Jashin's symbol is an inverted triangle with a circle around it. Overview A little of Jashin and his ways are known by those who are not his followers, so are called Jashinists. According to Hidan, Jashin demands nothing less than total death and destruction. In Akatsuki Hiden, Hidan hits this as a public service, saving people from the fear of death by killing them. One's neighbours are the most ideal target, but Hidan explains to Ameyuki that a neighbor requires more than physical proximity; Hidan spends most of his time with Kakuzu, but he will never consider Kakuzu to be his neighbor because he hates Kakuzu. Hidan always prays to Jashin before a game and asks for a good kill. If he does not succeed, or is not allowed to kill, he asks for forgiveness. In Konoha Shinden, Konoha investigated Jashinism after their meeting with Hidan. They were unable to turn up very crucial information about the religion, and in fact could not find a single worshipper. With so little information to go on, Konoha's official report offered the possibility that Jashin was in fact an invention of Hidan. Several years after the fourth Shinobi World War, Konoha joins forces with Yugakure to examine Jashinism again. In doing so, they uncover a sect of Jashinists led by Ryūki, who have kidnapped travelers to sacrifice themselves for Jashin. Mirai Sarutobi, with the help of Kakashi Hatake and Might Guy, is able to stop the Jashinists and save victims. Hidan is the successful experiment of the secret techniques of the Jashin religion, making him immortal; lack of nutrition is one of the known methods that can lead to said immortal death. Ryūki indicates that this immortality is granted by Jashin in exchange for the ritual sacrifice of several people at once; Ryūki only gathers young women for this purpose, but it is unclear whether this is necessary for the ritual. In addition to immortality, Jashin's followers can use certain jujutsu, creating voodoo-like connections with targets whose blood they have ingested as long as they remain within the perimeter of Jashin's symbol. With Hidan's Death Controlling Possessed Blood, he connects with his goals, causing them to experience any damage that he does; Because he is immortal, he can kill targets by giving himself fatal wounds. With Ryūki's Body Controlling Manipulated Blood, he connects targets to a puppet, making everything that happens to the puppet happen to them and forcing them to imitate any movement the puppet makes, regardless of whether they're alive. Trivia The upside-down triangle symbol of Jashinism resembles the inverted pentagram, which was used by Western as a means of symbolizing evil and attracting evil forces. It also resembles the alchemical symbol for water. Community content is available under CC-BY-SA unless otherwise specified. Sign in to follow creators, such as Del Jashin's symbol.
