# One direction memes buzzfeed

From baby dancing to funny cats and political Photoshop, memes have gone viral. They make us laugh, think, and come together. But what are memes? Richard Dawkins, an evolutionary biologist known for his popular books on science and ghostism, coined the term in his 1976 book Selfish Genes. The word itself is a combination of genes and Greek words for imitation, and he argued that culture is a means of transmission. Decades later, we're flooded with funny and influential memes thanks to internet culture. The BBC recently wrote about how important memes are in our daily lives, with news, ideas and humour in one clever little packet. Memes let us relax on serious topics. They also spread like jokes to give us a humorous perspective. Iconic meme stars usually get roles unexpectedly, and like world-famous grumpy cats, they can capture our minds. Yuri\_Arcurs/Getty Images After adult entertainment, photos and videos of cats are the most popular content on the Internet. It's not surprising, then, that cat memes are so popular that some entrepreneurs are making good living trafficking on them. These memes evolve into books and day picture calendars, and cats provide commentary on their lives that we can all empathize with. A CGI or computer graphic demo called Sonsedska/Getty Images Dancing Baby may have been the first widely distributed meme-style image. Short, silly or popular clips followed, from video blogger Gary Brolsma to Romanian pop song Numa Numa, who like to lip and gesture in front of a computer. His production value was terrible, but the experience was captured, and through the wonders of meme sharing, he became world famous. Blogs have become a very profitable YouTube business for celebrities of all ages. Getty Images text entered through fizkes/iconic photos is their own meme category. Overly attached girlfriends have crazy eyes and bear quotes like leave a light so you can see sleep. Many of these random photos - a successful child was one of many photos his mother posted on the photo-sharing site - are recognized as major brands. The world-famous grumpy cat, featured in many grumpy themed memes, appeared on frisky cat food packaging. Andrew Ritchie/Getty Images Image caption Through Photoshop corrections, lucky photos, memes provided great political and social satire. One famous example is British Prime Minister Boris Johnson' conversation with Queen Elizabeth, close to the appearance of U.S. President Donald Trump. The Queen's caption balloon said I thought you had returned to america. Julian 11 / Getty Images For Star Wars, it's a trap! For example, it can be used as a funny response when someone announces plans to visit an online friend in person. Characters from movies, television, and comics pop up in comment streams, making points more graphic and humorous than words alone. Albert L. Ortega/Getty Imagescure, or 2wha in Japanese, cartoon creatures and emoji characters from Japanese popular culture, is a popular meme. Hello Kitty is one of the best known images, along with chococats and other related images. Pusheen is a chubby grey kitty engaged in everything from sleep to enjoying food, and on the Messenger app you offer meme-style commentary such as what are you doing?. Fujian eating pizza says it all. Even poop emojis have become popular online and offline memes. Poop emoji hats, T-shirts and even night lights are provided. Artrise/Getty Images and everyday photos can also be memes when accurately expressing common experiences. The picture, which says thousand words, is now used in emails and messages to express feelings of joy, despair, loneliness, and excitement. When these photos are used as memes, they have a special clarity of the message because everyone knows what a lonely man photo means. The same is true of poignant sports photography or the expression of a child of happiness - the aforementioned Success Kid is a great example without subtitles. RobHowarth/Getty Images Memes do free that businesses spend millions of dollars to achieve: get the message. No wonder Frisky hired a grumpy cat as his spokecat. Dos Équith created the advertising concept with the caption jonathan goldsmith is the most interesting person in the world. Captions presented in meme form, it takes off online with hundreds if not thousands of parodies like I won't always listen to the Rolling Stones, but I can do my neighbors when I do. Bryana Jackson/Getty Images Memes are just not funny. As Richard Dawkins points out, they convey ideas and opinions in an infectious form that quickly spreads from person to person. Social networking provides much greater speed than email. While most memes are humorous, memes are vehicles for more possibilities. PeopleImages/Getty Images ("") on Sorry, but only a real Pretty Little Liars fan can get 25/25 on a character identification quiz and why they married him because ☺ feel like a human being. Even though you are a stressed college student. Aug 27, 2019, 9:14 PM Public RulesJan. 30, 2018, 9:51 PMEl mejor contenido Feminist Orida Press a tu bandeja de entrada. May 24, 2018, 1:13 PMLady-Tested, Lady-Can you it????? December 5, 2017, 7:01 PM, really, really needs them. January 23, 2017, 8:40 PM Human. Even though you are a stressed college student. August 27, 2019 9:14 pm, really, really needed. January 23, 2017 8:40 p.m. It's safe to say that the Skip Content meme has taken over the internet and continues to evolve every day. From simple photos with little editing to sophisticated Photoshop images, memes come in all shapes and sizes. But creating your own memes can feel intimidating, especially if you don't feel confident in your computer skills. That's why we've created an easy instruction guide to help you create the perfect meme to share with family and friends. Step 1: Know your memes for your research: It's a good idea to look at memes that have already gone viral, especially the latest ones. The best resource for keeping up with the latest memes and trends is to know your memes - a dedicated website that tracks all the memes you come across. For example, the image above fit back into the meme dome several times. Focus your attention on trends: Staying up to date with news, pop culture, and other memes can be a big source of inspiration. Instagram, Twitter, Reddit, and Facebook are great for discovering trends. Entertainment topics are usually a win. Notice what makes you laugh the most and what gets the most response. A recent meme to make the rounds is known as the slapdwing roof of car memes. Choose a topic that's relevant: If you're not a sports fan, you may have a hard time selling sports-themed memes. Cute animals are always a good go-to when tapping on ideas, but if you really want to push the envelope, choose a publicly certified one that can be easily imitated. If you want to use your personal experience as the center of your memes, choose one that's easy to empathize with. Media decisions: The easiest medium to use is photography, but if you can capture something fun or fun on camera, you can venture into your videos. Step 2: Organize your content to collect materials — the point at which you decide to think about or recycle what you find online before you go further. If you're doing a photo meme and want to use existing content, grab the right screen from the video you want to use. You can also surf the web for the images you want to use as nails, or hit Imgur's meme generator. Keep it short and simple - I want to make an immediate impression because the attention period for a typical Internet user is very short. Think catchphrases that speak simple and memorable languages. Find the correct expression to convey — Make sure the visual matches the sentiment you want to express. Step 3: If you're creating the tools photo memes you need, it may be wise to get Photoshop. You can look up meme generator sites like Imgflip's meme generator, so you can upload your own photos and use them as backgrounds. Finally, you can install the photo app directly on your phone so that you can add text to your images. Step 4: If you have a photo, it doesn't matter if you've taken it, taken it to the screen, or found it online. When you arrive at the Imgur Meme Generator (web-based) meme generator, you will need to log in or create an Imgur account. Then click Upload New Background. Next, drag the image to the box at the top of the pop-up window, click the Browse button to upload the image from your computer, or paste the image or URL into the text box just below the Browse button. This automatically takes Imgur to upload the image and to the edit page. When the photo is ready, it appears on imgur's edit page and you can enter text with the image. From there, you can do all sorts of things, such as moving and resizing text. You need to name the meme before you click Create This Meme! On the next page, you'll find a variety of options on how you can do it with the memes you've created. To archive it later, right-click the image and save it to your computer. You can also copy the link for later sharing. If you don't want to save the image to Imgur, be careful because it only displays the delete post link once. Otherwise, you can add it to your Imgur account. Congratulations, you created a meme through Imgur! Meme Generator Free (iOS/Android) If you're the most creative when you're on the run, then ZomboDroid's Meme Generator is available for both iOS and Android at the moment, considering it's free. Download the app and click the photo icon in the upper right corner of iOS and the lower right corner of Android. This way, Meme Genator has a lot of stock images to choose from, but you can access your own! Select the photo you want and the app will automatically take you to the next step. Screenshots will prompt you to choose the layout of your meme and the quality of it then. For layouts, you can choose between classic and modern. Classic layers text over an image, superimposing text on one existing line at the top and one line at the bottom. Hyundai Put the text on top of the photo. For quality, you can choose between Normal and High (normal produces results faster than high, but may have lower image quality). After you make your choice, select OK. On the screen following the screenshot, you can add your text, you can add stickers and emoticons, and you can even add effects. When editing is complete, select the Save icon to save the image or it is an icon to share. You can also share it with social media apps like Instagram and Twitter, or send it to your email address. Or text. It's meme generator free and that's simple! Now, how about creating a video meme? Although still not as concise in nature as memes, video memes also have a place in the world. Here are some resources you can rely on to capture, create, and share video memes without having to know how to use expensive and complex programs like Adobe's After Effects and Apple's Final Cut Pro. To start shooting a story or a short video, press and hold the white circle in the center. When you're done with a clip, you can add items such as text, stickers, or other effects when you're released. When you're ready to share your story video, just tap the story icon in the lower left corner. Instagram Story videos disappear from the app after 24 hours unless you save them or add them to your profile. In recent years Snapchat has become a popular solution to share short videos with Snapchat friends. Press and hold a large circle to launch the app, shoot the subject, and start the recording process. You can shoot video without time constraints, and all scenes can be shot at once. When you're done, you can add all kinds of emoticons, text, and effects to your video to pop as if you were snapping a picture. You can also save a clip: After the clip is recorded, look for the down arrow icon in the lower-left corner of the screen. It's a good way to share your story or to a friend - anyone who follows a snap can see a work of art for up to 24 hours after taking a photo. However, when you save your videos, you're free to post them anywhere else the world can see, including Reddit, YouTube, Facebook, and Twitter. Step 5: Sharing a meme is not really a meme if you keep it to yourself. The best part of creating memes is online exposure. Make it official by sharing it on your favorite social networking sites like Twitter and Facebook. Editor's Picks
