We have done a great job in improving the stability and performance of our GUI miner, and we are now pleased to announce a version of MinerGate GUI Miner v.8.3. The latest version of our mining software is available for download for Windows, Linux and Mac OS. Bug fixes We've made many performance improvements. Most of them affected different compatibility issues and expanded the number of supported GPUs. Hard fork holder MinerGate has successfully supported recent hard forks of ZCash and Aeon. We have updated the GUI miner code to suit new network specifications and enable ZEC and AEON mining. Here at MinerGate we are continuously improving the performance of our software to make mining easy to start and more cost-effective for you. Stay tuned for our additional updates with additional BTG mining and updated versions of console and legacy miners. Tags: GUI app, mining categories: News Announcement and Announcement
