UPS from your Mac and organize all the details of your shipments in one place. Our basic UPS shipping solution in the U.S. If you are a new customer or currently on version 2450 or later, download FedEx Ship Manager Software version 3211 (family series 3200). Download version 3211 If your version of the FedEx Ship Manager software is integrated with fedex integrator ®, the indicator -in appears next to your version number (e.g. v.2362-i). Download WorldShip Find Peace of Mind with the details. UPS tracking solutions show the progress of your shipment all the way, across the city or around the world. At UPS, we use your feedback to improve the performance of your app. New features and improvements include:•Ability to store tracking numbers •Ability to track shipments as soon as the label is created•Continuous accessibility functionality improvements•General performance and bug fixes12.1K rating I've been using this app for about 4 years now, and it's been a lifesaver for me. I do a lot of online shopping and I live in an apartment complex that is locked. So you need a key to get in just to be able to get to my mine Door. Not all drivers have a building key, and if the driver can't get to my door, they don't leave my package at the front door, so then I used to get a sticker that said they were here but not able to deliver my package and will try again. Then they never came to my door. BUT now with the app, I can change my delivery options to pickup. GAME CHANGER!!!! I'm just told my package is coming, and it takes me 20 seconds to go in and change it from a delivery to a pickup. You can choose which UPS delivery point to retrieve it from. I'm lucky and live only about 5 minutes from our local UPS, so I always just pick up from there. Now I am able to pick up my packages when they open at 11 am instead of waiting until about 3 for it to be dropped off. What can I say I'm hospitalized and am always super excited about what it is I ordered (which usually makeup and is obsessed with). I've been very lucky and have never had 1 single problem with the UPS app. And honestly, if I did, it really wouldn't matter. I see it as a wonderful tool that is being given to me and is not mandatory for UPS to provide. I'm grateful and lucky I've never had a problem, but if I did I'd still try to use it. I've been using this program for years and it's very useful. It provides tracking updates such as alerts, which are useful in planning a delivery so that it doesn't sit outside tempting a thief to take it. If we're not going to be home when a delivery arrives, I can have a neighbor take the package when the app notifies me that it's arrived, as it provides real-time updates! The whole company is better than the other delivery company, including the app. I try to get everything shipped UPS if possible because sometimes Fed ex will keep packages up to a week if they don't have a delivery near our home. Living far from the city, it often happens. I've had to track down refrigerated medications and gifts that express shipping were paid for Christmas delivery with Fed Ex (and they were somewhere at our local shipping facility, but couldn't be placed, with the tracking number). I've never had that problem with UPS, they deliver on time every time and sometimes EARLY. This app does not disappoint those who need to know how sensitive packages are placed with a final date and estimated arrival time. I had gone through a difficult repair to husbands iPad. It had to be replaced, but only after receiving it back twice, and the second time they had replaced the battery, but had not taken off the Balastic Glass screen protector. So before I sent back for the third time, I waited until the battery died! I knew the motherboard had finally had it. It took about all of August to receive the new replacement which was to be an upgrade. This time I got that track of UPS and it was delivered a day before we it. This had been hard to believe, but we were very happy to get our replacement and we can use a hot spot and tether iPad for the iPhone so he can get his calls easier because he carries it around the house and he will be able to use it in the car while going to his medical appointments now. It was a great day when he had his own iPad again. Thanks for the great service from UPS and really appreciated the updates so he could relax and have a nice weekend when it came! Size97.7 MBCompatibility Requires iOS 11.0 or later. Compatible with iPhone, iPad and iPod touch.
