WolzTeacheramandaw@techtrepacademy.com Tiffany YoungTeachertriffany@techtrepacademy.com Welcome to Tech Trep Academy, run by My Tech High. Since 2009, My Tech High has built Public/Private Partnerships with innovative, accredited public schools to offer a personalized, tuition-free, distance learning program for students. Our program is in line with national best practices for online learning as well as with Stanford University's researched-based Social Innovation model that argues that public/private partnerships are critical to creating high-quality, long-lasting, innovative practices. In the state of Arkansas, Tech Trep Academy has partnered with the Pulaski County Special School District through the Driven Academy program. For the 2019-2020 academic year, we can serve students who reside within the PCSSD limits. Students living in the Little Rock School District can also request a transfer of school choice until July 31, 2019. We are a group of passionate parents, teachers, administrators, technologists, entrepreneurs and business leaders who focus on creating great educational experiences for every child. Develop a personalized learning program and tailor instruction based on your child's individual interests, needs and skills. Choose from a wide variety of providers to design a personalized training plan that meets the needs of your unique child. Create an engaging environment where your child can feel motivated, challenged and happy about learning! When learning is personal, children begin to take responsibility for their learning and begin to develop the ability to solve problems relevant to their current and future success. The uniqueness of each child drives the personal curriculum and creates an environment where children can thrive and develop success patterns, self-confidence and excellence. Our children are not standard. It is important to recognize each individual child's strength and help them build on what they want to do and learn in life. Matt Bowman Students who participate in the Tech Trep Academy distance learning program are enrolled in a full-time, public school and are given the resources needed to design a personal training plan. Based on each child's needs and interests, a customized, year-long schedule of 6-7 periods of both core courses and elective courses is created. Through the personal support of certified teachers, syllabus specialists and mentors, students are activated to develop through in their own pace with curriculum, courses and activities tailored to their unique needs. All students are supported by experienced, certified teachers and are given unlimited access to the school approved curriculum in the four key subject areas: Math English/Linguistic science social studies In addition to core classes, students also have access to a wide variety of elective courses such as Java Programming, Game Design, Robotics, 3D Printing, and many more. The elective courses are intended to adapt to the student's interests, knowledge and skills, prepare them for success in their future careers and enable them to reach their full potential. Thank you for the commitment you have to My Tech High and provide stellar educational resources and a fantastic technical environment. I am amazed at how my children have grown and jumped leaps and bounds in school. Your vision of what is possible has really inspired me and introduced my children and me to all sorts of resources that we didn't know were possible. I thank God daily for everything you do and all the families you are blessing! My kids LOVE learning and can't get enough! And they want to thank you all and your team too! Bless you! Cheri (March, 2016) We are totally in love with schooling at home and so appreciative of the My Tech High program to make it so easy to choose the best of the best curriculum and supplies. A lot of gratitude to you and your team. Stephanie (Sept, 2016) My Tech High program allows me to personalize and customize what I want to learn... so that I can prepare for my future all the better. The technical classes have been wonderful! It has opened doors and taught them things they would never have pursued on their own. Over the past 7 years, students from our program have successfully attended any college of their choice – including in state colleges, Stanford, Harvard, and everywhere in between. You will be amazed at what happens when a child is given the opportunity to experience a truly personal education. Finding what works best for each child enables their natural love of learning to expand in a way that you never thought possible. Between field trips, community events, and parent-led activities, students of all ages in our program have so many opportunities to connect with other students that parents often have to limit the time spent in group settings. In addition, students of all ages can participate in leisure activities at their local district school. School.
