MONSTER HUNTER WORLD: Official ICEBORNE Sidebar Kiranico © 2021 Credits There are many monster parts and materials that you should farm in Monster Hunter World, but some are much more elusive than others. And I'm not talking about drop rate-wise. One such item is Dragoncore Ore, a rare ingredient found only under the right circumstances. If you're here, chances are you want to know how to get your hands on some for yourself. Let's get into it so you can go ahead and start hunting these babies down. Getting Dragoncore OreThere is only one way to get Dragoncore Ore, and that is through completing the tempered monster investigation. And not just any investigation this will do, either: you should aim for a level two or three threat. I go into detail on the monster investigation system tempered in the related guide, but here is a simple list of simplified requirements: Be at least HR 30 Looking for angry monster tracks when out on an expedition, Your Scout Flies will mark them blue Collect enough tracks to get a tempered monster investigation Start a few tail Kick investigations Well, there's actually a little more. The requirements of HR 30 unlock the threat level of two tempered monsters, and the tempered monster level one threat requires only HR 13. Level three threats require HR 50+. I recommend reading the linked guides for more details on this process, including how to speed up the process of collecting tracks and which monsters you may have to fight during this investigation. Your reward for your hard work, if you choose to go through the whole investigation and eventually defeat the target monster, hopefully it will become Dragoncore Ore. You don't see a lot of people talking about Dragoncore, but it used to make a lot of accessories that made it worth jumping through hoops to get. Hope this info helps you. If you find this is useful and wants additional guidance, check out our Monster Hunter World guide that other players write for all the info. Iceborne's Monster Hunter World expansion introduces many new ore locations on new maps and areas. This guide shows all MHW Iceborne Mining Outcrop Outcrop and which ores can be found on each map on the new Master Rank difficulty. As you know from the main game, ore is obtained from mining outscaps. Each outing gives you 3 pieces of ore. Each map has a specific type of ore associated with it. Each outscap can give you one of the ores available on that map. Ore is mostly used for crafts but can also be exchanged at Steamworks in Seliana for fuel. To mine one of the ore deposits, press or . You can do this 3 times in a row for more ore. The outscap of red and blue ore will drop different types of ore! Both colors are available on Master Rank difficulty. The map below shows red ore in red circles and blue ore in blue circles. You can also revisit the old map of the main game and they will give you a new ore about the difficulties of Master Rank. Here are the pictures of what an in-game deposit ore looks like: For all the Play Ore Games, see this page instead: » Monster Hunter World (Main Game) Ore Locations Ore List – Master Rank Difficulty (Iceborne DLC): Ancient Forest (Master Rank) – Mining Outcrop Locations: Blue Outcrops (Blue Circles): Meld Red Ore Eltalit (Red Circle): Dragonvein Coal Spiritvein Crystal Dragoncore Ore (*rare) Dragonvein Shard Wildspire Waste (Master Rank) – Mining Singkapan Location : Blue Outcrops: Eltalite Ore Meldspar Ore Purecrystal (*rare) Novacrystal (*rare) Red Outcrops (Red Circle): Dragoncore Ore Dragonvein Coal Dreamcore Ore Spiritvein Crystal Dragonvein Shard Coral Highlands (Master Rank) - Mining Outcrops Location: Blue Outcrops: Bathycide Ore Purecrystal (*rare) Bathycite Ore Eltalite Ore Meldspar Ore Red Outcrops (Red Circle): Dragoncore Ore Dragonvein Coal Dragonvein Shard Spiritvein Crystal Rotten Vale (Master Rank) - Mining Outcrops Location : Blue Outcrops: Meldspar Ore Eltalite Ore Purecrystal (*rare) Red Outcrops (Red Circle): Dreamcore Ore Spiritvein Crystal Dragonvein Shard Elder's Recess (Master Rank) - Mining Outcrops Location: Blue Outcrops Circle Fucium Ore Eltalite Ore Firecell Stone (*rare) Meldspar Ore Red Outcrops (Red Circle): Spiritvein Crystal Dragonvein Shard Dreamcore Ore Hoarfrost Reach (Master Rank) – Mining Outcrop Location: Blue Outcrops : Gracium Meldspar Ore Dragonvein Shard Eltalite Ore Purecrystal (*Rare) Red Outcrops (Red Circle): Spiritvein Crystal Dreamcore Ore Dragonvein Shard Dragonvein Coal Guiding Lands – Outcrops Ore Ancient Forest Area - only one color available (Blue Circle): Crystal Dragonvein Coal Forest Crystal Prosperous Crystal (Level 2) Dragonvein Coal Chunk (*rare) Note: In guiding the soil laying eggs randomly. They have some possibilities of spawn being fixed, but they won't always be there. Explore the area carefully to find what's available in your session.
