Business processes need reingering based on the vision and application of organizations. The refurbishment of the corporation provides key information on how to restructure or restructure the business process so that the goal and value are achieved based on customer needs. I found the following as the key to the book. Chapter 1: The concept of reininining - Reinjunering - is an opportunity to develop rules by which business in the future will be conducted, rather than be forced to work according to the rules imposed by someone else. Mio transfer hack c250 plus. - Reinjunering is defined as a fundamental rethinking and radical redesign of business processes to produce significant improvements in critical performance indicators such as cost, quality, service and speed. The description of America's business problem is that it enters the TWENTY first century with companies developed in the nineteenth century. So write Michael Hammer and James Champy in this groundbreaking book on the most important topic in the business community today: Reinjuning is a radical redesign of the company's processes, organization and culture. Reiner Corporation offers nothing but a whole new vision of how companies need to be organized and managed if they are to succeed - really even survive - in the 1990s and beyond. Reingering doesn't tend to make business better through incremental improvements - 10 percent faster here or 20 percent cheaper there. The goal of re-equipment is a quantum leap in performance - a 100 percent or even a tenfold improvement that can be associated with completely new processes and structures of work. Drawing on their first-hand experience, Hammer and Champy show how some of the world's largest corporations are using the principles of reingenering to save hundreds of millions of dollars a year, achieve unprecedented levels of customer satisfaction, and accelerate and make all aspects of their operations more flexible. The key to the regent is the rejection of the most basic concepts on which the modern organization is founded. Today's workers and managers are prisoners of outdated theories about the organization of work - theories that date back to and the beginning of the industrial revolution. These ideas - the division of labour, the need for careful control, the managerial hierarchy - no longer work in a world of global competition and relentless change. Instead, the authors introduce the notion of targeting the process, concentrating on and rethinking the ultimate activities that create value for customers. This book is about more than ideas, though. From their work with leading companies around the world, Hammer and Champi have learned how to make reingelering successful. They lay out approaches that have allowed companies like Bell Atlantic, Taco Bell and Hallmark Cards to reinvent themselves. They offer a vision of a re-injecting corporation and a roadmap for companies to follow in getting there. Between political unrest and the new coronavirus (COVID-19) pandemic, it's hard to look back a year and find something, anything that was a potential bright spot in an otherwise turbulent journey around the sun. Fortunately, there were a few bright spots: namely, some of the excellent works of military history and analysis, fiction and non-fiction, novels and graphic novels that we have absorbed over the past year. Here's a short list of some of the best books we read here at Tasks and Goals last year. Do you have your own recommendation? Send an email to jared@taskandpurpose. Com, and we'll include it in future stories. Phil Clay's missionaries loved Phil Clay's first book, Redeploy (which won the National Book Award), so missionaries were high on my list of must-reads when it came out in October. It took Clay six years to research and write a book that follows four characters in Colombia who come together in the shadow of our wars after 9/11. As Clay's prophetic novel shows, technology, drones and targeted killings, which was built on the battlefield in the Middle East, will continue to grow in remote lands that rarely get headlines. Buy - Paul Szoldra, editor-in-chief of Battle Born: Lapis Lazuli Max Uriarte Recorded by 'Terminal Lance' creator Maximilian Uriarte, this full-length graphic novel follows a Marine Corps squad on a bloody odyssey through mountainous areas of northern Afghanistan. The full-color comic is basically Conan the Barbarian in MARPAT. Buy - James Clark, senior reporterThe Liberator Alex KershawNow's gritty and grim animated World War II miniseries from Netflix, Liberator follows the 157th Infantry Battalion of the 45th Division from the beaches of Sicily to the mountains of Italy and the Battle of Anzio, and then to France and then back to Bavaria for some of the bloodiest urban conflict to the climax of the conflict. It's a harrowing tale, but worth reading before enjoying the acclaimed Netflix series. (Buy) - Jared Keller, Deputy Only Plane in the Sky: The Oral History of 9/11 Garrett Graffiffiff you haven't got this must-read account of the 9/11 attacks, you only need to put a plane in the sky at the top of your Christmas list. Graff skillfully explains the timing of the day, talking about those who lived there, including those close to those who were lost, the insistently brave first responders who were on the ground in New York, and the servicemen working at the Pentagon. My only suggestion is not to read it in public - if you're anything like me, you'll be consistently left in tears. (Buy) - Hayley Britzky, Army ReporterThe Body in Pain: Creating and Unmaking World Elaine ScarryWhy Do We Even Fight Wars? Wouldn't a massive tennis tournament be a better way for countries to settle their differences? This is one of the many questions Harvard professor Elaine Scurry is trying to answer, and why nuclear war is akin to torture, why the language surrounding war is sterilized in public discourse, and why both war and torture destroy human worlds, destroying access to language. It's a great lift to read, but even if you just read chapter two (as I did), you'll go away thinking about war in new and refreshing ways. Buy - David Rosa, BBC Stalingrad reporter: The Fateful Siege: 1942-1943 Antony Bivorstalingrad takes readers all the way from the Nazi invasion of the Soviet Union to the collapse of the 6th Army near Stalingrad in February 1943. This gives you perspective on German and Soviet soldiers during the most apocalyptic battles of the 20th century. (Buy) - Jeff Schogol, Pentagon correspondent for American War for the Greater Middle East Andrew J. BacevichI took America's war for the Greater Middle East earlier this year and couldn't put it down. Published in 2016 by Andrew Bacevich, a historian and retired Army officer who served in Vietnam, the book unravels a long and winding story about how America got so entangled in the Middle East and shows that we are waging one long war since the 1980s - with errors of judgment by political leaders on both sides of the aisle to blame. From the end of World War II to 1980, virtually none of the American soldiers died in combat while serving in the Greater Middle East. Since 1990, virtually no American soldiers have been killed in combat. What caused this shift? Asks the book jacket. As Bacevich details in this final story, the mission creep of our Vietnamese experience has been played over and over again over the past 30 years, with disastrous results. Buy - Paul Szoldra, editor-in-chief of Burn In: The Novel of the Real Robotic Revolution. W. Singer and August ColeIn Burn In, Singer and Cole take readers on a journey into an unknown future in which an FBI agent is looking Terrorist in D.C. Set after what the authors call a real robotic revolution, Agent Lara Keegan has teamed up with a robot that is less Terminator and a much more useful, and very smart, law enforcement tool. Perhaps the most interesting part: almost everything that happens in history can be traced back to the technologies that are being explored today. You can read the Trust and Trust interviews with the authors here. Buy - James Clark, Senior Reporter: Rogue Heroes Ben McIntyreLike World War II? How is a group of eccentric daredevils wreaking havoc on fascists? Then you'll love SAS: Rogue Heroes, which re-tells some really insane heists performed by one of the first modern SWAT units. Best of all, Ben McIntyre bases his story in a compassionate, balanced tone that displays both the best and worst of SAS men who, like no other, are the only men after all. Buy - David Rose, bbc reporterThe Alice Network's Kate ?uinn Alice network is a gripping novel that follows two courageous women through different periods of time - one living after World War II, determined to find out what happened to someone she loves and the other working in a secret network of spies behind enemy lines during World War I. This gripping historical fiction is based on the true story of a network that infiltrated German lines in France during the Great War and weaves a tale so packed full of drama, suspense and tragedy that you won't be able to put it down. (Buy) Katherine Rondin, Anchor Books Because I published a new book this year, I was answering questions about my inspiration. That means I've been thinking about and so grateful for the girl in the flammable aimn skirt of Aimee Bender. I can't credit it with making me want to be a writer - that desire was already there - but it inspired me to write stories where fantastic complicates the ordinary, and the impossible becomes possible. The girl in the beautiful dress and no one appreciates it. An unremarkable boy with a remarkable knack for finding things. The stories in this book have taught me that the daily life of my world can become magical and strange, and in this strangeness I could find a new kind of truth. Diana Cooke is the author of the new wildlife novel, which was included in the 2020 Booker Prize longlist, and the Man V. Nature storybook, which was a finalist for the Guardian First Book Award, the Believer Book Award, the PEN/Hemingway Award and the Los Angeles Times Award for first fiction. Read an excerpt from New Wilderness.Bill Johnston, UCLA Press I revisited many old favorites in this bleak year of fear and isolation, and were most grateful of all for the collected poems by Frank O'Hara. Witty, reflexive, intimate, strange, disarmingly casual and serious all at once, at once, was a constant balm and inspiration. The only thing to do is just continue, he wrote, in Adieu Norman, Bon Jour Joan and Joan-Paul; is that simple?Yes, it's simple because it's the only thing you need to do!you can do it!yes, you can because that's the only thing you need to do.'Helen Macdonald is a nature essayist with a semi-regular column in The New York Times Magazine. Her latest novel, Vesper Flights, is a collection of her most beloved essays, and her debut book, H Is for Hawk, won the Samuel Johnson Award for non-fiction and Costa Book Award, and was a finalist for the National Book Critics Circle Award and the Kirkus Award for nonfiction. Andrea Scher, Scholastic Press This year, I am so grateful for you must see me in the crown. Reading - like everything else - was a fight for me in 2020. It was hard to let go of all my anxieties about the state of the world and our country and get swept away by history. But you must see me in the crown pulled me in immediately; during the blissful time that I read it, it made me think about the world beyond 2020 and it made me smile from ear to ear. Joy has been hard to come this year and I am so grateful for this book for the joy it has brought me. Jasmine Guillory is the author of the bestselling New York Times novels, including this year's Party of Two. Her work appeared in O, Oprah Magazine, Cosmopolitan, Real Simple, and Time.Nelson Fitch, Random House last year, stuck in a lengthy rut of reading that left me wondering if I even liked books more, I came across on The Tenth of December George Saunders, a collection of stories Saunders wrote between 1995 and 2012 that took turns funny, moving, striking, weird, insightful, and often all these things at the same time. As a writer, what I crave most from books is to find one so excellent, it makes me feel like I'd rather quit smoking - and so wonderful that it reminds me that it has to be a pure reader again, confronting new worlds and revelations every time I turn the page. The tenth part of December is and I am so grateful that it fell off the high shelf and into my life . Veronica Roth is the #1 New York Times author of the bestselling series Divergent and Cut Mark Duology. Her latest novel, The Chosen Ones, is her first adult novel. Read an excerpt from Chosen Ones.Ian Byers-Gamber, Blazevox Books Waking Up Today the prospect of a few hours spent reading from part of another day of this disastrous, raving pandemic year, I am very grateful for the book in my hands, one myself full of gratitude for the life spent reading: Gloria Freeman as Proust ruined my life. Firm's essay - about Marcel Proust, yes, and Walt Whitman, and Lucia Berlin, but also mint-stick candy and the knees of Allen Ginsburg, among other Proustian memory-hints - me feeling my eerie luck in life spent rushing to the next book, the next page, the next word. Jonathan Letham is the author of a number of critically acclaimed novels, including Fortress of Solitude and the National Book Critics Circle Award winner Motherless Brooklyn. His latest novel, Arrest, is a post-apocalyptic tale of two siblings, a man who came between them, and a nuclear super car. David Hesca Wanbli Weiden, Riverhead I am incredibly grateful for the magnificent heartbeat of David Treuer's injured knee. This book - a melange of history, memoirs and reporting - is a reconceptualization of indigenous life that has been urgently needed since the last great indigenous history. Dee Brown's Bury My Heart at Wounded Knee. It's an immediate counteroffensive and replacement for Brown's book, and he rejects the standard tale of indigenous victimization, conquest and defeat. Although I teach Indian studies to students, I have found new ideas and revelations in almost every chapter. Not only is great reading, the book is a huge contributor to Native American - and American - intellectual and cultural history. David Hesca Wanbli Weiden, an enlisted member of Sicanu Lakota Nation, is the author of the novel Winter Counts, which BuzzFeed Book Club in November pick up. He is also the author of the children's book Spotted Tail, which won the 2020 Spur Award from Western Writers of America. Read an excerpt from Winter Counts.Valerie Mosley, Tor.comIn 2020 I was lucky enough to finish one book in 30 days - but I burned this 507-page brick over the weekend. Harrow Ninth reminded me that even when absolutely everything is terrible, you can still feel a deep, pleasant, brain-buzzing admiration for brilliant art. Thank you, Harrow, for being one of the brightest places in the darkest year and for keeping house fires burning. Casey McCuiston is the author of the New York Times bestseller Red, White and Royal Blue, and her next book, Last Stop, will be released in 2021. I am grateful for V.S. Naipol's disturbing masterpiece Bending in the River, which not only made me see the world anew, but also made me see what literature could do. It is a book that is clear enough to reveal the brutality of the forces that shape our world and its politics; still soulful enough to penetrate the most intelligence secrets of the human interior. A book of great beauty without a moment of mercy. Marriage opposites that continues to shape my own deeper sense of how much a writer can actually achieve. Ayad Akhtar is a writer and playwright, and his latest novel, Homeland Elegies, is about an American son and his immigrant father seeking belonging in a post-9/11 country. Pulitzer Prize winner in drama and literature American Academy of Arts and Letters.Vanessa German, feminist press I am very grateful for dad was the number runner Louise Meriwether. This is a YA book set in 1930s Harlem, and it was the first black girl-coming-age book I've ever read, the first time I've ever seen myself in a book. I appreciate how this has expanded my world and my understanding that books can talk to you right where you are and take you on a journey at the same time. Deesha Philyaw's debut story collection, The Secret Life of Church Ladies, was a finalist for the 2020 National Book Award for Fiction. She is also co-author of Co-parenting 101: Helping Your Children Thrive in Two Households After Divorce, written in collaboration with her ex-husband. Filiau has written about race, parenting, gender and culture in the New York Times, The Washington Post, McSweeney's, Rumpus and elsewhere. Read a story from the secret life of the Church of Ladies.Philippa Gedge, W. W. Norton and Company As a writer and reader, I am very grateful for Patricia Highsmith's conspiracy and writing suspense fiction. As a writer I am grateful for Highsmith's generosity with her wisdom and experience: She tells us how to tease out narrative threads and develop character, how to know when things go awry, even how to decide to give up things like bad work. She is unabashed about sharing her own failures, and in my experience, there is nothing more reassuring for a writer than to learn that our literary gods are mortal! As a reader, she provides a fascinating insight into the genesis of one of my favorite novels of all time - The Talented Mr. Ripley, as well as the rest of her brilliant work. And because it's Highsmith, it's much more than just a guide: It's very interesting and, while available, also gives you a glimpse into the mind of genius. I've read it twice - while working on each of my thrillers, The Hunt Party and guest list - and I know I'll be back to a well thumbed copy on my shelf again soon! Lucy Foley is the author of the best-selling New York Times thriller Guest List and Hunting Party. She has also written two historical fantasy novels and previously worked in the publishing industry as a fiction editor. The books that I am most grateful for this year are three book series called Tales from Jack Townsend's Gas Station. Walking the fine line between comedy and horror (which is much harder than people think), the book is followed by Jack, an employee at a gas station in an unnamed town where all sorts of terrifyingly fantastic things happen. And while the monsters are scary and more than a little funny, it's Jack's bone-dry narrative, along with his best friend/emotional support man, Jerry, that elevates the book into something that's as beautiful as they are absurd. T.J. is a Lambda Literary Award award author and ex-expert claims for an insurance company. His novels include House in cerulean Sea and Extraes.Sylvernus Darku (Team Black Image Studio), Ayevia Clark Publishing Nervous Terms is a book I have read several times over the years, including this year. The novel covers the themes of gender and race and has in its heart Tambu, a young girl in the 1960s Rhodesia determined to get an education and create a better life for herself. Dangaremba's prose is memorable and witty, and the story is thought-provoking. I was inspired anew by Tamba every time I read this book. Mir Azo Medi is a Senior Lecturer in Gender and International Policy at the University of Bristol. She is the author of Global Norms and Local Action: Campaigns to End Violence Against Women in Africa (Oxford University Press, 2020). His only wife is her debut novel. Jenna Maurice, HarperCollins Book, which I'm most grateful for? Where the sidewalk ends is Shel Silverstein. My mother and father read me poems from him before going to bed - I am convinced that it has given me not only a sense of poetic cadence, but also a crooked sense of humor. Victoria W.E. Schwab is the bestselling author of more than a dozen books, including Vicious, Shades of Magic series, and it's a wild song. Her latest novel, The Invisible Life of Eddie LaRue, is a BuzzFeed Book Club December pick. Read an excerpt from Eddie LaRue's Invisible Life.Meg Vazquez, Square Fish My Best Childhood Friend gave me Disturbing Star Madeleine

L'Engle for Hanukkah when I was 11 years old, and it's still my favorite book of all time. I love the way he challenges the genre (it's a political thriller/YA novel that includes a lot of research as well as poetry??) and the way he appreciates wit, gutsiness, vulnerability, kindness, and a sense of adventure. The book tells the story of 16-year-old Vicky Austin's trip to Antarctica; her trip changed my life, too. In a year when a safe journey is almost impossible, I am so grateful for the opportunity to return to my story again and again. Kate Storeyman's debut novel, One Look, is about a plus-size blogger who asked to star on The Bachelor as a reality show. Stayman-London served as the lead digital writer for Hillary Rodham Clinton's presidential campaign in 2016 and has written for notable figures, from former President Obama and Malala Yousafzai to Anna Wintour and Cher.Katharine McGee grateful for Brian Jack's Redwall series. Chris Bailey Photography, Firebird I'm grateful for Brian Jack's Redwall book. I discovered the series in elementary school and it sparked a love of great, epic stories that never left me. (If you read my books, you know I can't resist the broad cast of characters!) I read books. my little sister, using funny voices for all the storytellers. Now that I have a little boy, I can't wait to ever share Redwall with him. Catherine McGee is the author of the new New York Times bestseller American Royal Family and its sequel, Majesty. She is also the author of the Millennium Floor trilogy. Beth Gwynne, Time-Life Books I'm most grateful for the books that carry me out of the world and back, and while it pains me to choose among them, here's one early and one late: zen cho Black Water Sister, which comes out in 2021, but I devoured just two days ago, and long out of print Wizards and Witch volumes time-life Charmed World, which is where I first read about the legend of Schol. Naomi Novick is the author of the New York Times bestseller Uprooted, The Spinning Silver and the nine-volume Temerer series. Her latest novel, Death Formation, is the first of the Scholomance trilogy. Christina Lauren is grateful for Stephanie Meyer's Twilight series. Christina Lauren, Little, Brown and Company We are grateful for the Twilight series of about a million reasons, not least of which is what brought the two of us together. Writing fanfiction in a space where we could be stupid and dirty together has taught us that we don't have to be perfect, but there's no harm in trying to get better with every attempt. It has also strengthened for us that the best relationships are the ones in which you can be your real, authentic self, even if you are struggling to do something that you never thought you would be brave enough to try. Twilight brought millions of readers back into the fold and inspired hundreds of romance authors. We really thank Stephanie Meyer every day for donating the Twilight and fandom he created.
