Want to play: Gun Idle Mod ApkReviews Of GameSoloxus: So far as good, like all mobile games there are clear benefits to paying, but it does not take away from the overall experience of the game (in my opinion) it is an idle game and I treat it as such, log in as often and do it I can then log out, as long as you treat it as such you should have fun even if you are f2p (if you like idle games). overall the game is solid and I would recommend. Jake Scott: I wasn't a big fan of this game when I first started playing. It may definitely need some adjustment. Online chat never responds to me. A little scary considering I'm spending money in this game. I would like to see upcoming event bulletins and also better relocation of old servers that are dying. I'm starting to worry that my server will last much longer, and my investments will be meaningless ... However, if you are willing to several months to get into the game, it can be a lot of fun. Boyo McBoyoing: Decent but need better English translation. would be a five if it wasn't for the fact that it's a tremendous pain in the ass to get a five-star hero at all let alone one you want. Also in the game the notification system needs a serious solution, I don't care about your in-game purchases so stop making me think there's something new to look at.
