Tips for improving your Wi-Fi phone's battery life: Turn it off if you're not using Wi-Fi. You can turn off Wi-Fi by dragging down notifications and settings screen and touching the Wi-Fi icon. Bluetooth shutdown: If you're not using any devices. On the Notification and Settings page. Use airplane mode when there is no natural state, your phone keeps looking for a cellular network. If there is little coverage or coverage, your phone wastes power by following the signal unnecessarily. Switching to airplane mode can help save the battery, but you can't make/receive any calls. Reduce brightness: To downse the screen, go to Settings > And drag the slider. Lock your phone: When you don't use it. Auto Lock: Set auto lock period to 1 minute – Change this under Settings > Lock > Auto Lock. This will prevent you from leaving your phone for longer than necessary. Restrict open apps: Close apps running in the background. Click and hold the button to do this. Swipe left or right to close open apps. Samsung Special Features: Your Samsung phone has a variety of special features like Smart Stay, Air View, Smart Pause, Smart Scroll, etc. Although these features are very cool, most of them use extra power and drain their batteries faster. Make sure you only activate the ones you really need. Coverage: At home
