The prohibition of books existed in the most distant reach of literary history. Socrates was charged with 399 years. C. for the damage of the youth mind [source: Shaw]. Until the invention of the press in 1450, burning literature effectively stopped its spread. However, the possibility of printing and reprinting copies of work brought the emergence of a book insurance. Licensing laws governed by Henry VIII's English monarchy and the Roman Catholic Church are among the first examples of this. As mentioned earlier, much of America's legal precedent for banning books is related to public school libraries. In 1982, a landmark case for the Board of Education, Island Trees School District v. Pico found that school officials were unable to remove the library material because they disagreed with the ideas behind it. To protect students' rights to express as well as to obtain information, the U.S. Supreme Court ruled that a book or periodical must be ubiquitously vulgar in order to provide a valid basis for the ban. Nevertheless, a few years later, the Supreme Court ruled that school officials can censor student journalists. 1988 Hazelwood School newspaper is not a form of public expression [source: Justia]. Hazelwood's decision gave school officials additional leeway to censor the classroom curriculum as well. Public libraries, as open forums of ideas, are unfavorable to ban books for fear of slippery censorship. Even the consequences of Section 215 of the Patriot Act, which gives the government the power to look at people's library records, struck a negative chord with library professionals. Nevertheless, hundreds of people deal with libraries every year to remove certain books, exercising their rights of expression. Although the initial decision on the application for such a request belongs to individual libraries, the higher courts will emphasise the protection of the First Amendment, except in the case of legally obscene material. When you are overwhelmed by debt and you need a new start, bankruptcy filing can help. However, in order to take full advantage of it, you need to know your options. In these books, Nolo's authors explain what each of the most frequently filed for bankruptcy chapters – Chapter 7 and Chapter 13 – can do for you. Whether it saves your house from crowding out, suspends the salary garnish, terminates the claim, or deletes credit card balances, you'll find valuable information to help you decide what type of bankruptcy is right for you. The opinions expressed by the co-authors of the entrepreneurs are their own. I've always thought of myself as spiritual, but not religious. When I felt that my internet company was going through a crisis of spirits, I wasn't sure where to go. After much thought, I install feng shui principles in the workplace. My staff and I brought plants and mirrors to our main workspace and hung flowing fabrics from the ceiling to help with a positive energy flow, or chi. We all agreed our efforts gave us a sense of peace, and productivity increased in some cases. In the end, however, I realized redecorating was just a surface fix. Real change had to come from within. Tricia Molloy, author of Divine Wisdom at Work: 10 Universal Principles for Enlightened Entrepreneurs, says that business owners can use spiritual principles as tools to make better decisions, more easily solve problems, build authentic relationships, be more productive and prosperous, be more creative, experience less stress, have more fun and strike that weak balance between work and life. And many entrepreneurs do just that. Faryl Robin Morse, 40, was guided by his yoga practice to read Diamond Cutter: Buddha on Managing His Business and His Life at Geshe Michael Roach. In the book, she added that spirituality and financially successful business are not mutually exclusive. Every business owner faces a moment of time when it's easier not to do the right thing than to do the right thing, says Morse. I've always been the view that whatever financial sacrifice I have made to sleep well at night has been beneficial to the company, New York-based Farylrobin Footwear, grossed more than \$3 million last year. For Lisa Guidry, 37, president and CEO of Extreme-Technologies Inc. in Houston, believe that higher power is central to who she is as a person. I bring this belief with me to the office every day, and I think it shows how the company works, internally, explains Guidry, whose technology company exceeds \$3 million in revenue. When you manage your company on a higher principle that exceeds only profit, you end up attracting like-minded employees. Guidry, who calls herself a devout Christian, says she does not limit the philosophy under which she directs her company to her personal beliefs. She says her staff includes devout Muslims, Jews and Buddhists. For me, a spiritually charged workplace is more about attitude, says Guidry. That doesn't mean we're making value for a particular religion. Catherine Fox Milian's staff were open to her efforts to bring spirituality to the workplace. My business can be emotionally draining, says 33-year-old ownerChic Parisien Bridal Boutique in Coral Gables, Florida, Milian's mother, who is involved in alternative treatments, introduced her to Tibetan monks who came to her retail space to bless her shop and staff. After the monks gave a blessing, operations, customers and employees were and open. Problems [now] are solved more easily, and more pleasantly. Sadee Whip, a business consultant and executive coach, defines spirituality as follows: In its main form it is a feeling of connection to something greater than yourself. This connection is brought into his life, instead of keeping it internally and privately, living spirituality. Whip says spirituality is an essential component of the success of the work. However, she warns: Excessive control or dictation of how spirituality is articulated would surely kill the spirit of the workplace. The opinions expressed by the co-authors of the entrepreneur India, an international franchise of Entrepreneur Media. No one can deny the impact of a good book at the right time. If you keep a close eye on, the books you read affect you more than you might think. The effect is so profound that it can affect how you speak or even think. (I had the opportunity to experience this when, after reading two books of Ice and Fire Song frenzy, my reflexes wanted me to answer with Yes, my lord, when I was called.) Books, I think, are the best means of making decisions. Research gets into it, they subtly lead you, you get to know different perspectives of the situation and the best thing is that it's all history. Stories that change you as a person. To support my argument I went to ask some technology experts about their literary knowledge and how they were affected by what they were reading. Hari Menon, CEO and co-founder of Big Basket is very inspired by KarmayogiWay, by which Dr. Sreedharan went about building the prestigious Konkan Railway and Delhi Metro is truly inspiring. His dedication, great emphasis on time time, excellent leadership and the highest level of honesty really stands out. Both projects were completed in time and many phases were carried out in advance. Both projects were built in difficult areas and in very difficult areas are areas and in very difficult areas areas are areas areas are areas areas are areas are areas are areas are areas are areas areas are areas areas are areas are areas are areas are areas are areas areas are areas are areas areas are areas are areas areas are areas under india govt. A perfect example for all beginners. MUST READ all entrepreneurs. Arpita Ganesh, founder of Buttercups recommends Fountain'I read both 33 years of age and both taught me my most precious lesson – Don't let the world lower its standards of perfection. Believe in yourself and the world will have to come around. I still read both, quietly often, especially when I feel the need for inspiration in life. Ankita Jain, co-founder and CEO of GoPaisalt has to read all the business. It taught me how important it is to invest in human resources because it is not they are the one who will represent you in front of the public against your customers. He taught us how small aspects and systems become really important while managing a company that is growing rapidly in size. The authors also explain how technology has shifted the balance of power of companies to consumers and argues that the only way to succeed in this ever-changing landscape is to create better products and attract a new variety of multifaceted employees called smart creative's. The book has also changed my concentration from customer acquisition to customer happiness, which is now the only GoPaisa.com motto, it is very important that our customers not only take advantage of our CashBack service, but also recommend it to others. Ashwini Ashokan, CEO and co-founder of Mad Street Den believes that this book is very motivated by the first sci-fi book I have ever read since my husband casts me. I'll never forget that. It motivated me, showed me what strength is – the kind of strength my parents showed me very early in my life, but this book brought it together to me very strangely. I couldn't get it crazy ever since. But of course I love all the usual - Margaret Atwood, Virginia Woolf, Zadie Smith and the rest. Kanika Tekriwal, founder and CEO of JetSetGoBecause it's hard, I can tell you what my favorites include. There are
