Frankentoon Frankentoon is a small imaging agency that happens to publish quite a bit their work for free. They are also publishing some interesting video tutorial on YouTube, check out their Channel Frankentoon Videos, namely, the Index design result using vector video brushes, since it highlights the level of creativity that these designers are working with. If you go to the Design School section, this is where you are going to find all kinds of exciting Affinity Designer tutorials. Right now, Frankentoon covers a lot of ground for character design, sketching process, texture use, and creating vector landscape. It's exactly the kind of tutorials and guides you'd expect as a complete beginner. And it helps that the production value for each tutorial is also top notch! Affinicasts Affinicasts began as an independent project to publish in-depth tutorials on many of affinity products; Photography, designer and publisher. Unfortunately, due to time constraints, the project had to be stopped. It's a big loss for the community, but you can still find some of the Affinicasts content hosted on YouTube. There are about 70 videos in total, most of which were submitted throughout 2018. So the information in the videos is up to date and fresh for years to come. Affinity Revolution If you've searched Affinity Designer training material before, you may have heard of the Affinity Revolution YouTube channel – it has over 130,000 subscribers! The platform is run mainly by Ezra Anderson, who uses his thoughtful and precise style to teach people how to become better vector graphicists. The link used above the photo shown will take you to the Affinity Revolution Lessons page. While all YouTube videos are free, the courses require minimal financial investment, but the training material is worth it. The complete guide Are you a graphic designer looking to steer away from Photoshop? Are you an active user of Affinity Photo and want to improve your understanding of graphic design? Get a clear understanding of the color and its design results. Understand how to use pen and brush tools. Get a specific experience by designing a professional logo. Explore how to use the mask, but also shading to create really real Vectors. Flat vector illustration There are several reasons why we recommend exploring this tutorial, in addition to the nature of long format (30+ minutes) and clear formatting. First of all, it is a sponsored tutorial by Serif (manufacturer of Affinity products), and secondly, it is written by an experienced designer who has been in the industry for many decades. And despite the tutorial bein sponsorship, it is not written in a way that promote or advertise the product. All this together makes this one of the best courses for affinity designer newcomers. You are going to learn how to create a flat vector display, just like the one shown in the photo above. To create something this pixel-perfect, you need to get some new skills along the way. And that's exactly how this tutorial is structured, from one technique to another – showing you how to do it. iPad Pixelmator tutorials, Procreate, these are common names when talking about iPad design applications. But no one has dared to go the distance that Serif has with their iPad affinity designer release. This is not just an app, but a complete vector editing experience on a tablet!
