RAR RELEASE VIDEO NARRATION cloud.mail.ru file downloadvideo NARRATION Goat Simulator MMO Simulator And normal MMORPG, a glimpse of the European and American-style magic landing interface, it is worth mentioning that the game supports the same as in the past, this time in addition to loading text is somewhat strange, the other is one feel not the slightest threat . Then enter the create character interface, create ... People... Interface... Choose a career for the goat still not accustomed ah ... Goats, magic sheep, hunting sheep and microwave sheep and other roles of different goats not only do the same look, and even the skills are different because of sheep, but which of the microwave sheep end up in the situation ... The style of the game and the original Goat Simulator is consistent, but the scene style of the modern city is the magical city that corresponds to the map drawn parchment style, the game can also see other players and NPC walking on the map , And the other characters will show their names on the head, while at the bottom of the screen players can see the players in the current channel chat content , including communication with the NPC is also displayed below the standard elements, such as boxes the game is still relatively complete. The task system of the MMO game has always been a very important system, but in this game, players can be given the task of being the right NPC, you have to mark an exclamation point on the map you can get the task on the NPC page, the player completing the task can get a certain experience reward, the general mood is like a mainstream MMORPG looks like if the player involuntarate destruction of the scene can get a small amount of experience reward which is still very similar to the original. The game still has many slots, a variety of unreasonable physical feedback, exotic little eggs after another, the monster design is quite deadly, through the underground city layers the authorities rushed to the name of the old goat Tyrannosaurus, inexplicably their own Fry we fly, the player can put the NPC in the object box -APKawarD.com Goat Simulator MMO Simulator continues to pursue the previous good tradition , developers are always surprised, as you can not believe if the success of the initial Goat Simulator is an accident, then the next can not see the developer's imagination, not too tangled screen, game or task, only slowly to explore this absurd world created by Coffee Stain, want to update the perception of players want to try, Goat Simulator MMO Simulator Although there are no main lines, symbolizes the small map of the game calls for many pending missions, all of which seem to want to recall the meaningless gaming experience: Why kill 10 goblins and kill 10 rare protected animals What's the difference? Why does this bald guy want me to help him find a pile of straws, it's hard to get out the door? Why did I go to that barinn in the next town? It went very slowly and I wanted to put him in the backpack and put him straight ... The action of the game is to use the virtual rocker In the lower left corner of the screen to move the goat, click on the button in the lower right corner of the screen to perform operations such as jumping or iron work, and those who have played the series should be profi ed soon. Different from the previous unique feature, each task is ready to launch a fireball, invisible magical skills, and pick up tasks from the NPC. And the mission, to overthrow the enemy, from a height down ... no matter what you will experience, beyond a certain value can be updated. Game chat area shows the guild invitation message as well as the appearance of other players goat appearance, although equipped with a number of MMORPG elements, but they are NPC masterpieces. Simply put, it doesn't matter that it's just MMO simulator, actually dedicated offline, as in the past, as if no one else had to participate. Because you can try something that does not prohibit normal MMO, so not only goat fans, you can try to relieve the pressure to Oh! THEO DÕI CHÙNG From You can open the Mac App Store to buy and download apps. ** IMPORTANT - SUPPORTED DEVICESiPhone 4S, iPad 2, iPod Touch 5 or better.**The Goat Simulator is the latest goat simulation technology that brings you the next generation goat simulation. You no longer have to fantasize about being a goat, your mobile dreams are finally come true! Gameplay-wise, Goat Simulator is all about causing as much havoc as you can as a goat. They compared it to an old-fashioned skating game, except instead of being a skater, you're a goat, and instead of doing tricks, you ruin things. More! When it comes to goats, even the sky is the limit as you can probably just bug on it and crash the game. DISCLAIMERGoat Simulator is a completely stupid game and to be honest, you can probably spend your money on something else, such as hula hoops, a pile of bricks, or maybe pool your money together with your friends and buy a real goat. HIGHLIGHTS * You can be a goat * Get points for destroying stuff - brag to your friends that you're the alpha goat * million bugs! We just eliminate the crash-bugs, everything else is hilarious, and we keep * In-game physics to bug you out all the time * Seriously look at that goat's neck * Can a goat October 23, 2017 Version 1.9.7 You're a goat, free to run and cause serious bodily injury in a virtual city. And trust us: this premise leads to tons of hilarious moments and stunts. We crashed parties, head-to-head cars, jumped on trampolines, and did a million other silly things in this outrageous sandbox game. Please correct this error: When I play the game crashes randomly. I have the latest version and use the iPad Pro. Also not much to do with the school map, at least nothing very exciting. In Goatville you can blow up the train, play a Abolish Coffee Stains Studios or jet pack off a crane. In this (I forgot your name) you can fly a firework, throw yourself off a roller coaster, beat the ninja turtles in the sewer (lol) or blast into a hotel café. What can be done on the school map? Well, catch book thieves, draw graffiti on the walls, and a statue of the goat (TNT word). Hmmm.... Lack the madness of the rest of the map. So maybe add a few more exciting things to school. I have an idea for a map, an airport. You can blow up a machine (massive explosion, wipe out most things near) pulling bizarre things into suitcases (like T-Rex) and more. Also a goat idea would be the caffeine goat that you get for drinking coffee. When you tap the prisoner of war, the goat is crazy. Maybe it's a slippery goat that's like a snake goat. Also, please make glass breakable, I think it will add a lot more fun to the game. You may be able to add a friendly system, so for example, if someone has a friend who plays my goat, you can send them a friend request, and if the other player accepts it, they can play together. Well, that's all. Thank you for reading ☐ ☐ So if you have a computer, Xbox, PlayStation, or Nintendo Switch, I recommend you to play the game or this entire collection (Goat Simulator: The Goat, worth the price) on one of these platforms. These platforms have better graphics and more features than the mobile version. Curious to buy this at all? Here is an info: goat simulator is a game where you play as a goat (of course) and run around destroying as much as possible. The character options are not limited to just one goat, though; You can unlock other animals as well as mutations in the normal goat as you play the game. It's funny, and I suggest you buy it. The three small maps provided by this mobile version might get boring after a while, though. As I said, I recommend a complete collection on another platform that will give you millions of things to explore and explore. If you don't have those platforms though, I recommend just now for smooth gaming on mobile. And if you have a computer but are worried about the game so far M, you can turn all the things that gave him that rating when the game starts.
