Tera ebon tower guide

These posts will cover all Vanguard Requests from level 20 to 65 for dungeons and BAM Solo hunts. Vanguard requests will be unlocked as soon as they reach level 20. This will give you the fastest options to level from 20 to 65. The two types of cutting-edge requests you'll want to focus on are dungeon and solo requests for BAMS. Open the vanguard requests window with the 'h' key by default. It won't work until you're level 20.Making dungeons backwards is the fastest way to level. By filling in time with BAM Vanguards, make sure you keep advancing to 65.Make sure you have recommended either Dungeons and Marked Solo. The dungeon vanguard application has two requirements: be the right level and have a high enough item level. Once you don't level a cutting-edge request, it won't appear although you can still run the dungeon if you want. Your xp rewards of killing crowds and bosses will be reduced. Your item level is based on a weighted average of your equipment. You can see the level of your item in the HP and MP bar and in your character profile. The BAM VanguardsBAM Solo Vanguards are important because they will quickly put you in front of BAMS that you can grow for XP. In theory, you can find an appropriate BAM for any level to get equipment and XP, but in practice it is easier to just use those that they point to you. Not all BAMS are properly sized to the level you will fight. They also sometimes drop gears a little higher than the range you would be fighting against them. In this case, it is recommended to fight them for a little longer so that you can use the equipment they dropped before moving on. If you're shutting up at the same time, then that's less of a problem. The boxes below will cover the item level requirements for dungeons and what gear level the dungeons and BAMS will drop. They also cover the locations for the BAMS in case you need to pick up some gear at a specific level that you missed going through a dungeon. Dungeon: Complete Lok's Bastion! Levels 20 to 25Solo: Clear The CodrictLevels Farm 22 to 25BAM Types: Nagas and KumasLocated in: Southern Arun -> Arcadia -> Celestial Hills (21-25)Nearest City or Teleport Location:LumbertownMurical FisheryNotice as the gear dropped is level 26, but the level range for these BAMS is 22 to 25? If you're not getting a Bastion of Lok queue, it can be beneficial to keep hitting the Nagas and Kumas here until you reach level 26 so you can trade in your new gear. The Fimbrilisks will also release the march level 26. Solo: Hunt FimbrilisksLevels 25 to 27Located in: Southern Arun -> Poporia -> Cliffs of Insanity mais próxima ou Teleport Local:PoplionLilith's Keep and Ruinous Manor EntranceDungeon: Complete Sinestral Manor! Unless there is a side room that has been lost, there are only 2 of them between 2 bedrooms per canal. You will have to channel swap to get the next set and repeat until you go around. The first set must have resurfaced when you are on the first channel. They're going to shoot you while they level. There are more than 65 years of searching for history in this area. Luckily they have a very tight aggro range, so you should be fine as long as you don't poke them. Also, note that you have higher equipment than the level range for these BAMS. Consider reaching 44 now before going to the Hydraths Onyx so you can swap up to the new gear beforehand. Both Hydraths and Basilisks XP on this track seems slow. Being able to kill them faster will help a little. Solo: Hunt Onyx HydrathsLevels 43 to 46Located in: Southern Shara -> Westonia -> Tempest Reach (41-43)Nearest City or Local Teleport:Acarum then teleport local to Beacon GarrisonS Hunt Ravenous BasilisksLevels 46 to 49Located at: Southern Shara -> Val Palrada -> Feral Valley North (45-46)Nearest City or Teleport Location:Frontera? The entrance to the Red Refuge is much closer. Dungeon: Complete the Golden Maze! The Guardians of Orisks and Ruins are stronger than the equipment you'll use leading to them. If you're going to get stuck in BAMS, try to reach 60 in Sandlurker Lizards and acquire level 60 gear from lower mobs before fighting the Orisks. They spin a lot and go one shot with their short-range AoE attack. Whether you can find a level 65 friend or a random friendly stranger to run The Tower of Ebony with you, you can shorten each run to about 6 minutes. Depending on your level difference, you may not get XP from the mafias and some of the bosses. This is mainly a problem at level 58 and even less at 59 and 60.Se you are running Ebon Tower with other levelers, it can be helpful to pick up the level 62 equipment from the BAMS around Highwatch to make the bosses go faster. Much faster. Tower of Ebony will only give you gear up to level 60.Dungeon: Complete the Ebon TowerLevels 58 to 64Solo: Hunt OrisksLevels 60 to 62Leased in: North Arun -> Val Orlyn -> Spring Valley (61-62)Nearest City or Teleport Location:Highwatch, then teleport local to Amadjuak Trading PostSolo: Hunt Ruins GuardiansLevels 62 to 64Located at: Northern Arun -> Val Orlyn -> Ex Prima (62-63)Nearest City or Teleport Site :Highwatch, then local teleport to Qeldar StationNote that there were some dungeons skipped. Kelsaik's Nest, Balder Temple, Argon Corpus, and Manaya Core. They appear in story missions, but not all have associated avant-garde requests. They also don't give much XP for the effort, so you may want to go back to these after finishing leveling as part of your story quest adventure. You can get each of the leveling weapons through a box purchased at Highwatch. This requires you to have a character who has finished leveling and has 350 cutting-edge reward credits available. Use the Redeem button in Vanguard Orders to teleport in front of an NPC named Sionne. She sells two boxes of equipment called Seren's Chest of Weapons and Dagon's Weapon Chest. Seren's chest will give you a level 12 weapon, and a box for level 20. This is repeated to level the level 64 weapon. The Dagon Weapon chest covers weapons for level 58 to 64, but also costs 2500 vangurd credits and is debatable as the Seren will give you the Weapons. If you're leveling an alt, consider picking up a Box of Seren from the start so you don't have to waste time cultivating a higher-level weapon as you're leveling the power. There's a lot to do at 65. If you want to continue progressing, follow follow Purple mission markers to pass through Pre-Apex, Apex, and then to the 65+ line of mission that leads to Exodor. There is a great list of things posted here. With patch 92, the search line progression in 65 was reorganized a bit. The Pre-Apex material that primarily introduced the solo content and geared you up has been moved to level 68 and now you go straight to the Apex Banquet mission line. Then jump to the Apex search guide for now and then you can use the pre-apex mission as a reference to what's available. Dungeon Overview by TERA EU Official While searching the lands of TERA, the game's tortuous and revolving plot will take you to some truly wonderful locations, some of which have a radiant alien delicacy, others have a robust beauty of their own. On occasion, you will be sent to some of the most dangerous areas of the game in order to complete important missions, these areas are the dark dungeons. Inside these dungeons, you'll have the most aggressive and brutal monsters hidden. Gather your friends, grab your weapons, and build a team to fight tera's most evil creatures. It will be your task to end their reign of terror! in: Dungeon stubs, Northern Shara (Dungeons) Edit Comments Share Dungeon stub It's time to take action. --EleenThis article is a dungeon stub, a very short article to provide more than rudimentary information about a dungeon. You can help tera wiki by expanding it by editing. Located in:Continent: North SharaProvince: LorcadaZone: Valley of SpiresSub-Zone: Ebon Tower It is a 5-person dungeon that is available for entry for players at level 58, and has an average item level requirement of 124. In the summer of 2019, the leveling of the changes was converted into a 3-man format. To complete the mission (Thulsa's Doom) related to the dungeon you have to run the solo version.
