helpful to you? YesNo 91 out of 98 people found this review useful Works Fantastic! By Ducky on 04/09/2010 We have had problems with small black ants invading our home for the last few years. I've tried pretty much everything from the hardware store, but that stuff barely made a dent. I bought Talstar P a few weeks ago. I wish I'd looked at this two years ago. Within 1 day there was about a 90% reduction in ants. I sprayed 5 days ago and haven't seen a single ant in the past few days. Usually the ants were at their worst right after a strong rain. Well, it rained very hard yesterday, for the first time, we didn't see a single ant. I'm sold on this stuff! Was this review helpful to you? YesNo 91 out of 96 people found this review useful Back Yard Life By Greg on 09/07/2010 I live in Minnesota, and this summer is the worst! We have had a lot of rain and hot weather making it ideal for mosquitoes. We have a backyard pool that we couldn't Come close to. The bugs would just drive you back to the house. We used any kind of sprinkle and hose spray that we could get at the local farm delivery. I found out about Talstar from a groundskeeper in my area. I mixed it in my sprinkler and sprayed the whole three pains of my garden. Within a day we could sit outside and enjoy our home in the country. It's been working for three weeks and I haven't had to be reapplied. Don't let the price drive you away. It costs very little to cover a lot of area. Best thing I've found to use for mosquito control. Was this review helpful to you? YesNo 85 out of 86 people found this review useful Talstar works! By Joe on 04/24/2010 Verified Purchase This stuff works great! In New Mexico we get cockroaches from April to October. This stuff sends them to your neighbor's house. If it works for the indestructible cockroach, it will probably work for everything. I no longer pay the bug man \$50 per visit. Was this review helpful to you? YesNo 81 of the 83 people found this review useful Tick Invasion By S. on 06/17/2010 Some years ago my lab got out of our garden and was found several miles from our house. When we brought her home, we didn't know she was covered in ticks. Within a few days it became clear and we looked after her and removed over 100 ticks! Within about 3 weeks we had ticks crawling our walls! I was GROSS! I tried everything, in vain. Eventually I got some Talstar and the sign started to disappear. No sign in about 2 weeks. We have tick free now for 3 years and we used Talstar for termites. I love it! Was this review helpful to you? YesNo 70 out of 73 people found this review useful Excellent product By Gordon on 09/22/2006 I have collected a lot of data on Scorpion elimination using various products and nothing but Talstar P seems to be effective. I spray every six weeks and they're gone. Excellent product, my family and I feel is now safe. Was this review helpful to you? YesNo 66 of the 69 people found this review useful if it is a bug, this will kill....! By Danny on 10/31/2010 A few years ago I bought an old house in the hillcountry texas. The place had every creepy crawling critter I had ever seen, and some I didn't have. I hired a professional exterminator and once every three months he would service my property with excellent results. When I found that I could buy the same products he used for a fraction of the cost of his service, I fired him. I bring Talstar P inside & outside and the bugs are gone. Every once in a while, I find an insect, but it's dead. It is safe to use around the pets and live stock and I recommend to all my friends. Was this review helpful to you? YesNo 56 of the 61 people found this review useful Zero problems By Dave on 05/05/2010 Verified Purchase Excellent prices, fast free delivery, and an 800 number that was quickly answered and answered my mine This same product was almost 2x the price at my local do-it-yourself pest control shop. A very simple website to navigate and find my product (Talstar P). Also great email notifications about the progress of my order. Was this review helpful to you? YesNo 55 of the 58 people found this review useful in answering John's question of where it was made by Chris on 05/27/2010 The finished product is manufactured in Valdosta, GA. But the active ingredient comes from China. Was this review helpful to you? YesNo 52 out of 63 people found this review useful One Great Product By Dg on 06/10/2009 Verified Purchase I have used Talstar P for a year with great results. This is a good product and I would definitely recommend it. Hope this product stays on the market for the do-it-yourself (saves money) individual. Was this review helpful to you? YesNo 48 of the 51 people found this review useful Talstar By John on 07/15/2010 Last year we bought a house on a 1 acre large with a very private wooded edge. However, the problem we had with mosquitoes made enjoying our new backyard impossible. I tried the bug control sprays that you buy from the big box hardware stores - with very few results. This year I considered using a professional service, but before spending almost \$400 – I did some research and found your site. The customer service was excellent and the results were even better! It's been almost 4 weeks with no mosquitoes - and we have some big storms with lots of rain - still strong! I can't say enough of how much I love this product - now I can finally enjoy our garden! Was this review helpful to you? YesNo 45 out of 45 people found this review useful Nothing else compares by Nathan on 10/09/2006 Buy to check ants and chinch bugs. Have used it in the past, and nothing else compares to Talstar One's abilities. Was this review helpful to you? YesNo 44 out of 50 people found this review useful Great and working product By John on 05/06/2010 All clover mites and ants are gone just after a treatment. Really happy with the product. Hope the bugs would never come again if I continued to perform maintenance. Wondering if this is U.S. product or China product, but it is made in China. Why is it made in China anyway? Was this review helpful to you? YesNo 44 of the 52 people found this review useful Amazing Results By Brinin on 11/10/2010 Verified Purchase I had a large infestation of brown dog ticks in my garden that worked it away in the house. I had tried many other products with little to no success. With Talstar One I saw great reduction after 24 hours and with a second application a week later my problem It's a great product. Was this review helpful to you? YesNo 42 out of 42 people found this review useful Nothing works better! By Karen on 09/23/2010 Verified purchase Within hours of spraying this there was no ant or find it in my garden or porch! It's great to be able to walk on my lawn and not get into ant piles, my dog also isn't eaten by fleas, they're all gone too. My garage is free of spiders turning their webs too! Was this review helpful to you? YesNo 38 of the 42 people found this review useful Talstar P Performance By Quinton on 06/26/2010 I have done my own pest control for a number of years. I have never in all years had a product run like Talstar P has. Before I ordered, I read all the reviews that were actually glowing in terms of ratings. I concluded that the product should be worth a try. I can now confirm that the ratings were right on the mark! The only thing better than the product was the service of DoMyOwnPestControl.com. I recommend both! Was this review helpful to you? YesNo 35 out of 40 people found this review useful My Review on Talstar A Pesticide By Mike on 04/05/2010 Verified purchase Ive uses this going on my third year now on a site with monthly irrigation, and this is the best product to use, have seen nothing where it applied and it works just as well inside too.. I'll give it a thumbs up. Was this review helpful to you? YesNo 30 out of 37 people found this review useful Talstar Works on Stinkbugs! By Gloria on 09/29/2010 Verified Purchase This WORKS ON STINKBUGS. We have thousands of stink bugs all over our house and in the attic. Talstar Pro was recommended to us by a friend. At first I didn't think it would work because it wasn't lethal on contact. We sprayed yesterday, and this morning there are dead stink bugs everywhere. It just takes a little time to kill them, and even killed those who came later. We ordered the product because it was advertised as environmentally friendly outside and in the house. Thank you! I recommend this to all my friends who have this same problem here in Maryland. Was this review helpful to you? YesNo 21 out of 21 people found this review useful no more mosquitoes! By Dave on 04/23/2015 We had a mosquito problem. The mosquitoes in the Phoenix area are small and fast. We couldn't go outside without being on repellent or through mosquito coils. I had tried the big box stores products, but they were only slightly effective and were expensive in relation to their coverage and frequent reworking became a pain in the a** due to the low coverage per tank. After using this product at the highest recommended dilution rate I am pleased to report that within 12 hours we had no mosquitoes! Plus no grasshoppers, crickets or ground spiders! It is 10 days ago watering all patio surfaces, walls and foundation (up to 2-3 meters), eaves, garden, potted plants and their soil (not vegetable garden), trees and Palms. You don't need to have full coverage, only most areas because the insects will eventually come into contact with a treated area. Area. 10 days since the application and have not had to apply any defence or light coils since then. I can go out now without fear of being attacked. I haven't been bitten once and am outside for hours every day. We still see insects flying around the yard lights at night, but I think they are attracted to adjacent features and will eventually land on the treated areas and die. In addition, some of our potted plants have perked up due to killing the underground insects that feed on them. I am very happy with this product and have recommended it to friends who pay \$80 a month to pest control companies. I will have to follow up with regard to the remaining effects of this product. Was this review helpful to you? YesNo 20 out of 20 people found this review useful Display from 1 to 30 (from 2151 reviews) Page 3 Showing from 1 to 30 (from 235 reviews) Bag Worms By Mike on 06/23/2010 Verified purchase We almost missed the recommended spray period for bag worms (May-early June), but it seems Talstar One works! The pocketworms don't seem to move as they were. The ornamental trees look a little stressed which could be more of the Texas heat than the spray. Was this review helpful to you? YesNo 12 of the 15 people found this review useful excellent product by Randy on 04/24/2013 Verified purchase I have used Talstar P for 3 years now in conjunction with Archer IGR and both products do a great job in controlling the fleas, ticks and other bugs we have around our home. Talstar is my quick kill go-to, with the Archer being the long term solution to most of our buggy problems in this part of Florida. I have recommended both products to friends and they have also ordered from Do My Own Pest Control. Your customer service is also excellent and your prices are in line. Was this review helpful to you? YesNo 11 out of 12 people found this review useful Talstar By Jerry. on 07/01/2014 Verified Purchase Talstar is a great product. I tried other bug killers, and it was a waste of my time and money. Talstar KILLS and then continue killing. Normal.. I wouldn't write a review of products I thought were effective, but I could never get rid of insects until I use Talstar. Now I don't see any bugs crawling around my house. As far as I'm concerned, Talstar gets 2 thumbs up.products Was this review helpful to you? YesNo 9 out of 10 people found this review useful talstar & stinkbug By Jocelyne on 09/22/2010 Verified Purchase I have to admit that the stuff works. I fit it in the back and the next morning 100's of bug death. I wish it would prevent them from coming in. Was this review helpful to you? YesNo 8 out of 10 people found these Useful Review on Talstar P By Charles on 06/07/2010 We were told about Talstar P by some friends in Alabama after discussing our ant problems with them. We were unable to find any of the local shops, so we bought it online. After ordering, we got it within 3 days! After the instructions we immediately started spraying outside our house. Ants were everywhere! We had a big problem with them. Immediately we could see results outside and inside our house. Talstar P was very easy to measure and mix. There was no smell with the use of it and we highly recommend it to anyone with ant problems. We even plan to camp Talstar with us this fall. Thanks for a great product!!! Was this review helpful to you? YesNo 7 out of 7 people found this review useful Great product!!! By Ron on 08/31/2010 Verified Purchase Used on my lawn and garage. I had hundreds of box elders on my garage and I sprayed with Talstar and the next day I walked there there was not a single boxelder.. I would say effective. I also used it in my lawn for the sodworms. I haven't seen little white moths fly around my feet as I walk through the grass and no more new brown spots, so here's hoping! Was this review helpful to you? YesNo 6 out of 6 people found this review useful Millipede destroyer By Robert on 08/11/2010 Bought this product mainly to destroy Florida centipedes. Seems to be effective in reducing the population, but still manage to get some around using a solution of 1 oz per gallon of water. Certainly is more effective than other insecticides. I rate the product highly. Four stars. Was this review helpful to you? YesNo 6 out of 6 people found this review useful Works GREAT By Jar on 10/06/2010 Had a problem with TONS & TONS ants on the outside of home. Used Talstar as prescribed [1 oz to 1 liter of water]. Haven't seen it since, or any other bug for that matter. Was this review helpful to you? YesNo 6 out of 6 people found this review useful 90% improvement By Isaac on 06/14/2015 Verified Purchase Had trouble with bedbugs, decided to buy this product & as the product indicates that it is odor-free & it has eliminated 90% of them, but I noticed that the larger ones did not die right away. So I did a second pass indoors. Was this review helpful to you? YesNo 6 out of 6 people found this review useful Spider Infestation By John on 09/12/2012 I've been bitten twice by black widow spiders on my large wooden deck, which I've now thoroughly sprayed with your product. I need more time to evaluate how effective and sustainable Talstar P is; but, honestly, I feel like giving it 5 stars though, because of the ingenious packaging of the concentrate, which allows completely hassle-free dilution in the nozzle. Was this review helpful to you? YesNo 5 out of 5 people found this review useful Talstar works on spider mites Gary on 04/13/2011 I've used it before in rotation with other pesticides, mostly for mites. It has its own sticker and it's pretty cheap to use. I recommend the PBO with it so mites mites become resistant to it. Good value Was this review helpful to you? YesNo 5 out of 6 people liked this review by Tyrone on 04/25/2015 It actually help control flying insects from my patio and garden Was this review helpful to you? YesNo 4 out of 4 people found this review useful Still hoping by Gregg on 08/10/2010 Verified purchase I had a pretty good infestation in my garden of chinch bugs. They used the weeds as little umbrellas. Every time I pulled up a weed I could literally see 5 or 6 of the little buggers walking. I have applied Talstar product as prescribed three times and I think I am starting to see improvement. Only 2 or 3 walk when I pull a weed. As far as other bugs I would say it's a great product and protects the house well. Just hope to get a few more treatments on the yard that chinch insects. Was this review helpful to you? YesNo 4 out of 6 people found this review useful So far so good by Brian on 07/07/2010 This seems to be the summer of the scorpion in Central Texas. I think the wet spring (thank God) contributed to the increased critter population. I walked across DMOPC site by surfing the web. I was going to be a professional doing the job, but I couldn't see shelling out \$100 for an application. After I read the Talstar P reviews I decided to try it. So far, the scorpions seem to respect the barrier. I saw two dead people at the garage entrance. My wife found a dead man in the pantry the next morning after the application. He must have been hiding under the washer/dryer. Again, he went to the scorpion heaven. Talstar has no smell and it is easy to apply. I've used the Big Box store offerings for this with some results. I hope this stuff does a better job, so far it has. By the way, DMOPC gave me excellent service with fast shipping. I will be back! Was this review helpful to you? YesNo 4 out of 4 people found this review useful Wonderful Product By Anonymous on 08/16/2013 Verified purchase The product came in the specified time frame. Directions were easy to follow and full of safety advice and emergency numbers. Application on the outside was done via 4 liter backpack nozzle. After the clues, all cracks, voids, window ledges, doorways and visible ant paths were sprayed. Also sprayed whole foundation area 1foot from the walls and 1 foot barrier at the bottom. Inside: Use 1/2 gallon hand spray and sprayed all visible ant tracks, window areas, cracks, base boards, under/over counters and cabinets, doorways, etc. Pretty much anywhere ants can crawl. Within 3 days, the amount of ants visible in the house disappeared. Still a pile of dead ants in corners and along basic shelves, but nothing move inside or outside. No foul smell or smell. Follow safety sheet and wear eye protection when applying the product, as it is very easy to spray the wind (outdoor application) or back (inside, inside, bounces of objects) touch your eyes. I plan to use this product as part of my routine pest control plan. Was this review helpful to you? YesNo 3 out of 3 people found this review useful Telstar P By Jim on 06/15/2014 Product seems to be doing the work problems with ticks in our garden have decreased. Also spiders around the house and barns are gone. Time will tell how long it takes. For now I would buy this product again. Was this review helpful to you? YesNo 3 out of 3 people found this review useful Bedbug Treatment By Kelley on 07/14/2018 I'm really going to be & tell you that I have this for treating bedbugs. Because it happens to be the best of us & I want you to have the info! I treated my room (ALLL OF IT) 3 weeks ago, after cleaning up & removing that stuff from my house & steam cleaning everything. I was worried that they might be resistant to the chemical as was mentioned when I bought the product. Honestly, I'm pretty happy with the result. Definitely ventilate but if you spray & follow all the label directions for PPE & mixrates. The month-long remainder seems to hold with about 90%. That is, 90% of the insects we have found since syringes have no fresh blood in them. They are black & not as turgid as they squish. I will definitely treat it again in a week (when the month remaining expires) after steam cleaning. When this chemical runs out, we will switch chems as suggested to prevent resistance, but for me this was a good step in the whole program. Fast shipping too! Was this review helpful to you? YesNo 3 out of 3 people found this review useful Fireant Killer By Paul on 06/10/2015 Verified purchase This product was recommended by my house exterminator for fire ants along with other pests. I use it mainly for fire ants and it works well as they don't just move from where they are killed to another location five feet away. Good product. Was this review helpful to you? YesNo 3 of the 3 people found this review useful Sidewalk ant control By R. on 04/09/2011 I used both the hill watering (with a 2 gal. tank nozzle) followed with a hose sprayer handling the yard. I had a driveway infestation you wouldn't believe and ants under the plate of a 12x'22' barn. It's only been several weeks since the treatment, but so far, so good! A lot cheaper than having it done. Last year I had the barn treated for \$125.00! I did this and the whole house and yard and still have more than 1/2 gal. of Talstar One on the left. I thought, for the price, it was worth a try. At this point I am pleased with the result. I live in central FL, ants love this place! Was this review useful for YesNo 3 out of 3 people found this review useful Talstar P By T on 08/20/2015 I have professional treatment of my I house and lawn for centipedes and this product has reduced the number of these crawlers. I live next to a lake and although the centipedes have not been extinguished numbers have been reduced to a liveable number at a huge monetary cost. Was this review helpful to you? YesNo 2 out of 2 people found this review useful good general purpose insecticide By Anonymous on 07/29/2013 This does a good job on a wide spectrum of bugs. I doused the whole house and it took care of ants, spiders and centipedes. I also hoped it would take care of springtails, but it didn't do so well with that. If you happen to spray your windows when going around the frame, it will leave a streaky mess. Was this review helpful to you? YesNo 2 out of 2 people found this review useful Talstar P By John on 05/17/2011 Verified purchase The product was used in a sprinkler. Made sure it was a quiet day and started spraying the Queen Palms. After about 10 minutes, I saw a line of Beetles leaving a Palm. Amazing!!!! Was this review helpful to you? YesNo 2 out of 2 people found this review useful Talstar P By Andrea on 04/15/2014 The product has done a good job so far. The only problem I had was getting the ounce size of the container to work. I just used a measuring cup. All in all I am happy with the product. Was this review helpful to you? YesNo 2 out of 2 people found this review useful Talstar P. (Talstar One) By Espe on 10/31/2017 This product works. I first used according to the instruction of chemical ratio to water ratio, the result was minimal. I increased the chemical ratio to water ratio a little, not only cockroaches was destroyed, but mouse in my house disappeared to maybe neighbors apartment or somewhere. There are still few remains of cockroaches alive, but they are usually on the wall and not on the countertop, counter top or on stove top lake. Was this review helpful to you? YesNo 2 out of 2 people found this review useful Kills fleas -yes By Tito on 06/10/2014 Great product. It kills flea prompts and easy to apply. I used it around the house that was infested with fleas and it reduced the numbers dramatically unfortunately not killing the eggs or larva so fleas will continue to reproduce. Was this review helpful to you? YesNo 2 out of 2 people found this review useful so far, so good with it by Paul on 04/22/2013 I would give it five stars, but I just applied it 3 weeks ago and just haven't seen how it will do over the long run. Stopped seeing nuisance bugs (red/black box elders) immediately and haven't since application. Applied to the whole base perimeter and it seems to do well. Was this review helpful to you? YesNo 2 out of 2 people found this review useful Works Great, Repeat User By Emily on 02/01/2016 When sprayed on the recommended amount this product has worked wonderfully for us. I would recommend it to anyone who needs a home spray for insects/spiders/scorpions. Was this review helpful to you? YesNo 2 out of 2 people found this review useful Talstar P By Craig on 03/26/2014 Have used product to spray around the outside of our house and fifth wheel trailer when we go camping, but have also used in the side of both our house and fifth wheel just mix per instruction. Easy to mix and use, just walk around spraying and forget about it until it's time to respray it. Was talking to a professional pest control technician during a termites inspection at our house and he said it was almost as good as the products he used and that as long as I talstar P there was no reason for me to pay him to come spray around my house to the tune of \$75.00 per visit. This product works you will see the results!!!! Was this review helpful to you? YesNo 2 of the 2 people found this review helpful telstar p is a very good to kill cockroaches and other insects by Gregory on 08/23/2013 I would have given it 5 stars but not sure how long it would take on the outside because it has a lot of rain here. Had to re-spray my doors since the rain. neighbors because they moved had a lot of cockroaches. came straight to my house. sprayed the garden last night to see if this would then stop. use some spray before from Home Depot did nothing to them. to change some Suspend SC now so they just get used to some sort. and Advion Roach Bait Gel. very happy with talstar and got my own pest control.com Was this review helpful to you? YesNo 2 out of 2 people found this review useful Talstar P (Talstar one) Qt. size By Vernon on 08/14/2017 Measuring tanks ever to get it right. I messed up pouring it out & may have gotten more than I needed. However, the product exceeded my expectations. My heavily contaminated evergreens are now free of the bagworms. They were my biggest concern. I will now have to read the literature to find out what other applications it may have. Lots of product that's still in one qt. Talstar P (one). Was this review helpful to you? YesNo 2 of the 2 people found this review useful Show from 1 to 30 (out of 235 reviews) Page 4 Show from 1 to 30 (out of 71 reviews) Talstar P By Paul on 10/06/2010 Verified Purchase Good around pesticide - inside & out. Provided good flea control all summer. (Has little or no effect on spiders) personally, I wouldn't buy again because of one label-----made in China. Was this review helpful to you? YesNo 45 out of 91 people found this review useful Talstar P By John on 05/13/2015 Works pretty well... pest that you are trying to control seem to get immune to it pretty quickly (try another product tempird or use another multi-use spray every other time).... Its affordable, but if you're left after a spray job you don't want to store it in your sprinkler, even if you have a job the next day, or it will start to and plug stuff up. or even if you spray it all daily it will be worth it in the long run. Was this review helpful to you? YesNo 16 out of 16 people found this review useful Talstar P for stink bugs by Jim on Verified purchase This product works well to protect the house from stinkbug invasion. I'm finding many dead bugs around the outside of the house and not as much on the house as the past two seasons. Was this review helpful to you? YesNo 11 out of 12 people found this review useful TALLSTAR By Warren on 07/03/2014 I used this product without any problems in the pint size. This time I bought the quarter size. I wanted a lot. Something about the measuring and casting system. I fill the top to the desired amount, but as I went to pour it the liquid just kept pouring. The product itself is great!!!! Was this review helpful to you? YesNo 5 out of 5 people found this review useful Talstar One By David on 09/16/2013 Verified purchase type disappointed. Had to do about 3 applications before I stopped seeing ants in my kitchen. Also, I was told that this would kill them completely, but I read somewhere that this product does not kill the nest if the ants do not bring them back to the nest because it kills them first. I really needed something that would bring them back to the nest to get rid of them for good was this review helpful to you? YesNo 4 out of 4 people found this review useful Talstar P Works well by Gail on 10/24/2011 Verified purchase This product works well, but for fleas, you definitely need to mix it with a growth regulator. I found out the hard way. It killed the adults, but I still saw a lot of them, once I mixed with the growth regulator I saw a huge difference. Will definitely use it again. Was this review helpful to you? YesNo 3 out of 3 people found this review useful Stink Bugs By P on 10/15/2011 Verified purchase I originally found this website last year; I'm trying to find Cy-Kick, a pesticide that used an exterminator in my neighbors. I used Cy-Kick and it works too, but returning to the site I knew there were more products for this latest creature terrorizing the Northeast US. Search 'stink-bug' on the site, Cy-Kick does not pop up; (It did last year) or at least I didn't see it. With Talstar with the highest ratings I thought why not. Doing a search of the word 'stinkbug' within about 50 reviews, it came a very small amount of times. Talstar, like Cy-Kick works, but I can't say it works better. Like many of these products, they have that invisible residue that lasts a few weeks, and I saw a lot of praise from a few people who seem to know more than I do about pesticides. Besides, 1 ounce per 1 litre seems to do the trick while I was using 2oz. per gal with Cy-Kick---for what I believe was the same results. Stick bugs are dying by the thousands now at my home and my neighbor; hopefully something will change this, if it kills the innocent bugs---bugs me! Smile! Was this review helpful to you? YesNo 3 out of 4 people found this review useful Talstar OK for Mosquito control By Jason on 06/23/2014 I bought product for mosquito control and applied at a rate from an oz to a gallon in a one liter pump nozzle. It worked great at first, but carried much faster than the 30 days that the label indicated. The second application did not seem as effective. I live on a river, but I still hope to be able to open my door without thousands of mosquitoes flying in. I will continue to apply again if necessary and hope for the best. Was this review helpful to you? YesNo 3 out of 3 people found this review useful Lower price than demand... By Charlotte on May 8, 2016 good product for all around bug control, I mix it on the strong side and add a little Demon Max. Mosquitoes are done for. Ticks were the main reason for the product. All bugs seem less annoying. Now that I know it works, I will buy it in larger quantities for an even better value. I will still use the demand in the spring. I think it takes longer in rainy conditions. Was this review helpful to you? YesNo 3 of the 3 people found this review useful Not the best, but OK By Roxanne on 07/25/2010 Verified purchase for the money I was really hoping this would work great, but malathion is much better, just impossible to get into California now. I sprayed this directly on a spider, and he didn't even flinch, kept running. I also used it around the skirting boards in my kitchen trying to get rid of ants. I think it reduced my ant problem, but it didn't eliminate it as malathion has in the past. Therefore I think this helped some, but not worth the money! Was this review helpful to you? YesNo 2 out of 4 people found this review useful Only just applied by Tim on 08/19/2015 I just applied this two weeks ago... It's hard to tell if it worked. But I have to say that the service of this company is really great... Ordered... had it within three days. Great service. If this stuff works on my chinchbugs... I'm sure I'll be back to buy mote ir something else. Like I said, the service was truly exceptional. Thank you! Was this review helpful to you? YesNo 2 out of 2 people found this review useful doesn't work as expected... By Gary on 09/26/2016 Is ineffective on mosquitoes, or fruit flies. Applied as indicated for the first check and a week later for proactive monitoring. No effect mosquitoes, the product controlled house flies and other insects, but was not effective on mosquitoes/fruit flies. Was this review helpful to you? YesNo 2 out of 2 people found this review useful so far... it's no better than the cheap stuff By Amber on 10/18/2019 I definitely want to update my review after 3 months because ive only used once and have been for 3 weeks and im already seeing the effects are not long long. Snails come back in some how and those pesky wood cockroaches. Granted I only found 1 in the 3rd week, but still. Was this review helpful to you? YesNo 2 out of 2 people found this review useful Leaking bottle by M.M. 05/20/2016 Item arrived in the manufacturers box of the sprayer I had bought with the Talstar. No packaging, bubble wrap or paper was placed around the bottle. The bottle leaked about a quarter of the contents over my brand new expensive syringe. Wasn't happy with the packaging or the hour it took for me to clean the nozzle. The talstar seems to work pretty well. Was this review helpful to you? YesNo 2 out of 3 people found this review useful Didnt work in New Jersey By Bill on 07/04/2011 I bought 2 gallons in our florida home it killed all of the fire ants and spiders for about four months. I decided to buy another 2 gallons for our house in New Jersey due to an ant problem we have in our lawn I sprayed the lawn twice and we still have ants. Bill Was this review helpful to you? YesNo 2 out of 3 people found this review useful Talstar One By Ron on 08/27/2010 About a week ago I used the prescribed solution - 1Tbsp/gal and it seemed to work well in my finished basement, but upstairs either hasn't had time to be effective or for some other reason it's not working yet. Was this review helpful to you? YesNo 2 out of 2 people found this review useful Talspar P By Steve on 10/10/2016 I haven't seen an ant since using this product. But it didn't slow down mosquitoes at all. We are still unable to sit in our garden before or after dark. Expert response: We apologize for not receiving the expected results! you tell us how you use the Talstar for mosquito control? Talstar is a great product and a go to for mosquito control companies. We think we can help you resolve the application so that you can take your garden back. We look forward to hearing you form back soon! Was this review helpful to you? YesNo 1 out of 1 people found this review useful Does Not Work for Mosquitoes by Eric on 06/13/2020 I bought this and mix as directed. It did get rid of mosquitoes, however, there are plenty of small mosquitoes all over the place in this does nothing for it. Biting mosquitoes and generally annoying small flies that this chemical did not affect. Would opting for something else that will take care of everything was this review useful to you? YesNo 1 out of 1 people found this review useful Talstar P By K on 05/17/2017 I would only give it 3 stars it doesn't work at all on German cockroaches. I followed the directions. Was this review helpful to you? YesNo 1 out of 1 people found this review useful may require a second dose. By Alan on 06/14/2017 I got this to check the bugs around my property. I mixed it as stated on label, I have significantly fewer insects now, but the black ants are still around it wood around some of the raised beds. I'll mix more and treat it a second time. I would suggest others try this product..... YES Was this review helpful to you? YesNo 1 out of 1 people found this review useful OK for a short time by on 09/23/2014 Verified Purchase Purchase, very heavily sprayed in the backyard, uses almost 4 liters of water, with 4 oz talstar. Worked for a few hours and then the mosquitoes were back. I know it doesn't solve an all, but it says to work for 3 months. Very disappointed. Was this review helpful to you? YesNo 1 out of 1 people found this review useful Talstar One By J. on 09/19/2014 Verified purchase ordered this product after reading all the excellent reviews. Used in the basement laundry room and 3-4 days later still having spinning problems. Sprayed the outside area for small white moths, seems to have reduced the number, but even after the 2d syringes still have a problem, but smaller. Was this review helpful to you? YesNo 1 out of 1 people found this review useful Mosquito Control By Jason on 06/20/2011 Verified Purchase Hit and Miss. Sprayed garden and still mosquitoes. Not so bad after spraying, but it doesn't keep them all away. Was this review helpful to you? YesNo 1 out of 1 people found this review helpful got for ants, fleas and mosquitoes by Alicua on 03/14/2016 We have a large infestation of fleas, ants and mosquitoes. And there is no water in our backyard or surrounding yards. And I read several pages of reviews on this product and saw how many good reviews there were on the issues I needed resolved. Well its about two weeks since we sprayed. And we sprayed everything. Even under the porch to ensure full coverage. And while it has cut down on the fleas and my dog is not covered in them, she is still coming with manly on her. As for the ants, we haven't been outside much yet since its just now starting to get nice outside, but I can say I put ants inside again so im pretty sure they're still a problem outside. And like I said, the weather has just started getting nice, so I don't know about the mosquitoes yet. And then to other creatures. I never had a problem with other bugs except wasps. But the wasps are still there and now this new bug has started to appear. I was calling on this to kill 75 different insects, but at most, it has just been cut down. So far all are still an expert response problem: Thanks for your feedback. Please note that the use of an insecticide is part of an insect reduction program. It is important that you make changes to your property, such as trimming shrubs, hedges and trees, clearing garden debris and keeping brush cut back. Take a moment to read our flea guide and our general pest guides to find out more. The goal with the use of insecticides must be realistic. The use of these products will reduce the activity of insects, but won't eliminate them. This is because new insects can move in from the surrounding areas and take time to treat contact areas. FLEAS: GENERAL: GENERAL: Was this review helpful to you? YesNo 1 out of 1 people found this review useful Talstar P By Deborah on 07/20/2018 I applied this product a week ago, so far I have not noticed any major difference. I can still see spiders. I found some other dead bugs on my deck. Was this review helpful to you? YesNo 1 of the 1 people found this review helpful not sure about this By Chris on 07/18/2012 Talstar did not kill centipedes as I thought it would be based on description. Was this review helpful to you? YesNo 1 out of 1 people found this review useful Yet not sure in April on 07/16/2017 I bought it for springtails (although they are easy to kill. It's just a control system when you spray to kill them. Need to take care of the moisture problem before they will really disappear). I'm the middle of us getting funding to solve the moisture problem that we infected in this product. It killed the springtails. (Although any killer can kill them). I was hoping it would kill other insects, too. That didn't happen. Ant problem is actually worse. Was this review helpful to you? YesNo 1 of the 1 people found this review useful Not quite what I was hoping for by Don on 07/20/2018 Upon receipt of the product, I mixed it according to the directions and sprayed the outside of my house. Unfortunately, the week after was exceptionally hot here in California, and ants were looking for water everywhere they could find it. We had a number of incidents where they came into the house across the border which I had sprayed. I sprayed them in the house and again at some point I could find them around the house. After the first incidents, I have no more problems so hopefully the product works well. Was this review helpful to you? YesNo 1 out of 1 people found this review helpful Do my own extermination! By Fernando on 09/15/2013 Verified Purchase DoMyOwnPestControl.com is a wonderful site to order from. All the products they have are described in detail. All in all I will order again from this site. Great job guys on a great website. Was this review helpful to you? YesNo 1 out of 4 people found this review helpful chinch bugs by John on 07/12/2014 my lawn is badly infected with chinch bugs. I've srayed twice so far and haven't noticed an improvement yet. Was this review helpful to you? YesNo 1 out of 1 people found this review useful 1 to 30 (out of 71 reviews) Page 5 View from 1 to 30 (out of 32 reviews) Have I done anything wrong? By Rob on 05/06/2010 I gave 2 stars because I have used Bifenthrin before in other products, such as Ortho, with great results! I thought Talstar would be that much better, but after applying the maximum dosage to my lawn it doesn't make any difference! Still tons of lawn critters, spiders, mole crickets, scorpions, fire ants, mosquitoes, mosquitoes. So I sprayed just around our back patio with Bayer advanced and in two hours there was a small army of dead bugs listed above on the Now, like I said I've used Bifenthrin for in lower doses with great results. So it is possible that I have an ass party or something???? I don't know... Was this review helpful to you? YesNo 48 of the 79 people found this review useful Springtail Problem by Sherry on 06/06/2011 After reading reviews and talking to support staff I bought Talstar P 3/4 gal. to treat my house and perimeter of a very bad springtail problem. I sprayed 3-4 feet up (to the bottom of the windows), around windows, and then 3-4 feet out on my grass around the whole house. Although it has decreased the springtail population somewhat it is not nearly what I was made to think, I still have thousands. I also use Bifen grains around the perimeter. Support is now telling me the springtails should be down under my foundation. I understand they can breed there, but if they come and out past my siding why isn't this stuff killing them then, because it's suppose to last and be active for 3 months. There's no explanation for that. If you have a jumpingtail problem I would hire a professional company and get a written guarantee they get rid of them and

keep them away. Was this review helpful to you? YesNo 15 of the 18 people found this review useful not effective as thought by Dung on 09/11/2012 Verified purchase After three days of spray, the cockroaches still run around as if nothing ever happened. Not recommended. Was this review helpful to you? YesNo 5 out of 5 people found this review useful caution By Rodgerbain on 09/04/2011 be careful when using talstar to make sure you are not allergic to it, I have sprayed my garden to find out that I have an allergy hercation to it, terrible curvy infection ever time I cut the grass plus I still have ants Was this review useful to you? YesNo 4 out of 6 people found this review useful Talstar P (Talstar One) By David on 09/25/2011 Verified purchase I have purchased and used this product for many years and recommended to friends and family. I was purchasing it from a company about 40 miles from me and it worked great. I bought a bottle of domyownpestcontrol.com and it has had no effect. I don't know if I have a bad bottle or if it's not mixed the same. I do know that I no longer like this website. I drive the 40 miles to get the real stuff. Was this review helpful to you? YesNo 3 out of 7 people found this review useful Still mosquitoes by Phil on 03/19/2011 Verified purchase Where we live in Central Florida we have a very serious mosquito problem. The professional exterminator, Clarke, has sprayed with some success, but still the mosquitoes are not under control. I went online looking for a chemical that would not only kill the mosquitoes, but have a long-lasting residual effect. Unfortunately Talstar did not have a long distance effect - at most 2 or 3 days. Not worth the \$32 per pint price for mosquito control. Was this review review For you? YesNo 3 out of 4 people found this review useful did not work for cockroaches for pre treatment for prevention. By Bobby on 05/07/2016 Will try another product. If anyone knows a product? Inform or forward information about the product. So far I used Talstar and Temprid. Both failed to do the job. Kills on contact, but that's it. Bob Expert Response: Read our Roach guide so you can make an informed decision about your roach control program. Usually just picking a product won't be enough. You should choose a product and use an all-around program to eliminate and prevent cockroaches: Was this review helpful to you? YesNo 2 out of 3 people found this review useful Same product as the professionals? By Walter on 08/04/2012 Problems are ants, mosquitoes, flies and centipedes. It sprays on clear, doesn't smell. It won't kill ants after 2 weeks or even a week, see no dead ants (where are they going?) only living ones, had to set up the good old fashioned traps. The ants crawled over the concrete and the vinyl siding. On a 1800 square meter house, sprayed on the outside 8 oz. Talstar P (8 gal. mix). The pest control company had the same things with a better result... is there a difference in the product? Was this review helpful to you? YesNo 2 out of 2 people found this review useful Talstar P By Lenny on 08/21/2015 I have now used this product 3 times to get rid of fleas after pulling all the carpets and pads. Unfortunately I still see fleas! With each treatment fleas seem to have gone for a day or two and then they are back! Expert response: Reinfestation can occur because flea eggs are protected from the application of the insecticide. Using an insect growth regulator will help break the cycle of reinfestation. It is crucial to vacuum prior to application and daily after the application is made. Take a moment to read our Flea Control Guide to learn how to successfully check fleas: Was this review useful to you? YesNo 2 out of 3 people found this review useful used. By John on 10/03/2016 I followed the instructions on the bottle. I had big ants, and they left. However, the small ants seemed to double in number. Was this review helpful to you? YesNo 1 of the 2 people found this review useful Talstar P Professional By Siddique on 07/03/2019 The order was delivered quickly, but the product itself did not work well for Dust Mites. Was this review helpful to you? YesNo 1 out of 1 people found this review useful Kills Crickets? Not! By Gerry on 04/15/2016 Pest controllers tell me that crickets are hard to kill. I have a cricket in my house. I've been sprayed inside and out 3 times this month. No luck so far. Was this review helpful to you? YesNo 1 of 1 1 found this review useful Kills Bugs. Scorpions? Not so much by Troy on 10/03/2015 I live in Phoenix where scorpions are part of the landscape. Although my house is sealed, I spray outside to keep insects and scorpions away. Over the course of a month and a half I used 6 litres of insect spray with the Talstar P concentrate, with a spray of 2 liters every week. I'm outside every night with a black-light and haven't come across a dead scorpion (although I'm killing plenty of living ones at night). This stuff doesn't seem to phase them at all. After my puppy was stabbed last night, I decided it was time to leave a review. I bought this stuff based on other positive reviews related to scorpions and so I am very surprised by the lack of effectiveness. If you are just spraying for bugs, this should work for you if sprayed monthly. If you have scorpions, look elsewhere. 1.5 stars, considering I can regularly buy bug spray concentrate at the box stores for a lot less. Was this review helpful to you? YesNo 1 out of 2 people found this review useful Talstar By Judy on 01/18/2011 Verified purchase We still have crazy ants, microscopic ones that have been sprayed inside and out and all over the house. They appear on counters and cannot keep any type of food product that one usually keeps on a counter top. They will even show over shampoo bottles in the shower in the morning and if you leave a dirty dish in the sink, they are on it! What to do?! Was this review helpful to you? YesNo 1 out of 1 people found this review useful white foot annts By Anonymous on 08/26/2013 Used for white foot ants. .didn't have to call a professional. It can be good for outside around the house perimeter and on the grass or bushes. The site indicates that it is good for these ants, but the professional says they don't use it for that, but they use it for other ants. I wish the label was more specific. But it is a good product despite not working for me Was this review useful to you? YesNo 1 of the 1 people found this review useful Not everything has been cracked by Michael on 04/09/2013 I have now sprayed my house from top to bottom twice. I had eastern cockroaches, ants, wasps, pillbugs and beetles when I moved here. After following the instructions the first time I noticed that the pillbugs and wasps were gone, but still had problems with the others. 2 weeks later I sprayed again, and I was still seeing the cockroaches, ants and beetles. I finally went and bought a raid fogger and already noticed a significant difference. Was this review helpful to you? YesNo 1 out of 2 people found this review useful spring tails Brian on 07/23/2012 I was recommended this product and it killed everything but springtails I have 2 uses in 3 days and still no satisfactory results Was this review helpful to you? YesNo 1 out of 1 people found this review helpfully disappointed in Beach By Bernadette on 09/07/2011 Yes, I am disappointed, after reading all the good reviews for this item, I thought I found the perfect insecticide to get rid of the mosquitoes around my house. so I sprayed very carefully all my garden (9000 sf) with 14 gal of mixture (2oz per gallon) and hoped it will last at least a month (reading the reviews should have last 3 months). we had fewer mosquitoes for 1 week and then the infection was back to normal, impossible to be outside at any time of the day, it's true that it's the rainy season, maybe it's why? we will see in the dry season if it works ! Was this review helpful to you? YesNo 1 of the 1 people found this review useful Does Not Work on Millipede By Jeff on 07/05/2019 Works on some spiders etc, but does not slow even the centipedes. Was this review helpful to you? YesNo Not the Best for Fleas By Amanda on 07/12/2019 I bought this for fleas mainly because I have a problem with them. With five dogs I wanted to treat my garden. I have applied two applications heavily and it has not done any things. Actually, they look worse. It's good for cockroaches and spidered but for fleas I wouldn't recommend it. I even mixed with Bifin I got at the same time. :(wasted \$100 heck was this review helpful to you? YesNo Review after 2 applications By Debra on 10/04/2019 For the first few days after the application we saw here and there a dead bug. But then the living started moving again. Same results after the 2nd application. I was really counting on this. Orkin paid a fortune for two years. It's frustrating. And just keep cleaning and throwing away rubbish and praying. Was this review helpful to you? YesNo Barely half bottle By Marie on 05/01/2020 When I got my order the bottle was sealed, but halfway full. I called the customer service number, and was told they would only fill the bottle up to the label. The label is placed halfway up the bottle. I haven't used it yet, it's been too windy. I've heard a lot of good things about this product. I can't wait to put it to the test. Was this review helpful to you? YesNo Shipping needs to be improved. By Rae on 10/09/2020 I got my first shipment in a soaking wet box full of spilled poison. I'm talking about my hands bringing it indoors and opening it. It was thrown loose in a box with no packaging, packaging or padding. Given that this is a very concentrated poison you would think that more care would be taken. The company sent a replacement quickly and it came out safe. The product seems to work as described. Was this review helpful to you? YesNo talstar p By David on 07/27/2014 Verified Purchase we ordered product mainly to rid our garden and porch of mosquitoes, and also to deal with spiders. We have only applied once and will do so again in the hope that we will achieve better results. achieve. far, after just one application, we are not impressed. If a second application shows improvement, I will advise. Was this review helpful to you? YesNo 0 out of 2 people found this review useful It works, sort of by Gary on 08/08/2018 I've used this the past year. Spraying 4 feet from the exterior walls, around windows/doors, 3 feet away from the foundation and garden beds as well as perimeter treatments. It seemed to work, but not fast enough to stop the insects from entering the house. I found some dead insects, but I still had to manually kill earworms/spiders every day. I just tried Tempo SC Ultra and Ask G Grains which worked 100% better. Was this review helpful to you? YesNo Formula has been changed By Kit on 10/21/2017 Ive used this product several years ago and its certainly not as strong and effective as it was. Contacted company and they said it was the same, but still a ton of boxelders didn't work like it did before and it doesn't even smell strong like it did before Was this review helpful to you? YesNo It doesn't seem to work as usual By Nghia on 07/30/2017 I have ordered Talstar P several times, it worked perfectly and I have not seen any mosquitoes in my backyard. However, this Talstar P does not work, I have tried to increase the amount, and applied three times in four weeks, but mosquitoes still live and fly around the house. My children were stung by them. Was this review helpful to you? YesNo 0 of the 1 people found this review useful Did Not Work by Pepper on 09/11/2016 After following the directions to verify the letter and even calling CS to add the amounts to the water.... the product did not work. I even sprayed on three different dates. NOTHING HAS CHANGED! Not happy with this product as the Flea lives on! Maybe my bottle was a recall and I didn't get the notification. Lesson learned. Was this review helpful to you? YesNo Not as good as Cyper TC By Samuel on 08/31/2016 Bought this product with confidence after reading all the reviews about it. However, it doesn't work half as well as what we usually use, Cyper TC. Spiders have increased dramatically since using this product, going back to Cyper TC. Was this review helpful to you? YesNo Undecided By Kathy on 07/18/2016 My husband mixed half the bottle per the instructions. Sprayed the perimeter of the house, sprayed our bathroom, attic and roof! I can't lose those damn springtails!!!! Was so hopeful when we bought the, but so far it's nothing to do. :(I have pest control companies here and paid extra for their power spray.... They keep coming! Was this review helpful to you? YesNo Displaying 1 to 30 (out of 32 reviews) Page 6 It from 1 to 30 (out of 60 reviews) does not work on SPINGTAILS By Jake on 06/13/2015 Verified purchase Terribly disappointed with this product. Of all the enthusiastic reviews on how this kills the only product that kills all bugs, including springtails, I was convinced that I had made the right purchase. Well literally 20 minutes after spraying the outside of my house with the finished solution, the springtails not only came back, they ran right through the solution! 3 hours after spray, it seems that my problem has gotten worse! Tons of them all over the house. Expert response: Because Talstar P is a residual product, it can take 30 minutes or more to kill individual insects due to its mode of action. Springtails are a very productive pest that can be very difficult to treat. To completely eradicate them, you need to identify and eliminate the moisture source that creates an ideal situation where they can reproduce. You can read more information on our Springtails page (scroll to the bottom for the article): We are also happy to discuss your situation by phone at 866-581-7378 M-F 9a-5p EST. Was this review helpful to you? YesNo 45 of the 51 people found this review helpfully Did nothing by Gary on 07/07/2011 I got my 1 liter container today, I mixed a batch and went on my deck (which is loaded with Springtails) at dusk. I sprayed one wall, they all disappeared (for about 5 minutes) back to see slightly less springtails than before, but 3/4ths were back and literally walking right over the wet wall like it wasn't even sprayed. These bugs have absolutely no dislike of this stuff. I even tested inside on my patio where I found 3 or 4. Sprayed them instantly just to see what happens. They came out once and walked away like nothing had happened. I'm starting to wonder if this is the \$. Was worth it. Hopefully the grains deliver better results once they enjoy in... Was this review helpful to you? YesNo 23 out of 51 people found this review useful Talstar One By V& on 07/01/2012 Verified Purchase My son and I are not at all impressed with Talstar One. All it seems to do is off the nasty cockroaches, doesn't seem to kill them at all. It may work well for fleas, we didn't have that problem, but the people in front of us moved in and left a nice congregation of cockroaches. We ordered this product to kill the cockroaches, but it doesn't seem to kill them. They will fall down as if during the flight on us if they get a chance however. Was this review helpful to you? YesNo 21 out of 29 people found this review useful Kills no bugs - NO return of opened product By name on 01/24/2017 SERIOUSLY? I give this product ZERO stars because it just doesn't kill bugs. ALSO - DOMYOWNPESTCONTROL.COM won't allow you to return an opened bottle no matter how worthless the product is, so, don't if you want to get your money back if you realize that this product is not working. Expert response: Thanks for your comments! We're sorry you were unhappy. Was. the results of the use of Talstar P. Talstar P is a very popular product with a variety of uses, but for some pests such as cockroaches or bedbugs, we recommend to use other products in combination with a liquid concentrate. We have great pest guides that indicate how to identify, inspect, treat and prevent infections for the most common structural pests. These guides also have links to our Pest Control Kits for any pests, as well as top rated products for those situations. We are also happy to help you with phone, email or live chat with questions or concerns about products or treatment. Regarding returns, we are happy to accept returns on most products within 90 days for items that are unopened and in original, resalable condition. We are always there to provide advice for purchases or during your treatment to help you get the most out of your purchases. If you're having trouble getting the results you expect, we'd like to resolve issues with you to find a good solution to your needs. Was this review helpful to you? YesNo 19 of the 22 people found this review useful Talstar By Dan on 05/15/2010 Verified purchase Not sure if this stuff works. I've sprayed and applied grains, but I still see chinch bugs. I use two grams for every two liters of water and apply it over a 1000 m² surface. Should I use more? Was this review helpful to you? YesNo 18 out of 30 people found this review useful No match for florida ants By Enero on 11/16/2015 Thought this product would help solve my problem with black ants in the house. We sprayed everywhere both inside and outside and waited several weeks and found no improvement Expert response: While Talstar is a great product it is not always able to eliminate an ant colony unless you spray directly up the hill or nest. This is because ants send only a very small part of the colony to forage. The majority of ants remain in the nest or hill raising a new generation of ants. So while the foraging ants can be killed, new ants are already being reproduced to replace them. When the nest or hill cannot be treated directly, it is important to use a product that is brought back to the colony, such as an ant bait or spray such as Phantom or Termidor (can only be used outside). PLease take a moment to read our Ant Treatment Guide to learn how to have a successful monitoring program Was this review helpful to you? YesNo 17 out of 18 people found these Useful Poor lawn results reinfested within 2 weeks By Walter on 10/07/2011 Previously used Bifen I/I from other supplier. Was effective for about 3-4 months. Same composition as Talstar P, but Talstar was only good for a few weeks. Very disappointed with this product. Product never buy again. Rating, not even a 1 star was this review helpful to you? YesNo 16 of the 29 people found this review useful for fleas and insects purchased by Michael on 03/23/2012 Verified purchase did not work for me! SE Tennessee. I bought the 16oz and have already used more than half the bottle. Looks like the fleas and cockroaches got worse. Maybe I did it wrong. I used, according to the directions. 1oz to 1 litre of water. Just don't work for me! Was this review helpful to you? YesNo 15 out of 16 people found this review useful not worth it! By Bonnie on 09/10/2012 Verified Purchase Talstar did not do what it was supposed to do. Works well on spiders ey. Don't recommend it for cockroaches. Not even a dent in the problem. Ordered something else instead. By a recommendation from a real expert. Was this review helpful to you? YesNo 13 of the 20 people found this review useful Not happy By Teona on 03/17/2018 Not killing the cockroaches very disappointed in this product Expert comment: We are sorry that you do not see the results you expect from Talstar P. We recommend using a roach bait gel and an Insect Growth Regulator (IGR), also in addition to good sanitation and exclusion for the most complete for control. We see that you have already purchased Advion Roach Bait Gel, and that product will pass to cockroaches that hide in places where sprays can't be. We have more great tips in our Roach Treatment Guide here: Talstar will kill cockroaches that you spray directly or come into contact with treated area, but if the population is already established, most of those cockroaches are hiding and quickly reproducing in wall cavities and other areas where the spray just won't reach them alone. We are also happy to help you with your situation by phone at 866-581-7378 M-F 9a-5p EST. Was this review helpful to you? YesNo 9 of the 9 people found this review useful Not worth my money By Danny on 03/21/2012 I bought this product about 2 weeks ago in the hope that it would have solved my antagil. Unfortunately, it proved ineffective and even counterproductive. I will never buy it again, nor will I recommend it. Was this review helpful to you? YesNo 7 out of 9 people found this review useful Fleas By Bertha on 09/12/2012 Verified purchase We have sprayed inside and out with this after also using Ultracide. We still have the flea problem. Was this review helpful to you? YesNo 7 out of 8 people found this review helpful not really received by Joe on 06/17/2016 This mosquito fight in Florida. I'd say I didn't notice diffidence. I don't live water, so you don't say I lost the battle before it started. For what I care most reviews are fake like this product. Was this review helpful to you? YesNo 7 out of 10 people found this review usefully worthless by Rafael on 1 own a couple of rental properties. cleared and left with lots of cockroaches. I applied for Talstar. It kills some cockroaches when sprayed. come back a week later still lots of cockroaches. has a few more cockroaches. product has no residual killing power. I want my money back! Expert response: We do not recommend using Talstar only for anese control, especially for a bad infection. Take a moment to read our guide to a preliminary check to learn how to effectively control even serious anse with infections: Was this review helpful to you? YesNo 5 out of 8 people found this review useful Why by Barry on 09/16/2014 I've sprayed the house three times, we still have the same problems!!!!!!!!!!!!!! Was this review helpful to you? YesNo 5 out of 14 people found this review useful Be careful what you buy by Jorge on 05/26/2017 The label says it ends with a series of insects inside that contain ants and cockroaches, but they will be from Mars because those from here from the earth are only the perfume, therefore I recommend this perfume to them because it has no use. Was this review helpful to you? YesNo 5 out of 14 people found this review useful Does Not Work on aphids by Mike on 04/30/2012 Verified purchase Was recommended this product for aphids, it does not even kill them just reproduce. I marked a leaf so I could check it, not even killed it. Over to my last wit with them! They're killing my bastards and everything underneath. I've been digging them up and fighting these things for three years. Was this review helpful to you? YesNo 5 out of 8 people found this review useful Talstar sucks by Don on 08/01/2017 I have applied this chemical to three different locations. One had a spider problem, the other had a cockroach problem and the latter had a flea problem. I haven't seen a sign of a dead bug and I've applied it to twice its strength after not seeing the results apply as suggested. I wasted \$30, I suggest you don't do the same. You would expect to see a dead bug here or there after an application, but I didn't. Not impressed! Was this review helpful to you? YesNo 5 out of 7 people found this review useful Cockroaches laughing at this stuff By Doug on 08/18/2015 I mixed this product at 3x specified ratio and sprayed it on a cockroach head, put it in a jar and eventually had to smash it 5 days later. I don't know if the product I got was just a bad batch, but I'll switch it with something else. Expert response: We are sorry to hear that you have not had the expected results After reviewing your order history, it seems very likely that you are dealing with a pyrethroid resistant ant population, as you have been using the same class of active substance for years. Take a moment to read our Roach read Guide to effectively implementing a roach control program: Call our customer care team if you want expert advice on your specific situation: 866-581-7378 Was this review helpful to you? YesNo 5 out of 7 people found this review useful Carpet Beetles By Michael on 03/02/2017 Didnt kill them at all. They kept crawling around and there were no fewer. Expert response: Thanks for your feedback! Carpet beetles can eliminate a tricky pest because they hide well and can multiply very quickly. Make sure you vacuum thoroughly and regularly (several times a week is best) in all areas where you see carpet beetle activity. The larva stage of this insect feeds on organic materials such as pet dander and animal fibers such as wool, so cleaning to eliminate these food sources is crucial for eradicating this pest. We also recommend using an Insect Growth Regulator such as Gentrol IGR, along with Talstar to help interrupt the breeding cycle of this pest. Here you can see additional tips: (Scroll to the bottom for the article.) Please call 866-581-7378. We appreciate your feedback and your business! Was this review helpful to you? YesNo 4 out of 4 people found this review useful Product did not work by Mb on 10/11/2011 We have chinch bugs and this product did not work, our grass is still being eaten and now we have to spend even more money to get a professional service coming. Was this review helpful to you? YesNo 4 out of 5 people found this review useful Talstar P By Todd on 06/27/2012 This product was returned as I found out after receiving it, it was not ok to use on my pasture with grazing cattle. I bought it for mesquite control. Was this review helpful to you? YesNo 4 out of 13 people found this review useful talstar one By Patsy on 04/07/2013 Verified purchase I don't think it did any good. It didn't help the problem that we could tell and we used the sprinkler. Was this review helpful to you? YesNo 4 out of 9 people found this review useful waste of money by Ryan on 09/24/2012 I have been using this stuff for about a year and I believe it has called more cockroaches in my house. Me and my wife don't see many dead cockroaches after using them. I stared out with a small problem problem now I'm about 90% about walking with them. I can't get it anymore. Was this review helpful to you? YesNo 4 out of 11 people found this review useful Talstar P for ground hornets By Anonymous on 07/31/2013 Verified purchase It did nothing for my land hornet problem. Seems to work well The other insects do. Was this review helpful to you? YesNo 4 out of 8 people found this review useful cockroach problem by Jayro on 07/24/2017 cockroach problem P. It didn't work at all. Was this review helpful to you? YesNo 3 out of 3 people found this review useful does not work as labeled. By Curt on 08/19/2016 Bad product. Mix and spray the stuff according to the directions and still be ambushed by masses of mosquitoes every night. Tried cold, thermal cover along with hand pump nozzle. Nothing. Can't handle Minnesota mosquitoes. Slow, small deaths at best. No residual deaths. It's a waste of money. Was this review helpful to you?
