How to get Better Call Saul Season 5 Source: Thinkstock You probably already know that DVDs and Blu-ray discs are slowly but surely going the way of the VHS band as people increasingly switch to online services to buy, rent and watch movies. While some lament the loss of the tangible in our daily lives, online-based movie-watching eliminates problems with the loss or damage of fragile discs and makes movies available on a variety of platforms so you can watch movies you own anywhere and anytime without having to think about grabbing your DVDs. Of course, illegal downloading and streaming is very popular, but it robs the many people who have worked to make a film of the compensation they deserve for their blood, sweat and tears. In addition, the options available can often be of low quality, and you run the risk of infecting your computer or mobile device with a virus if you don't know what you're doing. Here's a guide to the many different legal ways to watch movies online for those unfamiliar with the process who yearn to get rid of the scratched DVD hell. Yes, it will cost you a little money, but there are many advantages over both traditional DVDs and illegal downloading. Streaming services There is a litany of options to view content online. One of the most popular methods is to use an online streaming service such as Netflix, Hulu Plus or Amazon's Prime Instant Video. These services charge either a monthly or annual fee and give you access to tons of content, although there is always the chance that a particular movie you are looking for is not on which streaming service you have. The content these services have access to is constantly changing as they complete new offers, so you don't get stuck month by month with the same options. The above services are also ideal for TV viewers and have started to make their own original shows in order to perform on the Market. Many of these shows, such as Netflix's House of Cards and Orange is the New Black, have received glowing reviews. There are some limited options for online streaming that are both legal and free. Crackle is a website that offers movies and TV shows for free streaming, but it's ad-supported and you'll end up watching about as many commercials as you would watch programming on cable. The amount of content Crackle offers is also leaner pickings than the subscription services, since the site does not have the financial muscle to make huge content purchases like the larger sites, so it might be harder to find your favorite movie. The downside of an online streaming service is that you are at the mercy of the content that the company has at its disposal: You can't just select every movie under the sun and be guaranteed to be able to see it. They also don't own the movies, so if Netflix gets rid of your favorite movie you won't be able to watch it. Download One way to own movies and watch them online is to download them. Whether you're a Google or Apple fan, both iTunes and the Google Play Store offer movies that you can buy from the accounts you own. New releases cost about 20 US dollars; approximately the same price that a DVD would cost, although a digital copy cannot be lost or damaged. Of course, buying individual titles is more expensive than paying the small fee for a streaming service and accessing oodles of content. Both iTunes and Google Play also offer movies for rent at a lower price. Rent gives you the option to watch the movie once in a 30-day period and 24 hours to finish it after you click on The Play. These options are also great for switching between devices, as iTunes and Google Play are remembered where you are in a movie when you're interrupted and want to switch from your TV to your tablet or smartphone. Amazon offers movies to buy or rent at prices similar to Apple and Google, and you don't need APrime membership to access this service. Whether you prefer to own or stream movies, watching movies online is the way to deal with DVDs and Blu-ray discs. There are many safe, legal options that don't cost too much and allow you to see on all your devices at will. Check out Entertainment Cheat Sheet on Facebook!
