English Español Français Português Super Nintendo Entertainment System, abbreviated and best known as NES, is a product Nintendo Corporation released in November 1990 and is owned by 4th generation video game consoles. In Japan, the analog of this console was known as Famicom. After a year or two, this console began to conquer the world, reaching nearly fifty million sales throughout its life. The popularity was so high due to console games - Super Mario and Donkey Kong Country, all 90's was an incredible race. Characteristic of this console was improved graphics and sound effects, 16-bit and additional chips. All this has allowed it to be competitive for years. To buy this toy, the buyer had to shell out a little more than two hundred dollars. In 1991, a cheaper version of the console was released called Famicom Super, which was only available on the United States market. Over the years, the Super NES console often had to compete with the Genesis console developed by Sega, where the fight for lead was usually won by Nintendo. Finally, production of the console in the United States happened in 1999, and in Japan its release was extended until 2003 due to its constant demand among customers. Almost all versions of the Super Nintendo console were designed in gray color, but had different forms - square oval. This console also has a variety of external devices that can be connected. It can have all kinds of adapters for multimedia features, weapons, joysticks and even special modems to connect the console to the internet so you could download games or play online. In conclusion, the super nintendo game console was one of the most successful inventions at the time in terms of sales, making it considered one of the best game consoles of all generations due to high quality and high performance.
